

Name Kathrin Schrick

Title Assistant Professor

Publications

- Schrick, K., Marlatt, S.A., Roque, L., and Spalding, I. 2010. START lipid/sterol binding domains modulate transcription factor function in yeast (manuscript in preparation).
- Schrick, K., Howes, T.R., and Keenan, A. 2010. Homeodomain transcription factors that contain putative lipid/sterol binding domains (manuscript in preparation).
- DeBolt, S., Scheible, W.-R., Schrick, K., Auer, M., Beisson, F., Bischoff, V., Bouviar-Nave, P., Carroll, A., Hematy, K., Li, Y., Milne, J., Nair, M., Schaller, H., Zemla, M., and Somerville, C. 2009. Mutations in UDP-glucose:sterol-glucosyltransferase in Arabidopsis cause transparent testa phenotype and suberization defects in seeds. *Plant Physiology* 151:78-87.
- Venkata, B.P., and Schrick, K. 2006. START domains in lipid/sterol transfer and signaling in plants. In C. Benning and J. Ohlrogge (eds.): *Current Advances in Biochemistry and Cell Biology of Plant Lipids: Proceedings of the 17th International Symposium on Plant Lipids*, Michigan State University Press, East Lansing, Michigan. ISPL2006, pp. 57-61.
- Schrick, K., Nguyen, D., Karlowski, W.M., and Mayer, K.F.X. 2004. START lipid/sterol binding domains are amplified in plants and are predominately associated with homeodomain transcription factors. *Genome Biology* 5: R41.
- Schrick, K., Fujioka, S., Takatsuto, S., Stierhof, Y.-D., Stransky, H., Yoshida, S., and Jürgens, G. 2004. A link between sterol biosynthesis, the cell wall and cellulose in Arabidopsis. *Plant J.* 38: 227-243.
- Schrick, K., Mayer, U., Martin, G., Bellini, C., Kuhnt, C., Schmidt, J., and Jürgens, G. 2002. Interactions between sterol biosynthesis genes in embryonic development of Arabidopsis. *Plant J.* 31: 61-73. (article featured in cover illustration)
- Schrick, K., and Laux, T. 2001. Zygotic Embryogenesis: The formation of an embryo from a fertilized egg. In S.S. Bhojwani & W.Y. Soh (eds.) *Current Trends in the Embryology of Angiosperms*, Kluwer Academic Publishers, Dordrecht, pp. 249-277.
- Schrick, K. 2000. Perspective: Plant developmental biologists show their colors: Toward a virtual understanding of green development. *Science's STKE* (Dec. 5).
- Schrick, K., Mayer, U., Horrichs, A., Kuhnt, C., Bellini, C., Dangl, J., Schmidt, J. and Jürgens, G. 2000. FACKEL is a sterol C-14 reductase required for organized cell division and expansion in Arabidopsis embryogenesis. *Genes Dev.* 14: 1471-1485. (article featured in cover illustration)
- Schrick, K., Garvik, B., and Hartwell, L.H. 1997. Mating in *Saccharomyces cerevisiae*: The role

of the pheromone signal transduction pathway in the chemotropic response to pheromone. *Genetics* 147: 19-32.

Dorer, R., Pryciak, P., Schrick, K., and Hartwell, L.H. 1994. The induction of cell polarity by pheromone in *Saccharomyces cerevisiae*. *Harvey Lect.* 90: 95-104.

Bennetzen, J. L., Schrick, K., Springer, P.S., Brown, W.E., and SanMiguel, P. 1994. Active maize genes are unmodified and flanked by diverse classes of modified, highly repetitive DNA. *Genome* 37: 565-576.
