

Kansas State University
Department of Economics
Advanced International Economics (International Economic Policy)
Economics 823
Fall 2004
E. W. Nafziger (nafwayne@ksu.edu)
8:05-9:20 MW, Waters 329
Office hours: 10:30-11:20 MWF, or appointment - Waters 312.

I will calculate your semester grade by weighing the mid-term examination one unit, your class presentations based on a research paper (see last section) one unit, and your final examination one unit (old exams are at <http://www.ksu.edu/economics/nafwayne/class.htm>) (KSU computing ID and password required). Additionally, I will raise your semester numerical score if you make an excellent contribution to class.

RELATIONSHIP OF THE COURSE TO OTHER INTERNATIONAL ECONOMICS COURSES

The prerequisite for this course is Economics 681 or equivalent. The course does not cover the same ground as, but is complementary to, International Economics (Economics 681), International Trade Theory and Policy (Economics 981), and International Markets and Agricultural Trade (Agec 840).

The major objective of the course is to help students acquire an analytical framework to examine contemporary international economic issues, such as the global (especially Asian, Latin, and Russian) financial crisis, international adjustment and reform in developing and transitional economies, U.S.-Japanese bilateral economic relationships, trade and income distribution, regional economic integration, the international monetary system, the U.S. balance of payments problem, and globalization. The goal is to provide students with the background, experience, and tools for future analysis of international economic problems and policies.

REQUIRED MONOGRAPHS

Economics 823: Advanced International Economics: Professor E. Wayne Nafziger. Fall 2004.
Eisenhower 11 (**Eis**) packet.

Michael Mussa, *Argentina and the Fund: From Triumph to Tragedy* (Washington, D.C.: Institute for International Economics Analyses in International Economics 67, July 2002). ISBN 0-88132-339-x.

Morris Goldstein, *Managed Floating Plus* (Washington, D.C.: Institute for International Economics, 2002). ISBN 0-88132-336-5.

William R. Cline, *Trade Policy and Global Poverty* (Washington D.C.: Institute for International Economics, 2004) ISBN paper 0-88132-365-9 or William R. Cline, *Trade and Income Distribution* (Washington D.C.: Institute for International Economics, 1998). ISBN 0-88132-216-4.

Pdfs off the internet, including Economic Report of the President 2004, Mann on sustainability of

the U.S. current account, Mann on U.S. outsourcing of IT and white-collar jobs, and Josling and Hathaway on agricultural trade reform.

For orders for IIE monographs, see <http://www.iie.com/> or the bookstore:

PLAGIARISM

Plagiarism: University policy is: “Plagiarism and cheating are serious offenses and may be punished by failure on the exam, paper, or project; failure in the course; and/or expulsion from the university.” For more information refer to “Academic Dishonesty,” <http://www.ksu.edu/uau/fhbook/fhxf.html>.

REQUIRED READING ASSIGNMENTS

The Balance of Payments: Equilibrium and Adjustment (Wed., Aug. 18-Mon., Aug. 30)

Peruse U.S. President, Council of Economic Advisors, Economic Report of the President, 2004, pp. 3-4, 17-27, 223-264, 402-412 (with emphasis on examining US’s international position in context), www.gpoaccess.gov/eop/a257.g.akamaitech.net/7/257/2422/09feb20040900/www.gpoaccess.gov/usbudget/fy05/pdf/2004_erp.pdf; or govt publications office, Hale Library, 3rd floor, for Friday, August 23. Lecture will focus on meaning and concepts pertaining to the balance of payments, especially that of the US.

Class Presentations (tentatively Wed., Dec. 1-Wed., Dec. 8)

FINAL EXAMINATION, Wednesday, December 15, 2004, 11:50-1:40, in Waters 329

Lecture material not included in your reading will be included on exams.

CLASS PRESENTATIONS

You will be expected to make a class presentation on research (empirical, conceptual or analytical) related to a topic on international economics once during the semester. One student is to make a presentation on "Does Trade Cause Growth?" based on Frankel and Romer, *AER* (June 1999). For other students, indicate a tentative topic by Monday, August 30; hand in a 1-2 page outline by Wednesday, September 8; and hand in a more substantial outline or prospectus one week before your oral presentation.

You can present empirical, conceptual, or analytical work on a topic close to the time related topics are discussed in class; as an alternative, you can present your topic during the last few class periods. You are required to provide both written and oral versions of your work, but the written version can be revised to be handed in to the instructor or e-mailed to him on or before Friday, December 10 at 8:05 a.m.

Your paper should have ample references to literature in the field (except the Frankel-Romer presentation is not expected to have so many references to other papers). You are to use standard bibliographical and citation procedures (if in doubt, use the procedures of a recent *American Economic Review*). For material on the web, the bibliographical citation must be complete, for example, Stanley Fischer, "The Asian Crisis: the Return of Growth," International Monetary Fund, Washington, D.C., paper presented to the Asia Society, Hong Kong, June 17, 1999, <http://www.imf.org/external/np/speeches/1999/061799.HTM>. Feel free to hand in an earlier draft so that I can give you comments that will allow you to improve your paper (but give me a few days to respond), or ask questions about your progress at earlier stages of work on your paper.

Following are internet sources that may help you in brainstorming for topics:

<http://www.iie.com/publications/toc.cfm>; <http://altaplana.com/Gate.international.html> indicates international agencies, which might suggest possible topics; <http://www.ksu.edu/economics/nafwayne/edc.htm>, although listed for another course, has

sources in international economics that might aid you in finding topics, including a description of <http://www.econlit.org/>, available on the library's website, <http://www.lib.ksu.edu/>. See also <http://ideas.repec.org/>, a large bibliographical database dedicated to economics and items available on the internet. http://www.iie.com/publications/publication.cfm?pub_id=31 indicates a source on the cost of protection in China; http://www.iie.com/publications/publication.cfm?pub_id=79 indicates a source that discusses agricultural trade policy for the WTO. Other topics might include the new classical macroeconomics: its implications for international trade; a critique of the neoclassical approach to international trade; credibility and stabilization; and the international economics of the environment (including the international economics of global warming).

Sites on journals from the IMF include the *IMF Staff Papers* (<http://www.imf.org/external/pubs/ft/staffp/2000/00-02/index.htm>), the *IMF Survey* (<http://www.imf.org/external/pubs/ft/survey/surveyx.htm>), and the IMF's *Finance and Development* (<http://www.imf.org/external/pubs/ft/fandd/2001/03/index.htm>), and papers by the IMF related to its view of the global financial crisis (<http://www.imf.org/external/>).

Journals from the World Bank consist of the *World Bank Research Observer* and *World Bank Economic Review* (<http://www.worldbank.org/research/journals/index.htm>). The IMF website www.imf.org/, includes the semi-annual *World Economic Outlook*. Data on the US balance of payments can be found on <http://www.bea.doc.gov/>.
