

Experience

Washington University in St. Louis | Facilities Planning & Management | St. Louis, MO

Senior Campus Planner | Planning & Design | 2022 - present

Project Manager | Capital Projects / Office of the University Architect | 2011 - 2022

- Shepherd planning and design process from early concept through planning, programming, design, and documentation, with particular focus on the creation of an inclusive advisory group structure and relevant stakeholder engagement to gather – and create – information needed to shape the focus of a project
- Coordinate with all relevant stakeholders – including students, faculty, staff, administration, trustees, donors, alumni, community members – to ensure project goals are clearly defined and final design supports the stated criteria, need and user groups
- Work closely with university leadership to develop curate complex project information for presentation to a myriad of constituencies, including Board of Trustees, Facilities and Campus Planning Trustees, University Management and Council committees, students, alumni, conference attendees, administration, faculty and staff groups, ad-hoc advisory committees, municipal bodies and community representatives
- Assess the anticipated need of a specific project, refining as required, and develop a working cost model, aligned with university financial centers and priorities
- Directly oversee multiple teams of consultants from all disciplines while developing and honing project concepts, plans, designs and documents used to communicate intent, impact for stakeholders, the community, and contractors
- Develop and run an architectural selection process for individual initiatives based on criteria representing specific intent, program, location, scale and budget of a project
- Evaluate plan and design options, based on institutional priority, programmatic support, architectural aesthetics, and cost implications, and build consensus toward the implement of shared recommendations
- Review, refine and approve project schedule, scope changes, and cost impacts
- Collaborate with facilities groups and university departments to maintain or improve existing physical infrastructure performance goals
