KSU Salaries Compared to Other Groups

The mission of Kansas State University is to provide high quality education, research, extension and service to the State of Kansas. This mission continues to be undermined by low salaries for faculty and unclassified professionals.

KSU salaries for FY 08 were not competitive when compared to those of other relevant university groups, including the KSU peer institutions designated by the Board of Regents; the Big Twelve institutions; the National Association of State Universities and Land Grant Colleges (NASULGC); and 50 major land-grant universities.

For Tables 1-3 and Table 5, the data are retrieved from an annual salary report, ACADEME, sponsored by AAUP (American Association of University Professors). Only faculty who have 50% or more instructional appointments were included in this report.

Kansas State University is in its third year of targeted salary enhancements for ranked faculty. Using tuition dollars, the university set aside about \$500,000 to increase the salaries of qualified recipients by a minimum of \$2,500. The ultimate goal is to increase the salaries of full-professors and to provide incentives to retain high-performing faculty.

With the professorial awards in effect for 2007-08 salaries, there is a 1.9% decrease in full professor deficits. But overall, other universities continue to implement similar initiatives to retain and recruit faculty. The only way for K-State to make significant improvements in this area is to allocate a larger percentage of funding to support and increase faculty salaries.

This is the second year of a \$50,000 allotment to increase instructor salaries. The salary deficit increased by 1.0% the first year, and another 1.7% the second year.

Although the extent of KSU salary deficiencies differs with the various comparison groups, the conclusion is the same: Despite slight increases due to faculty salary enhancements, KSU remains in an extremely weak competitive position for attracting and retaining quality faculty.

Peer Institutions

The Kansas Board of Regents has designated five universities, selected because of similarities in size, programs, and mission, as KSU peer institutions — Colorado State, Iowa State, North Carolina State, Oklahoma State, and Oregon State. Comparisons of salaries at KSU with these five universities are found in Table 1.

It should be noted that these institutions do not have especially high salaries compared to all the land-grant institutions. In fact, in FY 08 the average of their salaries was only slightly above the average for the land-grant institutions that provided data. Only two of the peer institutions, North Carolina State and Colorado State, were ranked among the top 25 land-grant institutions (Table 5).

KSU's rank adjusted salary deficit relative to its peers has been above 12% since 2001. To equal the average salary of the peer universities this year, KSU would need to increase average salaries 6.8%. To equal salaries at the peer university with the highest salaries, KSU would need to increase salaries by 32.3% (Table 1).

Big Twelve Universities

Because KSU is a member of the Big 12 Athletic Conference, it is appropriate to compare KSU to other conference members. KSU salaries ranked last in the Big 12 for **the eighteenth consecutive year**. The average salary is 8.0% below the average of the other Big 12 universities, and 49.4% below the top-ranking university (Table 2).

National Association of State Universities and Land Grant Colleges

KSU faculty salaries are significantly deficient when compared to the average faculty salaries of member institutions of the National Association of State Universities and Land Grant Colleges (NASULGC). These data are compiled using the Oklahoma State University Salary Study. All faculty members are included in the comparison except those with 100% service appointments.

KSU is in direct competition with these universities for the recruitment and retention of faculty. When salaries are compared according to academic rank, KSU salary deficits become more pronounced at higher ranks. In FY 08, instructors' average salaries were 4.9% lower than the NASULGC average. Average KSU salaries for assistant professors and associate professors were at a 12.0% and 9.2% deficit, respectively. For KSU full professors, the deficit was 18.4% compared to the NASULGC average, an improvement of 1.9% from last year (Table 3). With these pronounced deficits, retaining senior faculty at KSU remains at risk. Overall, using the rank-adjusted calculation, KSU's percent deficit stands at 13.6%. This is a 0.9% improvement over the FY 2007 deficit.

Essentially, calculating average salary using the rank adjusted method provides an estimate of what the comparison institutions' average salaries would be if the distribution of faculty by each rank were identical to that of KSU. This hypothetical average salary is calculated by multiplying the proportion of KSU's faculty at a particular rank by the comparison school's average salary at the same rank, and adding these values for all ranks. Although these hypothetical compositions of faculty do not actually exist, the rank adjusted average salary provides a valuable measure of comparison by leveling the distribution of faculty among comparison institutions.

It is important to mention, however, that the rank adjusted average salary for comparison is consistently lower than the corresponding all ranks average. This is because KSU has significantly fewer faculty members in the highest rank and more faculty members in the lower ranks than the NASULGC institutions. The differences in faculty rank percentages at KSU and its comparison institutions are directly related to differences in salary structures. Younger faculty leave KSU for higher salaries at other institutions before promotion to a higher rank, and KSU does not attract faculty at higher ranks due to its lower salaries.

Constant Dollars

Table 4 is included to show KSU salaries in terms of constant dollars over the past 37 years. The constant dollar value is generated using the fiscal average of the monthly Consumer Price Index (CPI). KSU faculty salaries increased 4.6% compared to FY 07, while purchasing power increased 1.1% (Table 4).

50 Land-Grant Institutions

Since KSU is a land-grant institution, it is appropriate to compare faculty salaries to institutions with a similar mission and type of faculty (instruction, research, and service). Each state has a university that was formed under the Morrill Act and receives federal and state funds for research and cooperative extension. Table 5 provides a list of the 47 land grant institutions who submitted data to AAUP. KSU is ranked 40th, up from 43rd last year. This table also provides comparative compensation (salaries and benefits). KSU is ranked 43rd, which is up from 44th last year. However, KSU remains in the bottom third of land-grant universities, and the benefits package is very poor in comparison.

The main factor in the improvement in rank is the fact that the University of California at Davis and Kentucky State University did not report this year, and were ranked above KSU last year. However, other FY 2008 reports have shown some salary comparison improvements resulting from the Professorial Performance Awards, Targeted Salary Enhancements, and Instructor Salary Enhancements. KSU remains in the bottom third of land-grant universities.

Cost of Living Comparisons

This year is the second year cost of living (COL) comparisons have been included. Using the cost of living comparator at CNNMoney.com, the average K-State faculty salary was entered to find the salaries that would be required in the other university communities to allow a standard of living in those communities equivalent to the standard of living in Manhattan, KS for a person earning the average faculty salary.

The actual average salary from *Academe Bulletin of the American Association of University Professors*, Vol. 94, No. 2, March-April 2008 is in the second column. Next is the amount K-State's salary would be equivalent to in the other university community. For example, K-State's average salary of \$69,267 would have the spending power as \$62,196 in Lubbock, TX. The fourth column ranks university community's cost of living, and the last column is the percent difference in cost of living between Manhattan and the other community.

Manhattan is the second highest in cost of living among Big 12 communities, third among the six peers, and 27th among NASULGC communities.

^a This table provides a comparison of average faculty salaries at KSU and its peer institutions including: Iowa State University, Colorado State University, North Carolina State, Oklahoma State University, and Oregon State University. Comparisons are made between the composite and KSU salaries based on average salary and rank by rank average salary (Board of Regents method of calculating averages for comparison).

^b Average salary excluding fringe benefits.

^c Rank Adjusted Average Salary is calculated by multiplying the overall average of peer salaries by rank times the distribution of KSU faculty by rank; these values estimate what the comparison institutions' average salaries would be if their distribution by professorial rank were identical to KSU.

^a This table contains a comparison of KSU faculty salaries with salaries at other members of the National Association of State Universities and Land Grant Colleges (NASULGC) by rank, all ranks, and rank-by-rank. Beginning with 1993-94, the data includes College of Salina, in addition to KSU Main Campus and the College of Veterinary Medicine.

^b Nine-month salaries are reported. "Other" refers to the average at the NASULGC institutions.

^c Refers to the percent that KSU salaries are below the average of NASULGC institutions. Beginning in 1999-00, deficits were re-calculated using a methodology in compliance with the Kansas Board of Regents.

^aThis table provides a record of average salaries at KSU since 1969-70. It shows actual percentage increase in dollars, adjusts the salaries for inflation using the Consumer Price Index and indicates the purchasing power of the current salary when compared to the purchasing power in 1969-1970.

Source: Data taken from Academe Bulletin of the American Association of University Professors, March-April 2008.

^bAverage 9-month equivalent salary excluding fringe benefits.

^cFiscal (July 1 to June 30) average of monthly Consumer Price Index values reported in the CPI Detailed Report published by the U.S. Department of Labor Bureau of Labor Statistics. Effective January, 1989, the U.S. Bureau of Labor Statistics changed the base year to the average during 1982-1984.

^dConstant Dollar Series = (Current Dollar Salary/Consumer Price Index) X 100.

^eConstant Dollar Faculty Salary relative to the Constant Dollar Faculty Salary in 1969-70.
