---	---

Rationale:

To better prepare our Human Resource Management (HRM) emphasis students (in the Management major) for jobs in the HRM area, we want to add a new Staffing course (Mangt 643), move one course from being an elective to being required (Mangt 623), and remove the required quantitative management course (Mangt 521) to make room for a more HRM-focused curriculum without adding additional credit hours. HRM emphasis students will have fewer electives and more required HRM courses. These changes fully align our HRM curriculum with the recommendations of the main professional organization for HRM professional (Society for HRM) and the conclusions of recent national studies on HRM education (which included students, business professionals and academics).

Impact on Other Units:

None

Effective Date:

Fall 2014

College of Agriculture (3-10-14)

Non-expedited Course Changes (599 and below)

Horticulture, Forestry, and Recreation Resources

Park Management and Conservation

ADD: PMC 113. Shooting Sports Certification (1) I. Students will gain youth leadership and shooting sports proficiency and instruction skills in riflery, hunting skills, pistol, archery, shotgun and muzzleloaders. Participants in the firearms disciplines may (with additional coursework and passing of a written test) be eligible to receive 4H or Scouting shooting sports instructor certification. By appointment.

RATIONALE: The PMC prefix reflects the simplification and consolidation of curricular components (*eventually all PMC focused RRES course offerings will use the PMC prefix*). Essentially the change involves taking a portion of a former course (RRES 310) and reformatting it into a series of 1 hour courses.

IMPACT: No impact on other departments.

EFFECTIVE DATE: Spring 2015

ADD: PMC 114. Kansas Park and Wildlife Regulations (1) I. Students will gain proficiency in their understanding and appropriate enforcement of state statutes and enforceable regulations dealing specifically with parks and wildlife. The underlying purpose of the course is to provide PMC students interested in pursuing careers as park rangers or conservation officers with Kansas specific regulation coverage. By appointment. (Meets the PMC 1hr certification requirement).

RATIONALE: The PMC prefix reflects the simplification and consolidation of curricular components (*eventually all PMC focused RRES course offerings will use the PMC prefix*). Essentially the change involves taking a portion of a former course (RRES 310) and reformatting it into a series of 1 hour courses.

IMPACT: No impact on other departments.

EFFECTIVE DATE: Spring 2015

ADD: PMC 115. Adventure Challenge Certification (1) I. This training focuses on adventure challenge and team building on low ropes courses, high

ropes facilitation and 16 additional hours of ropes course managers training. Students will examine challenge course expectations and assessments. Students will be provided skills to work with various clientele from corporate teams to persons with disabilities. The course will meet ACCT (Association for Challenge Course Technology) requirements.

RATIONALE: The PMC prefix reflects the simplification and consolidation of curricular components (*eventually all PMC focused RRES course offerings will use the PMC prefix*). Essentially the change involves taking a portion of a former course (RRES 310) and reformatting it into a series of 1 hour courses.

IMPACT: No impact on other departments.

EFFECTIVE DATE: Spring 2015

ADD: PMC 120. Outdoor Recreation Certification (1) I. This course is designed to provide the PMC major 1 hour of credit for outdoor recreation certifications not directly taught by Kansas State University. Examples are numerous, and include first aid, first responder, Archery in Schools Instructor, Aquatic Facility Operator, Playground Inspector certification. Certification being accepted must involve a minimum of 16 hours of contact, exercise and assessment hours; or additional requirements can be added by PMC faculty to meet 16 hours of content.

RATIONALE: The PMC prefix reflects the simplification and consolidation of curricular components (*eventually all PMC focused RRES course offerings will use the PMC prefix*). Essentially the change involves taking a portion of a former course (RRES 310) and reformatting it into a series of 1 hour courses.

IMPACT: No impact on other departments.

EFFECTIVE DATE: Spring 2015

Wildlife and Outdoor Enterprise Management

ADD: RRES 561. Waterfowl Hunting and Guiding and Wetlands Management (3) I. This course explores the natural history of waterfowl and wetland birds and habitat management. It includes basic information on the habitat requirements, management techniques, ranges, migration patterns, history, problems, diseases, and identification of the waterfowl resources of North America. Professional principles and practices associated with hunting waterfowl species in North America to include: ethics, laws, species' habitat requirements, and daily and seasonal

activities of each species, methods of harvest, dog handling, post-harvest handling and clientele interactions. Includes the following success skills: Communicates Effectively and Maintains Professional Skills and Attitudes. Two one hour lectures and one two hour lab per week. K-State 8: Ethical Reasoning and Responsibility and Natural and Physical Sciences.

RATIONALE: This course expands the offerings for Wildlife and Outdoor Enterprise majors to complement the more general courses in the major.

IMPACT: No impact on other departments.

EFFECTIVE DATE: Spring 2015

RATIONALE: In the communications elective block in all 6 of the ASI options, the English department contacted Animal Sciences & Industry and recommended that due to revisions made in ENGL 300 they felt that ENGL 417 and ENGL 510 better fit the writing objectives for our students than ENGL 300. The Animal Sciences & Industry Department agrees with this assessment.

IMPACT: We do not anticipate an increased impact on the English Department.

Total hours required for graduation (126 credit hours)				Total hours required for graduation (126 credit hours)			

RATIONALE: In the communications elective block in all 6 of the ASI options, the English department contacted Animal Sciences & Industry and recommended that due to revisions made in ENGL 300 they felt that ENGL 417 and ENGL 510 better fit the writing objectives for our students than ENGL 300. The Animal Sciences & Industry Department agrees with this assessment.

IMPACT: We do not anticipate an increased impact on the English Department.

EFFECTIVE DATE: Fall 2014

B.S. in Agriculture: Animal Sciences and Industry: Business Option

Total hours required for graduation (126 credit hours)				Total hours required for graduation (126 credit hours)			

RATIONALE: In the communications elective block in all 6 of the ASI options, the English department contacted Animal Sciences & Industry and recommended that due to revisions made in ENGL 300 they felt that ENGL 417 and ENGL 510 better fit the writing objectives for our students than ENGL 300. The Animal Sciences & Industry Department agrees with this assessment.

IMPACT: We do not anticipate an increased impact on the English Department.

EFFECTIVE DATE: Fall 2014

---	---

RATIONALE: In the communications elective block in both of the FDSCI options, the English department contacted Animal Sciences & Industry and recommended that due to revisions made in ENGL 300 they felt that ENGL 417 and ENGL 510 better fit the writing objectives for our students than ENGL 300. The Food Science faculty and the Animal Sciences & Industry Department agree with this assessment.

IMPACT: We do not anticipate an increased impact on the English Department.

EFFECTIVE DATE: Fall 2014

B.S. in Food Science and Industry
Science Option

---	--

RATIONALE: In the communications elective block in both of the FDSCI options, the English department contacted Animal Sciences & Industry and recommended that due to revisions made in ENGL 300 they felt that ENGL 417 and ENGL 510 better fit the writing objectives for our students than ENGL 300. The Food Science faculty and the Animal Sciences & Industry Department agree with this assessment.

IMPACT: We do not anticipate an increased impact on the English Department.

EFFECTIVE DATE: Fall 2014

RATIONALE: These changes are a curriculum update to better reflect the intention of the Meat Science Certificate.

IMPACT: No impact on other departments.

EFFECTIVE DATE: Fall 2014

Undergraduate Curriculum Deletions

Horticulture, Forestry, and Recreation Resources

DROP: Bachelor of Science in Agriculture, Park Management and Conservation Interpretation Option

RATIONALE: PMC faculty propose these changes to better meet new accreditation standards and to provide both breadth and depth for students to specialize within the one overarching curriculum. This is accomplished by consolidating the four options into only one. This is presented as a change for one option and concurrent drop of the other 3.

IMPACT: No new impacts outside the department because courses in the newly formatted curriculum had already been approved and included, for example, as “Recommended Electives” in the previous four specialization curricula.

EFFECTIVE DATE: Spring 2015

DROP: Bachelor of Science in Agriculture, Park Management and Conservation Law Enforcement Option

RATIONALE: PMC faculty propose these changes to better meet new accreditation standards and to provide both breadth and depth for students to specialize within the one overarching curriculum. This is accomplished by consolidating the four options into only one. This is presented as a change for one option and concurrent drop of the other 3.

IMPACT: No new impacts outside the department because courses in the newly formatted curriculum had already been approved and included, for example, as “Recommended Electives” in the previous four specialization curricula.

EFFECTIVE DATE: Spring 2015

DROP: Bachelor of Science in Agriculture, Park Management and Conservation Recreation Business Option

RATIONALE: This proposed change simply updates the curriculum for programmatic intent to include new courses.

IMPACT: No major impacts expected for other departments. Students are already taking GEOG 300 and PSCYH 110 and substituting these courses in the curriculum.

EFFECTIVE DATE: Spring 2015

College of Technology & Aviation, K-State Salina (3-21-14)

NON-EXPEDITED COURSE PROPOSALS

Courses Numbered 000-599

Department of Aviation

Primary Contact Person: Barney King, Aviation Department

Phone: 785-826-2683

Email: Kingb@ksu.edu

ADD: **AVT 300. UAS Powerplant Fundamentals.** (3) Fall. A study of the principles of operation, design features, and operating characteristics of various powerplants used in unmanned aircraft vehicles. Includes inspection procedures and operational theory of current electric, piston, hybrid, and turbine propulsion systems. Two hours lec. and three hours lab a week.

K-State 8:

- Ethical Reasoning and Responsibility
- Natural and Physical Science

RATIONALE: This upper-division course is needed to provide additional experience with powerplant fundamentals for a future degree option related to unmanned aircraft systems. It is a derivative of the course AVM 321 Powerplant Fundamentals and has been fine tuned for a future proposal degree option.

IMPACT: Addition of this class does not impact any other department.

EFFECTIVE DATE: Fall 2014

ADD: **AVT 318. Composites I Laboratory.** (1) Fall. An optional laboratory course introducing the use of equipment and materials utilized in the advanced composites industry. Two hours lab a week. Coreq.: AVT 317.

K-State 8:

- None

RATIONALE: This course adds an optional laboratory class to AVT 317 Composites I. This class will allow practical hands on activities to enhance familiarization and learning of the materials, equipment and processes discussed during lecture.

IMPACT: No impact on any other department.

EFFECTIVE DATE: Fall 2014

Department of Engineering Technology

Primary Contact Person: Saeed Khan, Engineering Technology

Phone: 785-826-2677

E-mail: saeed@ksu.edu

ADD: **ETB 480. UAS Senior Design I.** (1) Fall. Application of UAS principles and design methodology to solving a significant design problem in a team context. Includes determining customer requirements, exploring and choosing design alternatives, scheduling, and project management. Significant milestones are the project's conceptual, preliminary, and critical design reviews, which require written and oral presentations. One hour lec. a week.

K-State 8:

- None

RATIONALE: Provides the first segment of a capstone experience for a future degree option related to an Unmanned Aircraft Systems option in Engineering Technology.

IMPACT: The Engineering Technology and Aviation departments have collaborated on the development of this course to offer in a future proposal adding an option in Engineering Technology - Unmanned Aircraft Systems.

EFFECTIVE DATE: Fall 2014

ADD: **ETB 481. UAS Senior Design II.** (2) Spring. A continuation of ETB 480. Includes the implementation, testing, and delivery of the project initiated in ETB 480 UAS Senior Design I. Significant milestones are the project prototype, design report, and final presentation. Four hours lab a week. Pr.: ETB 480.

K-State 8:

- None

RATIONALE: Provides the second segment of a capstone experience for a future degree option related to an Unmanned Aircraft Systems option in Engineering Technology.

IMPACT: The Engineering Technology and Aviation departments have collaborated on the development of this course to offer in a future proposal adding an option in Engineering Technology - Unmanned Aircraft Systems.

EFFECTIVE DATE: Fall 2014

College of Education (3-25-14)

Undergraduate New Courses School of Leadership Studies

LEAD 510. Foundations of Community-Engaged Leadership. (3) I. This course integrates leadership theory and practice exploring principles, purposes, and processes of community engagement and democratic practice. Utilizing service-learning methods, students will partner with community to consider and examine foundational forms of civic and public life. Community paradigms will be explored and deconstructed in relation to course themes.

IMPACT: There is no negative impact to any college, department or unit. All relevant departments have been contacted and report no objections.

RATIONALE: This is the first of three core courses in the Community-Engaged Leadership certificate program. The course provides the foundational knowledge of community engagement.

EFFECTIVE DATE: Fall 2014

LEAD 520. Approaches to Community-Engaged Leadership. (3) II. Through theory and practice, students consider the ethical dimensions of leadership in relation to community systems, organizations, and institutions. Students will deconstruct concepts of community-engaged leadership including race, class, gender, justice, and power. Through service-learning, students will work with partners to understand community systems, organizations, and institutions. Pre-Requisite: LEAD 510.

IMPACT: There is no negative impact to any college, department or unit. All relevant departments have been contacted and report no objections.

RATIONALE: This is the second of three core courses in the Community-Engaged Leadership certificate program. This course explores the approaches to community engagement from a systems perspective.

EFFECTIVE DATE: Fall 2014

LEAD 560. Experiences in Community-Engaged Leadership. (6) II. In this capstone experience students design, plan, execute, and evaluate a community-engaged research project. The project will be consistent with the principles of community engagement and the purposes and process of democratic practice. Students will exercise leadership with community partners to build capacity for systemic change. Pre-Requisite: LEAD 510 and LEAD 520.

IMPACT: There is no negative impact to any college, department or unit. All relevant departments have been contacted and report no objections.

RATIONALE: This is the third and final core course in the Community-Engaged Leadership certificate program. This course applies methods of community engagement primarily through community-based research.

EFFECTIVE DATE: Fall 2014

IMPACT: Mutual discussion with the Department of Political Science has been held and this change has been agreed upon.

RATIONALE: In discussing course offering changes with the Department of Political Science, it would be appropriate and in line with candidate preparation to make the following changes to our program.

EFFECTIVE DATE: Fall 2014

Non-Expedited
Undergraduate New Certificate
School of Leadership Studies

FROM:

TO:

	<u>REQUIREMENTS FOR COMMUNITY-ENGAGED LEADERSHIP CERTIFICATE</u>
	LEAD 510: Foundations of Community-Engaged Leadership.....(3)
	LEAD 520: Approaches to Community-Engaged Leadership.....(3)
	LEAD 560: Experiences in Community-Engaged Leadership(6)
	TOTAL = (12)

IMPACT: There is no negative impact to any college, department or unit. All relevant departments have been contacted and report no objections.

RATIONALE: The School of Leadership Studies at Kansas State University has partnered with Points of Light to offer students a 12-credit hour undergraduate leadership certificate program. Points of Light is the world’s leading volunteer organization with more than 20 years of history and a bipartisan presidential legacy, the mission of which is “to inspire, equip and mobilize people to take action that changes the world.” The academic certificate program we propose cultivates a model of leadership consistent with principles of partnership: reciprocity, mutual benefit, and exchange of knowledge and resources. With Points of Light’s purpose of citizen empowerment and support of an “open public sector that sustains and enlivens democratic processes,” it brings to the partnership with the School of Leadership Studies, and to the students who participate in the certificate, a well-developed national network of community partners essential to this effort.

This is a Stand Alone certificate. Each course in this certificate program will be delivered using an interactive online and real-time learning platform. Service-learning teaching methods are intentionally integrated within each course. The academic components of the program are delivered by the School of Leadership Studies at Kansas State University; Points of Light will leverage its national service and volunteer network to place students with community partners

across the country. The community engagement component of this program places students and community members at the center of developing partnerships. This program will not only assess student-learning outcomes in relation to the purposes and process of democratic engagement, but will begin to develop assessment frameworks that measure community impact and community learning.

There are currently no similar undergraduate certificate programs that are offered in a distance format. The few programs with similar goals and objectives are place-based (for residential students) and offered to a select group of students mainly at private institutions (such as Emory University's minor in Community Building and Social Change). Offering this curriculum in this way provides access, removing or lowering geographic and/or financial barriers to students throughout the United States.

The Association for Public and Land Grant Universities and the Association for the American State Colleges and Universities announced a series of ambitious goals to increase retention and degree completion by 2025, as has Kansas State University. Research suggests that students who participate in courses with a service-learning or community engagement component are more likely to be retained, persist, and achieve higher learning outcomes. In addition to these student learning outcomes, community-engaged scholarship represents the potential to elicit positive community impact that is consistent with the land-grant tradition.

EFFECTIVE DATE: Fall 2014

College of Arts and Sciences (4-3-14)

NON-EXPEDITED COURSE PROPOSALS

Courses Numbered 000-599

Art

ADD: ART 404 – Minor in Art-Capstone. (0) I, II. Students prepare an essay explaining their program of study in their particular minor, reflecting on how their classes cohered and met the core objectives within Art. Taken in conjunction with the last three credit hours in the 18-hour minor in Art. Pr.: 15 credits of Art that fulfills the ART minor. Co-Req: Final 3 credits of Art for the Art Minor.

RATIONALE: This course is needed for the Art Minor as a vehicle for students to hand in their reflection paper on the minor. The students will sign up for this course in conjunction with their last 3 credits in the minor.

IMPACT: None

EFFECTIVE DATE: Fall 2014

Biology

FROM: BIOL 340 – Structure and Function of the Human Body. (8) I, II. Anatomy and physiology of the organ systems of the human body. Laboratory includes physiology experiments, study of anatomy from human cadavers, dissection experience, x-rays, and slide work. Note: Five hours lecture and two three-hour lab sessions a week. Pr.: ~~Cumulative GPA of 2.75 or better; BIOL 198 taken at K-State (with a B grade or better) or transferred introductory biology credit plus at least one of the following introductory natural sciences courses, taken at K-State, with a B grade or better: CHM 110 (with CHM 111), CHM 210, PHYS 113, or any K-State biology course that has BIOL 198 as a prerequisite.~~

TO: BIOL 340 – Structure and Function of the Human Body. (8) I, II. Anatomy and physiology of the organ systems of the human body. Laboratory includes physiology experiments, study of anatomy from human cadavers, dissection experience, x-rays, and slide work. Note: Five hours lecture and two three-hour lab sessions a week. Pr.: Cumulative GPA of 3.0; CHM 110/CHM111, CHM 210, or CHM 230 (or transfer equivalent); BIOL 198 taken at K-State (with a B or better) or transferred biology class plus at least one of the following introductory courses taken at K-State, with a B grade or better: CHM 110/111, CHM 210, or 230; PHYS 113, PHYS 213, or any K-State biology course that has BIOL 198 as a prerequisite. Sophomore standing.

RATIONALE: These changes in requirements will give the students a better understanding of the minimum background information needed and the level of understanding required to do well in this class.

IMPACT: Human Ecology

EFFECTIVE DATE: Spring 2015

Chemistry

ADD: CHM 316 – Environmental Science: A Chemistry Perspective Laboratory. (1) I. A laboratory course to supplement the material of CHM 315. Three hours lab per week. CoR: CHM 315. K-STATE 8: Natural and Physical Sciences.

K-State 8 RATIONALE: The students will make observations and hand on quantitative measurements of chemical and physical phenomena relevant to environmental science.

RATIONALE: A laboratory class supplementing the material covered in class in CHM 315 – Environmental Science: a Chemistry Perspective would provide students with hands on experience in the chemical measurements discussed in the course. It will enhance learning through active experimentation, allowing for direct observation of many chemical and physical phenomena covered in the course.

IMPACT: None

EFFECTIVE DATE: Fall 2014

History

ADD: HIST 516 – The Modern Middle East. (3) I, II, S. History of Islam and the broader Middle East including North Africa since 1500. Topics covered include the rise of early modern empires, closer contact with Western Europe and East Asia, the impact of Western imperialism, state-sponsored defensive reforms, the development of religious modernism, social movements and constitutionalism, the emergence of nationalism, oil-dependent economies and rentier states, the origins of religious activism, and the contemporary struggle for civil rights. Pr.: Sophomore standing recommended. K-State 8: Historical Perspectives; Global Issues and Perspectives.

K-State 8 RATIONALE: The course provides students with a historical perspective on a region of global importance.

RATIONALE: This course is intended to serve as a critical introduction to the History of Islam, the Middle East and North Africa since 1500. It permits more thorough and detailed exploration of the history of this region in the modern period than is possible in HIST 112 (World History from 1450). The course will also fill a serious gap in the History Department's existing upper level course offerings. There is currently no history course described in the catalog with the Middle East, North Africa or Islam as its primary focus.

IMPACT: None

EFFECTIVE DATE: Fall 2014

ADD: HIST 517 – Iranian People Since Antiquity. (3) I, II, S. Critical introduction to the history, geography, society, politics, economy and culture of Iran (historical Persia) from prehistoric times to the present day. Pr.: Sophomore standing recommended. K-State 8: Historical Perspectives; Global Issues and Perspectives.

K-State 8 RATIONALE: The course provides students with a historical perspective on a region of global importance.

RATIONALE: This course is intended to serve as a critical introduction to the history of the Iranian plateau from antiquity to the modern period. It permits more thorough and detailed exploration of the history of this region in West Asia than is possible in the survey-level World History class. The course will fill a gap in the department's existing upper-level course offerings on this important region.

IMPACT: None

EFFECTIVE DATE: Fall 2014

ADD: HIST 584 – France and its Empire, 1815-Present. (3) I, II, S. Emphasis on the development of French democracy and France's place in the world. Covers the world wars and French imperialism as well as social and gender change in French history. Pr.: Sophomore standing recommended. K-State 8: Historical Perspectives; Global Issues and Perspectives.

K-State 8 RATIONALE: The course provides a historical perspective on a region of global importance.

RATIONALE: This class restores coverage of modern French history to the department's offerings, complementing and completing our sequence of courses in French history.

IMPACT: No impact, though may be of interest to French majors and minors who may be interested in modern French history and culture.

EFFECTIVE DATE: Fall 2014

Music, Theatre, and Dance

ADD: MUSIC 281 – West African Drumming and Percussion. (2) I, II. Explores several styles of drumming and african xylophone playing from the Ga, Dagara, and Ewe traditions from Ghana and other parts of West Africa. Instruction includes but is not limited to playing techniques and musical structure for drumming and xylophone playing as associated with common recreational dances. No prior experience is necessary. All musical instruments are supplied for class. Students may use their own instruments. K-State 8: Aesthetic Interpretation.

RATIONALE: To enhance the music environment and the university experience by diversifying the curriculum with world music styles, thus offering additional world music experiences otherwise not available to this campus community.

IMPACT: None

EFFECTIVE DATE: Fall 2014

ADD: THTRE 275 – Script Analysis. (3) I, II. Examination of the play script to develop a common vocabulary and method for analyzing a script. K-State 8: Aesthetic Interpretation.

K-State 8 RATIONALE: While managers in the theatre are involved in business practices, they must also be very aware and sensitive to the artistic product they are promoting and facilitating, as well as ways to translate the artists' message and communicate it to the public.

RATIONALE: Theatre students need to know how to read a script, how to take it apart into its separate components, and then understand how all the parts relate back to each other. While they each have specific individual aspects of a script they focus on as an actor, director, designer, or manager, this course will teach students a method for approaching script analysis so everyone in the department is speaking the same "language" as well as understanding of how each area of the theatre uses it in different ways. Please note that Script Analysis is a different process entirely than Dramatic Structure which is about genres of plays, styles or dramatic theories.

IMPACT: None

EFFECTIVE DATE: Fall 2014

ADD: THTRE 366 – Fundamentals of Theatre Management. (3) I, II. Non-profit theatre management, including budgeting, marketing, box office, and development practices, plus examination of relevant history. K-State 8: Aesthetic Interpretation; Empirical and Quantitative Reasoning.

K-State 8 RATIONALE: While managers in the theatre are involved in business practices, they must also be very aware and sensitive to the artistic product they are promoting and facilitating, as well as ways to translate the artist's message and communicate it to the public.

RATIONALE: The exploration of the areas of management in the theatre: marketing, box office, front of the house, and business management. Includes examination of relevant history and technology in these areas. This area at the basic introductory level has not been available to our majors and faculty felt that it needs to be added to our core requirements.

IMPACT: None

EFFECTIVE DATE: Fall 2014

ADD: THTRE 599 – Senior Seminar. (3) I, II. Students in their final year of study will develop skills for professional presentation and create a portfolio or audition based on the standards developed for the URTA National Unified Auditions/Interviews.

RATIONALE: Theatre students in their final year of study need to prepare for entry into the theatre profession. Students will create a culminating presentation dependent upon their concentration of study of either a portfolio or audition based on the standards developed for the URTA National Unified Auditions/Interviews.

IMPACT: None

EFFECTIVE DATE: Fall 2014

Philosophy

FROM: PHILO 125 – Introduction to Philosophy of Science. (3) I, II. Examines the nature of science and how it differs from pseudo-sciences such as astrology, and raises questions about the nature of reality and social value of science. K-State 8: Empirical and Quantitative Reasoning.

TO: PHILO 125 – Introduction to Philosophy of Science. (3) I. II. Examines the nature of science and how it differs from pseudo-sciences such as astrology, and raises questions about the nature of reality and social value of science. K-State 8: Empirical and Quantitative Reasoning; Ethical Reasoning and Responsibility.

RATIONALE: An “E--Ethical Reasoning and Responsibility” K-State 8 tag should be added for this course because a significant portion of this course is dedicated to exploring ethical issues in the pursuit and application of science. For example, this course explores such questions as whether it is ethical to pursue certain scientific questions, what the ethical obligations of scientists are regarding gender in science, and the application of science in the public sphere. A major goal of the course is to provide students an understanding of the roles of values in scientific inquiry and testing. For example, this course typically includes some discussion of type I and type II errors and explores how different values and ethical considerations for prioritizing the avoidance of one type of error over another would justify different choices of experimental design and test. This course typically also discusses the values inherent in the choice of statistical inference methods, e.g. the choice between maximal likelihood and Bayesian methods often involves value commitments embedded in the purpose of the model (prediction, prediction under intervention, or convergence to the truth) and in the assumptions one is entitled to make in setting priors. Hence, the course concerns moral and other normative questions about scientific practice, about the social practices of scientists, and about the products of scientific work.

IMPACT: None

EFFECTIVE DATE: Fall 2014

Sociology, Anthropology, and Social Work

ADD: ANTH 301 – Initiation to Anthropology. (3) I. Identify and apply the core elements of the anthropological perspective while learning professional and academic writing and presentation skills. Pr.: Declared Anthropology Major/Minor or Instructor Permission. K-State 8: Social Sciences.

RATIONALE: After carefully assessing our program and surveying our current majors, minors, and alums, we concluded that our program needs improvement in 3 areas: 1. Career advising and preparation, 2. Research opportunities for undergraduates, and 3. A stronger sense of community among majors and minors. We designed ANTH 301 as a required course as students enter the major/minor to immediately ground them in the anthropological perspective and to connect them with students, alumni and faculty who can offer career guidance and opportunities.

K-STATE 8 RATIONALE: Students will learn and apply core elements of the anthropological perspective, including qualitative ethnographic field methods.

IMPACT: None

EFFECTIVE DATE: Spring 2015

ADD: ANTH 333 – Plagues: The Co-Evolutionary History of Humans and Pathogens. (3) I, even years. ANTH 333 (“Plagues: Humans & Pathogens”) will explore the proximate (mechanistic/physiological) and ultimate (evolutionary) causes of disease from a biocultural and historical perspective. K-STATE 8: Natural and Physical Sciences; Historical Perspectives.

RATIONALE: To date, there is no class offered at Kansas State University that explores the coevolution of humans and disease. This is a relevant class as it teaches evolutionary principles and disease from an anthropological and historical perspective. As a 300-level class, ANTH 333 will provide students with the knowledge and the critical capacity to understand the interactions between humans and pathogens in the past as well as today.

K-State 8 RATIONALE: Plagues will carefully review the principles of evolutionary biology as they apply to the co-evolution of humans and pathogens. Evolutionary theory is central to the understanding of the evolution of life, and natural systems. Thus, this class fulfills the natural and physical sciences K-State-8 area description. In addition, the class reviews the coevolution of humans and pathogens within a historical context. As such, the class allows students to study and understand how past events have affect the course of this co-evolution. Historical knowledge of the conditions that have led to changes in disease patterns among human populations will allow the students to contextualize past and present epidemics.

IMPACT: Biology 330 (Public Health Biology) covers the “Fundamental concepts of human infectious and organic diseases with emphasis on disease etiology and mechanisms, collection of epidemiological data, and the influences upon, and consequences of, governmental public health policy”. However, BIOL 330 focuses on immediate (non-evolutionary) causes of diseases and public health policy. In contrast with that class, Plagues emphasizes the evolutionary causes of disease, and the relation between humans and pathogens from an evolutionary, historic, and anthropological perspective. Plagues does not review public health, or public health policy which is at the core of BIOL 330.

EFFECTIVE DATE: Fall 2014

Basic requirements are to be fulfilled with courses chosen by students in consultation with their advisor. The requirement in the humanities enables students to appreciate and understand creative and conceptual human endeavor.</p> <p>The requirement in the social sciences improves the student's ability to analyze and understand human social systems. The requirement in the natural sciences develops the student's knowledge of the principles of scientific method as they are applied in the life and physical science.</p> <p>Up to two courses from one department may be used to fulfill the distribution requirements for humanities and the social sciences. They may be used at the same time to count towards the student's major. No course may be used to satisfy more than one specific requirement for humanities and social sciences. Only courses taken for 2 or more credit hours satisfy these requirements; courses in excess of 5 credit hours count as two courses.</p> <p>At least 120 credit hours are required for graduation.</p> <p>Humanities</p>

--	--

RATIONALE: The courses (ENVD 210 and ENTOM 301) already meet the learning outcomes and the overarching goals of an Arts and Sciences degree. Moreover, when students transfer such courses from other institutions, we count them toward A&S degrees, but do not count such courses when offered by other colleges within our own university. Making this change would help students from other colleges fulfill the requirements in Arts & Sciences, if they change their major, and help dual degree candidates streamline their general requirements.

IMPACT: Architecture, Planning and Design and Agriculture

EFFECTIVE DATE: Fall 2014

Biochemistry and Molecular Biophysics

B.A. in Biochemistry, Medical Biochemistry Track

http://catalog.k-state.edu/preview_program.php?catoid=13&pooid=3316&returnto=1321

FROM:

Biochemistry seeks to understand the molecular events of life processes. It applies chemical and physical techniques to elucidate the structure and organization of molecules, particularly macromolecules that are responsible for the structural organization as well as operation and control of all cellular processes. The emerging knowledge has broad importance and consequences for all areas of the life sciences.

Bachelor's degree requirements
General requirements for undergraduate major: A total of 120 credit hours are required for graduation. The BA program, Medical Track, is obtained by following the curriculum of the College of Arts and Sciences.

To graduate, a student must have a grade of C or better in all science and mathematics courses required for the degree, including transfer courses, as specified below. In addition, to graduate a student must have a 2.2 GPA in required science and mathematics courses taken at K-State.

BIOCH 110 - Biochem & Society Credits: (3)

BIOCH 521 - Gen Biochemistry Credits (3)
BIOCH 522 - Gen Biochemistry Lab Credits (2)
BIOCH 571 - Medical Biochemistry Credits: (3)
~~BIOCH 756 - Biochem I Lab Credits (2)~~
~~BIOCH 757/758/766/767 - Biochem II Lab Credits (2)~~

RATIONALE: This is a non-expedited curriculum change. Biochemistry and Molecular Biophysics (BMB) seeks to modify the existing B.A.degree in Biochemistry, Medical Biochemistry Track. This program was created in 2012 to provide a framework for students who require specialized training in biochemistry in preparation for careers in medicine or related fields. BMB faculty designed the program following recommendations of the American Association of Medical Colleges (AAMC) and the American Society of Biochemistry and Molecular Biology (ASBMB). We propose some changes after more internal discussions and consultations with Dr. Susan Watt, pre-Health advisor of the College of Arts & Sciences. Dr. Watt pointed out that in its current form the requirement for MATH 221 (Calculus II) dissuades many pre-med/pre-vet students from selecting the major. Her advice concurs with the conclusions of the AAMC and the ASBMB, and our revision substitutes other classes more relevant to future careers in health professions (statistics, biochemistry or research). Dr. Watt also advised the addition of BIOL 670 (Immunology) to the plan, which we endorse. Additional discussions with Dr. Gary Gadbury, head of Statistics lead us to eliminate STAT 701 in favor of STAT 340 (Biometrics I) and the option of STAT 341 (Biometrics II). The proposal therefore involves the following overall modifications:

- change the requirement for STAT 701 to STAT 340 (Biometrics I; 3 credits)
- eliminate the requirement for MATH 221 (Calculus II; 4 credits), and instead require one of the three following classes in its place: STAT 341 (Biometrics I; 3 credits), BIOCH 755 (Biochemistry I; 3 credits) or BIOCH 799 (Biochemistry Research; 3 credits).
- add the requirement of BIOL 670 (Immunology; 3 credits).
- remove the requirements for Biochemistry I and II Laboratories (BIOCH 756; 2 credits, BIOCH 757; 2 credits). Their inclusion was a typographical error in the original submitted documentation, and not approved by faculty vote.

IMPACT: The changes potentially involve additional enrollment in STAT 340 (Biometrics I), and STAT 341, as one of three possible alternatives to MATH 221. BMB currently has 85 undergraduate majors, so we do not expect a dramatic increase in STAT 340/341: assuming one-third of these students elect to take it, in any individual year its enrollment may increase by ~10 students. The proposed changes also requires BIOL 670, but most pre-medical students already take this class, so we anticipate little impact on its enrollment. Aside from these ramifications we do expect that changes will affect other units.

EFFECTIVE DATE: Fall 2014

B.S. in Biochemistry, Medical Biochemistry Track

http://catalog.k-state.edu/preview_program.php?catoid=13&poid=3317&returnto=1321

Add:

Biochemistry seeks to understand the molecular events of life processes. It applies chemical and physical techniques to elucidate the structure and organization of molecules, particularly macromolecules that are responsible for the structural organization as well as operation and control of all cellular processes. The emerging knowledge has broad importance and consequences for all areas of the life sciences.

Bachelor's degree requirements

General requirements for undergraduate major:

A total of 123 credit hours are required for graduation. The BS program, Medical Track, is obtained by following the curriculum of the College of Arts and Sciences.

To graduate, a student must have a grade of C or better in all science and mathematics courses required for the degree, including transfer courses, as specified below. In addition, to graduate a student must have a 2.2 GPA in required science and mathematics courses taken at K-State.

BIOCH 110 Biochem & Society Credits (3)

BIOCH 521 - Gen Biochemistry Credits (3)
BIOCH 522 - Gen Biochemistry Lab Credits (2)
BIOCH 571 - Medical Biochemistry Credits: (3)
BIOCH 755 Biochemistry I Credits: (3)#
BIOCH 765 Biochemistry II Credits: (3) #

BIOL 198 - Principles of Biology Credits: (4)
BIOL 450 Modern Genetics Credits: (4)
BIOL 455 General Microbiology Credits: (4)
BIOL 541 Cell Biology Credits: (3)
BIOL 670 Immunology Credits: (4)

CHM 210 - Chemistry I Credits: (4)
CHM 230 - Chemistry II Credits: (4)
CHM 371 - Chemical Analysis Credits: (4)
CHM350 Gen Org Chem Credits: (3)
CHM351 Gen Org Lab Credits: (2)

MATH 220 - Analytic Geometry and Calculus Credits: (4)

PHYS 113 - General Physics I Credits: (4)
PHYS 114 - General Physics II Credits: (4)

STAT 340 Biometrics I Credits (3)
STAT 341 Biometrics II Credits (3)

*Upper-division biochemistry, chemistry, biological science, statistics, computer science, analytical geometry and calculus III, or differential equations elective Credits: (20)

Students may take any 700- or higher-level 3-credit BMB classes as alternatives to BIOCH 755 and BIOCH 765.

Note: The courses above satisfy the mathematics and natural science requirements shown in the general requirements for the BS degree.

A&S requirements Credits (32)

Total hours required for graduation (123 credit hours)

RATIONALE: This is a non-expedited curriculum change. Biochemistry and Molecular Biophysics (BMB) seeks to create a B.S. degree in Biochemistry, Medical

Biochemistry Track. A Medical Biochemistry B.A. degree was created in 2012 to provide a framework for students who require pre-veterinary, pre-medical, pre-dental or pre-nursing training prior to pursuing those advanced degrees. We propose to add the B.S. program after more internal discussions and consultations with Dr. Susan Watt, pre-Health advisor of the College of Arts & Sciences. Dr. Watt pointed out that the requirements of the existing B.A. degree plan for MATH 221 (Calculus II) and Level 4 Foreign Language dissuade most pre-med/pre-vet students from selecting the major. This application will create a B.S. program that eliminates MATH 221 and the Level 4 language requirement, in favor of classes more relevant to future health professions (additional classes in statistics, biochemistry and/or research). The proposed changes are consistent with the recommendations of the American Association of Medical Colleges (AAMC) and the American Society of Biochemistry and Molecular Biology (ASBMB). Dr. Watt suggested inclusion of BIOL 670 (Immunology) in the plan, which we endorse, and Dr. Gary Gadbury, head of Statistics, advised us to replace STAT 701 with STAT 340 (Biometrics I) and STAT 341 (Biometrics II). Relative to the B.A. in Medical Biochemistry, the B.S. degree plan has the following overall modifications:

- eliminate the requirement for Calculus II (MATH 221; 4 credits), and instead require more comprehensive statistics (replaces STAT 701 with STAT 340 and STAT 341, Biometrics I & II), as well as more classes in biochemistry (BIOCH 755 and BIOCH 765; Biochemistry I and II;) and Immunology (BIOL 670; 3 credits).
- the B.S. degree plan does not contain a requirement for Level 4 language
- remove the requirements for Biochemistry I and II Laboratories (BIOCH 756; 2 credits, BIOCH 757; 2 credits). Their inclusion was a typographical error in the original submitted documentation, and not approved by faculty vote.

IMPACT: The changes potentially involve additional enrollment in STAT 340/341 (Biometrics I/II). BMB currently has 85 undergraduate majors, so we do not expect a dramatic increase in STAT 340/341 numbers: assuming one-third of these students elect to take it, in any individual year enrollment in either class may increase by ~10 students. The proposed change also requires BIOL 670 (Immunology), but most pre-medical students already take this class, so we anticipate little impact on its enrollment. Aside from these ramifications we do expect that changes will affect other units.

--	--

RATIONALE: Approximately half of our Chemical Science majors are dual majors. These students require more practical training related to their future careers. The Instrumental Analysis course and Physical Methods laboratory currently offered in the curriculum provide fundamental or theoretical training. Addition of the Environmental Science course and its laboratory would allow these students the option to choose more practical training with an emphasis on environmental chemistry.

Sociology, Anthropology, and Social Work

Anthropology BA/BS

FROM:

TO:

Entrance requirements for anthropology majors

Students interested in becoming anthropology majors should consult with faculty advisors. To be admitted as an anthropology major, a student must present evidence of having earned a cumulative GPA of at least 2.5 based on a minimum of 12 credit hours earned at K-State. Pre-anthropology majors will be advised in the program.

Students transferring from other institutions with a GPA of 2.5 or higher will be accepted as majors when they have fulfilled the above requirements.

To graduate with a bachelor's degree in anthropology, a student must fulfill program requirements and have a cumulative GPA of 2.5 or higher on all anthropology course work undertaken at Kansas State University.

Bachelor's degree requirements

In addition to the general BA or BS requirements, anthropology majors take a minimum of ~~30~~ hours in anthropology as follows:

Introductions to the four subfields (~~12~~ credit hours)

- ANTH 200 – Introduction to Cultural Anthropology Credits: (3)
- or
- ANTH 204 – A General Education Introduction to Cultural Anthropology Credits: (3)
- or

Bachelor's degree requirements

In addition to the general BA or BS requirements, anthropology majors take a minimum of 34 hours in anthropology as follows:

Introductions to the four subfields (13 credit hours)

- ANTH 200 – Introduction to Cultural Anthropology Credits: (3)
- or
- ANTH 204 – A General Education Introduction to Cultural Anthropology Credits: (3)
- or

- ANTH 210 – Introduction to Cultural Anthropology, Honors **Credits:** (4)
- ANTH 220 – Introduction to Linguistic Anthropology **Credits:** (3)
- ANTH 260 – Introduction to Archeology **Credits:** (3)
- ANTH 280 – Introduction to Biological Anthropology **Credits:** (4)

Advanced electives (15 credit hours)

-
- Five advanced electives distributed among three or more subfields.
 - 15 hours at or above the 300 level. At least 9 of these must be at or above the 500 level.
 - Students are strongly encouraged to include at least one methods course:
 - ANTH 777 – Research Methods in Digital Ethnography **Credits:** (3)
 - ANTH 678 – Archaeological Laboratory Methods **Credits:** (3)
 - ANTH 679 – Archaeological Field Methods **Credits:** (3)
 - ANTH 694 – Osteology **Credits:** (3)
 - and
 - ANTH 695 – Laboratory in Osteology **Credits:** (1)
 - ANTH 730 – Field and Laboratory Techniques in Archaeology **Credits:** (1–9)
 - ANTH 792 – Field Methods in Linguistics **Credits:** (3)

Capstone course

-
- ANTH 602 – Anthropological Theory **Credits:** (3)

- ANTH 210 – Introduction to Cultural Anthropology, Honors **Credits:** (4)
- ANTH 220 – Introduction to Linguistic Anthropology **Credits:** (3)
- ANTH 260 – Introduction to Archeology **Credits:** (3)
- ANTH 280 – Introduction to Biological Anthropology **Credits:** (4)

Initiation to Anthropology Course

- ANTH 301: Initiation to Anthropology Credits: (3)

---	---

RATIONALE: After carefully assessing our program and surveying our current majors, minors, and alums, we concluded that our program needs improvement in 3 areas: 1. Career advising and preparation, 2. Research opportunities for undergraduates, and 3. A stronger sense of community among majors and minors. We designed ANTH 301 as a required course as students enter the major/minor to immediately ground them in the anthropological perspective and to connect them with students, alumni and faculty who can offer career guidance and opportunities.

In addition, there was a minor error in which our Intro courses are listed as 12 hours when in fact they total 13 due to the required lab for ANTH 280 (a 4 credit class).

RATIONALE: POLSC 115 – US Politics offers relevant content for social workers and the program wishes it to also fulfill our Political Science requirement (in addition to 301 and 110). Presently, the Dean’s Office approves this course when we ask them to; we hope to change this in the catalogue so that continual contact with and requests of the Dean’s office are not necessary. In addition, it will provide our majors and transfer students’ additional options for social science requirements.

IMPACT: Political Science

College of Engineering (4-3-14)

Non-Expedited COURSE PROPOSALS
Courses Numbered 000-599

Computing and Information Sciences

Change: CIS 101 - Introduction to Computing Systems, ~~Information Search, and Security~~ (1). Introduction to ~~basic computer and Internet security including basic computer security and privacy issues, computer networks, malware protection; effective use of the Internet as a resource including website evaluation and effective search tools and techniques.~~

Note

One hour lecture, ~~two hours scheduled laboratory,~~ and two hours unscheduled open laboratory each week. Course meets in one contiguous block of ~~four~~ weeks.

Requisites

None

When Offered

Fall, Spring, Summer

To: CIS 101 - Introduction to Computing Systems (1). Introduction to computer hardware, securing your system, networking, understanding application and system software, and effective use of the Internet as a resource including website evaluation and use of search tools and techniques.

Note

One hour lecture and two hours unscheduled open laboratory each week. Course meets in one contiguous block of eight weeks.

Requisites

None

When Offered

Fall, Spring, Summer

Rationale: Current course description not reflective of the current content of the course. Course has also been shifted from a 4-week course to an 8-week course to allow better coverage of the content of the course. Students were struggling to complete the course

work within such a short time frame. Current Course title also needs to be truncated since "Information Search, and Security" are no longer objectives of the course.

Effective: Fall 2014

Impact: The following heads of the affected departments were officially notified of the change from a four week to eight week format in March of 2013. Changes were not implemented until the Fall 2013 semester.

- Barbara Anderson - Apparel, Textiles, and Interior Design
- Kenneth G. Odde - Animal Sciences and Industry
- Stacy Kovar – Business Administration*
- Alison Wheatley – Arts & Sciences

*This course is no longer required by Business Administration. It serves only as an optional prerequisite for some of the required courses.

Change: CIS 102 - Introduction to Spreadsheet Applications (1). Designing, building, ~~and~~ modifying spreadsheets. ~~Addressing techniques and formatting.~~ Use of formulas ~~and~~ functions. ~~Spreadsheets as management and decision tools. Charting of data.~~

Note

One hour lecture, ~~two hours scheduled laboratory,~~ and two hours unscheduled open laboratory each week. Course meets in one contiguous block of ~~four~~ weeks.

Requisites

None.

When Offered

Fall, Spring, Summer

To: CIS 102 - Introduction to Spreadsheet Applications (1). Designing, building, modifying and formatting spreadsheets. Use of formulas, functions and charts. Editing document properties and printing. Using large spreadsheets as management, decision and goal seeking tools.

Note

One hour lecture and two hours unscheduled open laboratory each week. Course meets in one contiguous block of eight weeks.

Requisites

None.

When Offered

Fall, Spring, Summer

Rationale: Current course description requires minor modification to reflect current content of the course. Course has also been shifted from a 4-week course to an 8-week course to allow better coverage of the content of the course. Students were struggling to complete the course work within such a short time frame.

Effective: Fall 2014.

Impact: The following heads of the affected departments were officially notified of the change from a four week to eight week format in March of 2013. Changes were not implemented until the Fall 2013 semester.

- Barbara Anderson - Apparel, Textiles, and Interior Design
- Kenneth G. Odde - Animal Sciences and Industry
- Stacy Kovar – Business Administration*
- Alison Wheatley – Arts & Sciences

*This course is no longer required by Business Administration. It serves only as an optional prerequisite for some of the required courses.

Change: CIS 103 - Introduction to Database Applications (1). Design, create, modify, and maintain relational databases. ~~Create relationships. Add and modify data. Search and query database. Design and create screen forms and reports.~~

Note

One hour lecture, ~~two hours scheduled laboratory,~~ and two hours unscheduled open laboratory each week. Course meets in one contiguous block of ~~four~~ weeks.

Requisites

None.

When Offered

Fall, Spring, Summer

To: CIS 103 - Introduction to Database Applications (1). Design, create, modify, and maintain relational databases. Creating and modifying tables, relationships, queries, and forms. Add and modify data to the tables. Database backup and recovery. Search, sort and query database. Database maintenance.

Note

One hour lecture and two hours unscheduled open laboratory each week. Course meets in one contiguous block of eight weeks.

Requisites

None.

When Offered

Fall, Spring, Summer

Rationale: Current course description requires minor modification to reflect current content of the course. Graduate Council (4-1-14)

Non-Expedited Course Changes

<p>MANGT 623 Compensation and Performance Management Credits: (3) An in-depth critique of compensation system design and performance management strategies needed to attract, retain, develop and motivate the human capital required for organizational effectiveness and strategic success.</p> <p>Requisites: Prerequisites: Mangt 531.</p> <p>When Offered: Spring</p>	<p>MANGT 623 Compensation and Performance Management Credits: (3) An in-depth critique of compensation system design and performance management strategies needed to attract, retain, develop and motivate the human capital required for organizational effectiveness and strategic success.</p> <p>Requisites: Prerequisites <u>or concurrent:</u> Mangt 531.</p> <p>When Offered: Spring</p>
---	--

Rationale: Changing the pre-requisites to allow Mangt 623 to be taken concurrently with Mangt 531 will enable students to complete all courses needed for the HRM emphasis in the Management major in a timely manner.

Impact on Other Units: None

Effective Date: Fall 2014

<p>POLSC 650 – Not-For-Profit Management. (3) Unique management issues in terms of policy setting, participation, and accountability of non-profit organizations. Pr.: Senior or Graduate Standing.</p>	<p><u>POLSC 740 – Nonprofit Financial Management. (3) I. Introduction to the major issues in nonprofit management. Highlights the unique nature of the nonprofit sector with government (public) and business (for-profit) sectors. Issues may include governance roles and responsibilities, ethics and risk management, financial management and resource generation, managing staff and volunteers, performance measurements, and the emerging trends that threaten nonprofits' tax-exempt status. Pr.: Graduate Student Standing.</u></p>
--	---

RATIONALE: Course name and number changes better reflect course content and student level at which course is directed.

IMPACT: None

EFFECTIVE DATE: Fall 2014

Non-Expedited New Courses

Course Add
KIN 614 Physical Activity Behavior Settings: Youth Sport to Senior Centers
Credits: (3)
The course is a study of key physical activity behavior settings across life-span development. Topics include observation of social and physical environmental variables, surveillance of physical activity in behavior settings, motivational theory and responses, setting interventions and developmental outcomes, and intervention evaluation methods.
When Offered: Spring
Pre-Requisite: KIN 310 and KIN 345 with grades of C or higher
K-State 8 TAG: Social Sciences
K-State 8 TAG Rationale: Covers the social science of physical activity.

Rationale: This course extends the 600 level offerings for public health physical activity emphasis. Students will learn how to develop effective physical activity interventions in the community.

Impact (i.e. if this impacts another unit): None

Effective: Spring 2015

MANGT 643 – Staffing Organizations

Credits: (3) This course focuses on recruitment, selection, and retention issues, including an in-depth consideration of legal and practical issues involved in the acquisition and retention of human resources, including detailed coverage of job analysis, criterion development, recruitment strategies, and techniques and procedures for ensuring valid and effective selection of employees.

Requisites: Prerequisite or concurrent: MANGT 531.

When Offered: Fall

Rationale: Adding a staffing course will improve the preparation of our HRM emphasis students in the Management major. This addition will bring our HRM curriculum into strong compliance with the recommendations of recent national HRM curricular studies (which included students, business professionals, and academics) and the main HRM professional association (Society of Human Resource Management).

Impact on Other Units: None.

Effective Date: Fall 2014

ADD: ART 621 – Advanced Concepts in Lens-Based Media. (3) I, II. Introduction to various lens-based media and interdisciplinary practices related to the medium of photography. Pr.: ART 395, 563. K-State 8: Aesthetic Interpretation.

RATIONALE: This course will allow a wider range of practices such as video, installation and other contemporary extension of photographic practices.

IMPACT: None

EFFECTIVE DATE: Fall 2014

ADD: GEOL 760 – Geochemical and Biogeochemical Modeling. (3) I. Use of geochemical modeling to examine geochemical and biogeochemical processes in aqueous environments. Pr.: CHM 210, CHM 230 (or CHM 220, CHM 250), GEOL 605. K-STATE 8: Natural and Physical Sciences; Empirical and Quantitative Reasoning.

RATIONALE: The Department of Geology seeks to add the course “Biogeochemical Modeling” to its curriculum. The course will provide students with valuable training that is currently unavailable on campus. Students in the course will use geochemical modeling techniques to analyze and simulate complex geochemical systems. In doing so, they will develop in-depth knowledge of geochemical processes and acquire marketable skills that will promote future career opportunities in academia, industry, and government. In addition, inquiry-based learning exercises used throughout the course will greatly enrich the students’ understanding of advanced topics in geochemistry and biogeochemistry.

IMPACT: No other geochemical or biochemical modeling courses are offered at K-State. The course, therefore, does not duplicate the course offering of any other department or unit. However, the course could enhance curricula available to students in other departments, including Biology, Civil Engineering, Agronomy, and Geography.

EFFECTIVE DATE: Fall 2014

ADD: POLSC 608 – Political Participation in the United States. (3) II. A broad overview of the various tools of democracy; public opinion, political parties, interest groups, and elections. K-State 8: Social Sciences; Historical Perspectives. Pr.: POLCS 110 or POLSC 115 or junior standing.

RATIONALE: In an effort to aid in the development of politically aware and active citizens we are combining an exposure to the various tools of democratic politics in a single course. The specific tools available for participation in democratic politics include public opinion, voting and elections, political parties, and interest groups. Upon completion of this course students will understand and appreciate how they can better fulfill the political responsibilities of American citizens.

IMPACT: None

EFFECTIVE DATE: Fall 2014

ADD: POLSC 610 – Local Government Law. (3) I. Explores the dynamic relationship between states and cities. Major issues may include budget shortfalls, social issues, and sprawl. Focus on the legal framework of state and city powers, including the forms of government, state preemption, and home rule theory and practice. Pr.: POLSC 110 or POLSC 115 or junior standing. K-STATE 8: Social Sciences.

RATIONALE: State and local government laws and regulations impact the vast majority of our everyday decisions. A deeper knowledge of these laws and regulations will help out students to understand the applications and limitations of governmental powers relative to their POLSC professional and personal experiences.

IMPACT: None

EFFECTIVE DATE: Fall 2014

ADD: POLSC 702 – Public Administration and Society. (3) I. Introduction to the discipline and profession of public administration, which may include the cultural, constitutional, institutional, organizational, and ethical context of public administration. Introduction to central issues facing public administrators, using the related perspectives of management, politics, and law. Pr.: POLSC 507.

RATIONALE: This course is a critical element in a broader restructuring of our Master of Public Administration curriculum which is designed to more closely map the skill sets required of public managers in the 21st century. This will be the first course taken by our students. It will introduce them to the general challenges confronted by public administrators in a democratic society.

IMPACT: None

EFFECTIVE DATE: Fall 2014

ADD: POLSC 736 – Strategic Management of Public Organizations. (3) II. Strategic management in the public sector of democratic societies. Provides a set of tools and research skills to focus thinking, judgment and decision making in order to act strategically. Pr.: POLSC 507 or POLSC 735.

RATIONALE: This course is a critical element in a broader restructuring of our Master of Public Administration curriculum which is designed to more closely map skill sets required of public managers in the 21st century. One such increasingly critical skill involves strategic thinking and management practices which refer to a set of tools that improve how public managers identify, plan and accomplish public purposes sustainably. This course has previously been offered under a topics (791) course number.

IMPACT: None

EFFECTIVE DATE: Fall 2014

ADD: POLSC 738 – Public Finance. (3) I. Economics of the public sector, addressing the fundamental issue of the appropriate role of government activity in a market economy. Behavioral consequences of government policy. Model construction to explain real world government policymaking. Pr.: POLSC 737.

RATIONALE: This course is a critical element in a broader restructuring of our Master of Public Administration curriculum which is designed to more closely map the skill sets required of public managers in the 21st century. More specifically, we are developing an emphasis in public budgeting and finance which includes this course along with our current course (POLSC 737) which is a more general and introductory exposure to these skills/topics. Prospective employers have assured us that this emphasis will function to enhance greatly the attractiveness of our graduates.

IMPACT: None

EFFECTIVE DATE: Fall 2014

Curriculum and Instruction

EDCI 729. Middle-Level Mathematics for Teachers. (3) I, S. This course reviews math concepts, problems and applications to help prepare teachers to pass the Middle School Mathematics Praxis Exam. The course helps teachers gain pedagogical content knowledge in relation to teaching mathematics.

IMPACT: The Math Department was contacted and they support our efforts.

RATIONALE: This course will form one of the core courses in the new Area of Emphasis in Mathematics Education for the Masters degree in Curriculum and Instruction. Recent reports have identified middle-level mathematics as the fourth largest area of need in the state of Kansas (KSDE, 2010). School districts, especially those in rural areas, identify their strongest elementary teachers and place those teachers in positions to teach at the middle level under a waiver. These teachers, while typically extremely knowledgeable in areas of pedagogy, are often weaker in mathematical content knowledge.

EFFECTIVE DATE: Fall 2014

EDCI 823. History of Mathematics Education. (3) I. This course will examine the issues and forces behind the evolution of mathematics education reform from 1820-present. Historical readings, mathematics curricula, analysis of political and social change, and research in both psychology and mathematics education will be analyzed to establish a foundation for understanding current reform efforts.

IMPACT: The Math Department was contacted and they support our efforts.

RATIONALE: This course will form one of the core courses in the new area of emphasis in mathematics education for the Masters degree in Curriculum and Instruction. Historically mathematics reform has been driven by multiple factors within the United States and abroad. Understanding these influential forces and their impact upon historical reform movements is essential for understanding contemporary reform movements. As the US enters another decade of dramatic reform in mathematics education, students will analyze motivations for the current reform and identify both social and political impacts upon the way public educators approach reform.

EFFECTIVE DATE: Fall 2014

EDCI 825. Research in Mathematics Teaching and Learning. (3) S. This course will focus on seminal and contemporary research in mathematics teaching and learning. Emphasis will be placed on (1) current trends in K-12 classrooms, (2) the relationship between curriculum and instruction to current mathematics education research, (3) critical analysis of research practices, (4) solving and analyzing problems, and (5) designing goals and outcomes for instructional strategies.

IMPACT: The Math Department was contacted and they support our efforts.

RATIONALE: This course will form one of the core courses in the new area of emphasis in Mathematics Education for the Masters degree in Curriculum and Instruction. Graduate students being prepared in Mathematics Education need to have a solid background in seminal research informing current changes in education. They need to have experience reading and analyzing research, linking reports of research to classroom teaching and learning, and synthesizing

research so that they can inform colleagues, make sound decisions, and conduct research of their own.

EFFECTIVE DATE: Fall 2014

EDCI 826. Contemporary Technologies in Mathematics Education. (3) I. The purpose of this class is to explore the theoretical implications of using technology as a tool for teaching mathematics in K-12 classrooms. The course content will focus on the continual evolution of technology and how this evolution can assist in the teaching and learning of mathematics.

IMPACT: The Math Department was contacted and they support our efforts.

RATIONALE: This course will form one of the core courses in the new area of emphasis in mathematics education for the Masters degree in Curriculum and Instruction. Technology has had a key impact on the teaching and learning of mathematics throughout history. Often schools provide teachers with technology-based professional development but this does not extend to the area of mathematics education. Exploration of the technology available for teaching and learning mathematics will enhance opportunities for K-12 teachers and students.

EFFECTIVE DATE: Fall 2014

EDCI 827. Theoretical Models of Mathematics Teaching and Learning. (3) II (even years). This course will focus on the theories of learning, which provide a foundation for the standards for mathematical practice. The course will specifically address historical and contemporary theories related to mathematics teaching and learning.

IMPACT: The Math Department was contacted and they support our efforts.

RATIONALE: This course will form one of the core courses in the new area of emphasis in Mathematics Education for the Masters degree in Curriculum and Instruction. In order to understand mathematics education, graduate students need to have a foundation in theoretical models of mathematics teaching and learning. They need to have an opportunity to become knowledgeable about the principal theoretical models that have informed educators and education reforms.

EFFECTIVE DATE: Fall 2014

EDCI 828. Assessment in Mathematics Education. (3) S (even years). This course will provide participants with assessment tools necessary to enhance learning for diverse student populations. The course will explore ways to document student performance and progress for instructional and accountability purposes. Participants will become familiar with quantitative and qualitative concepts and practices used to evaluate student learning in the classroom.

IMPACT: The Math Department was contacted and they support our efforts.

RATIONALE: This course will form one of the core courses in the new Area of Emphasis in Mathematics Education for the Masters degree in Curriculum and Instruction. For assessment to be meaningful it must be done thoughtfully and systematically. When done effectively, it can

help teachers assess the degree to which their students understand and what adjustments need to be made to instruction. How teachers use assessment techniques to refine their teaching and improve instruction is complex. This course focuses on assessment will enable teachers to continue to expand their knowledge of this growing field.

EFFECTIVE DATE: Fall 2014

Horticulture, Forestry, and Recreation Resources

ADD: PMC 710. Rural Tourism and Sustainable Development. (3) I. This course will explore the obstacles and opportunities of using ecotourism and agritourism to contribute to rural economic development. Examples of successful ecotourism projects both domestically and internationally will be presented with an emphasis on the role of National Parks as tourism destinations. Agritourism efforts in Kansas will be highlighted and compared to similar efforts in other states and countries. Principles of attracting and managing tourists and park visitors in a sustainable manner also will be covered.

RATIONALE: This content is lacking in our curriculum and adding this course helps us meets accreditation standards set forth by the National Recreation and Park Association. Also we currently offer no graduate level courses and this first course would begin to address that void.

IMPACT: No impacts outside the department.

EFFECTIVE DATE: Spring 2015

Non-Expedited Curriculum Changes

Food Science Program

General Graduate Records Examination (GRE) scores are required of all applicants.

FROM:

TO:

Are there any special requirements for international students?

International students must submit the following:

- TOEFL score of at least 577 (paper), 233 (computer), 90 (IBT), 7.0 (IELTS) or evidence of a degree from a U.S. university
- ~~GRE scores~~
~~NOTE: A minimum GRE score of 1000 between the verbal and quantitative is required. A GRE score of at least 425 on the verbal section must be achieved.~~
- Complete financial form and evidence of financial support for their entire graduate training
- Ensure sections 1, 2, and 3 are filled out completely on the affidavit. It must include the official bank seal and signature of the bank official. A certificate of deposit or a bank statement is not acceptable to fulfill this requirement.

Are there any special requirements for international students?

International students must submit the following:

- TOEFL score of at least 577 (paper), 90 (IBT), 7.0 (IELTS) or evidence of a degree from a U.S. university
- **Graduate Record Examination (GRE) General Test scores are required.**
- Complete financial form and evidence of financial support for their entire graduate training
- Ensure sections 1, 2, and 3 are filled out completely on the affidavit. It must include the official bank seal and signature of the bank official. A certificate of deposit or a bank statement is not acceptable to fulfill this requirement.

RATIONALE:

The GRE selective requirements for international applicants to the program was determined to be discriminatory and thus this was removed. The Food Science Graduate Program Coordinating Committee thought that it would be helpful to have GRE scores for all applicants. The GRE scores will provide some metrics on the quality of incoming students and may be helpful for students with low grades. No minimum scores will be required. This will not be a burden on applicants as almost all Food Science programs in the USA required that GRE scores be a part of the application process.

EFFECTIVE DATE: Fall 2014

Department of Hospitality Management and Dietetics

PhD Specialization: Hospitality and Dietetics Administration

<p>Doctoral Degree Requirements</p> <p>The Ph.D. requires a minimum of 90 semester credit hours beyond the bachelor's degree, including 30 credit hours of dissertation research. The number of hours from a previously completed master's degree which may be counted toward the 90 hour requirement is decided by the student's supervisory committee and is reviewed by the chair of the College of Human Ecology Coordinating Committee and the Graduate School. A maximum of 30 hours may be transferred from a completed master's degree. A maximum of 9 credit hours can be transferred from graduate work completed after the master's degree at another accredited university. Doctoral students are required to pass both written and oral preliminary examinations prior to admission to candidacy.</p> <p>Doctor of Philosophy Course Requirements</p> <p>Major Area (Minimum of 60 Credit Hours)</p> <p>Ph.D. (900-level) Courses (12 Credit Hours)</p> <ul style="list-style-type: none"> • HMD 975 - Research and Applied Theories in Consumer Behavior in Foodservice and Hospitality Management Credits: (3) • OR • a 900-level or equivalent course • HMD 980 - Administration of Dietetics and Hospitality Programs Credits: (3) • HMD 985 - Advances in Foodservice and Hospitality Management Credits: (3) • HMD 995 - Grantsmanship and Publication Credits: (3) <p>Dissertation Proposal Seminar (1 Credit Hour)</p> <ul style="list-style-type: none"> • HMD 990 - Dissertation Proposal Seminar 	<p>Doctoral Degree Requirements</p> <p>The Ph.D. requires a minimum of 90 semester credit hours beyond the bachelor's degree, including 30 credit hours of dissertation research. --	--

Rationale: The graduate faculty has decided that ACCTG 810, Foundations of Accounting and Finance, should not be required for every student in the specialization. This course will become an elective course, and students will work with their major professor and committee to determine if the course is needed in their plan of study.

Impact: Department of Accounting. The accounting department has responded with approval of this change.

Effective: Fall 2014

CHANGES FROM ORIGINAL PROPOSAL:

The curriculum change for the Phd Specialization: Hospitality and Dietetics Administration was updated to reflect Statistics course changes by the Department of Statistics. STAT 704 which has been dropped and STAT 705 course title changed and credits increased to 3. As approved by Faculty Senate, February 11, 2014.

Political Science

Master of Public Administration

http://catalog.k-state.edu/preview_program.php?catoid=2&poid=443&returnto=159

FROM:

Offered through the Political Science graduate program, the Master of Public Administration degree is a professional degree for those who wish to hold administrative positions primarily in the public sector. This degree prepares individuals for administrative careers in a wide range of environments—international, national, sub-national, not-for-profit—by offering a program of study which is comprehensive, flexible, and interdisciplinary.

The program is committed to meeting the needs of both pre-service and in-service students. Pre-service students without administrative experience have enjoyed success in obtaining both valuable internships while pursuing their degree and challenging positions upon graduation. In-service students have found this program especially attractive since, through careful scheduling, courses required for the degree may be completed in the evenings.

Degree requirements (42 credit hours)

The degree requires 42 hours of graduate credit including core public administration courses, an area of specialization, electives, and, for pre-service students, an internship. Full-time students are normally able to complete the degree in two years. The core courses are designed to familiarize all students with the fundamentals of public administration. The six courses in this category are Research Methods, Public Personnel Administration, Policy Analysis and Evaluation, Public Organization Theory, Public Budgeting, and Capstone Seminar in Public Administration.

Each student is also required to develop an interdisciplinary area of specialization, such as budgeting and finance, personnel administration, planning, international and comparative administration, not-for-profit management, or state and local government. However, other areas of interest specific to individual students are met on a case-by-case basis under special circumstances with the advice of the director of the program.

Students also take two political science electives, one of which must be a seminar. This component of the curriculum helps students to gain a better

TO:

The Master of Public Administration (MPA) degree at Kansas State University prepares both mid and pre-career students to serve the public interest and establish themselves as civic leaders. The program emphasizes a theoretically informed and research driven skills based approach to learning designed to insure that our students develop specific competencies which prepare them for the challenges of work in the public and nonprofit sectors immediately upon graduation. Students are given a broad exposure to policy systems, political environments, administrative principals and research methods. Additionally, our students are required to think critically, apply knowledge and seek practical solutions to real world problems.

Degree requirements (pre-service students 40 credit hours, in-service students 39 credit hours)

For pre-career students lacking significant administrative experience the degree requires 40 hours of graduate credit including a one credit hour internship involving at least 400 hours of employment in an appropriate public or nonprofit setting. The one credit hour internship is not required of mid-career students with administrative experience. Full-time students are normally able to complete the degree in nine semesters – two and one-half years.

The curriculum of study for the Master of Public Administration program includes several elements. First, all students are required to take a group of core courses which will provide exposure to subject matter which all administrators must master. The courses in this category include: Public Administration and Society; Research Methods; Policy Analysis and Evaluation; Public Personnel Administration; Public Organization Theory; Public Budgeting; Public Finance; and, Public Administration Capstone. Second, students choose from a number of elective offerings designed for exposure to other matters of concern to practicing administrators such as administrative ethics, executive leadership challenges, strategic management of public organizations, administrative law, and nonprofit financial management. Third, students develop an area of administrative specialization such as public budgeting and finance, planning, security studies,

<p>appreciation of the political environment in which public administrators operate. Students may choose from an extensive range of graduate courses and advanced seminars regularly offered by the Department of Political Science.</p> <p>Pre-service students are required to complete an internship, involving a minimum of ten weeks of fulltime employment in an administrative capacity. This may involve appointments with public or not-for-profit sector employers.</p>	<p><u>and, state and local government. Finally, pre-career students are required to complete an internship involving a minimum of ten weeks of fulltime employment in an administrative capacity with either a public or not-for-profit sector employer.</u></p>
---	--

RATIONALE: The Political Science faculty and the MPA faculty, with input from the MPA program’s various stakeholders, have formulated a series of changes in the requirements associated the MPA degree program. These changes are designed to serve our students better by providing a greater range of those professional skills required of successful public managers in the 21st century.

IMPACT: None

EFFECTIVE DATE: Fall 2014

Department of Kinesiology

Change From:	Change To:
<p>Kinesiology (M.S.)</p> <hr/> <p>Admission Students entering the Kinesiology graduate program must satisfy a minimum number of undergraduate competencies. These competencies are often satisfied with an undergraduate degree in kinesiology. Students without an undergraduate degree in kinesiology may be required to complete additional undergraduate coursework. Application procedures require (1) a completed graduate application form, (2) transcripts from all universities and colleges attended, (3) scores on the aptitude portion of GRE examination, (4) three letters of reference, and (5) a statement outlining professional goals and areas of special interest. Application for admission to the program in the fall semester should be made in the preceding late fall or early winter. Applications are also accepted for the spring semester.</p> <p>Master's degree program The Department of Kinesiology offers a master of science degree. Students may emphasize exercise physiology/pathophysiology, or public health physical activity. The M.S. degree in kinesiology requires a minimum of 30 hours for students completing a master's thesis option and 36 hours for students completing a course work option. The specific program of study, designed by the student and supervisory committee, is tailored to meet the individual needs and interests of the student. A maximum of 12 hours of supporting work in other departments may be applied toward the degree. All students are expected to demonstrate a depth and breadth of understanding of kinesiology in a written and/or oral final evaluation.</p> <p>Thesis Option Requirements</p> <p>Research Core</p> <ul style="list-style-type: none"> • KIN 815 - Research Methods in Kinesiology Credits: (3) • STAT 703 - Introduction to Statistical Methods for the Sciences Credits: (3) <p>Kinesiology Core</p> <ul style="list-style-type: none"> • KIN 800 - Advanced Physiology of Exercise Credits: (3) 	<p>Kinesiology (M.S.)</p> <hr/> <p>Admission Students entering the Kinesiology graduate program must satisfy a minimum number of undergraduate competencies. ---	--

Rationale: There are two proposed changes in the curriculum of the MS program in Kinesiology. 1) Consolidation of two previously required courses in the Kinesiology Core, KIN 800 Advanced Exercise Physiology and KIN 830 Advanced Public Health Physical Activity, into one required and already approved course, KIN 801 Physical Activity: Physiology to Public Health Impact. 2) Strengthening the statistical experience for students participating in the thesis option from a single course STATS 703 to an additional course STAT 705, and elimination of STATS 702 since the Statistics Dept. no longer offers that course. Students in the coursework plus examination option would still be required to take STATS 703. STAT 705, which will be a 3 credit class, awaits final approval by Faculty Senate. (Faculty Senate approved the STAT 705 course change as of February 11, 2014).

Impact : Slight increase in annual enrollment for STAT 705. These changes are acceptable to the Statistics Department.

Effective Term: Fall 2014

School of Family Studies and Human Services

M.S. Personal Financial Planning Specialization

CHANGE FROM	CHANGE TO
<p>Personal Financial Planning – (M.S.)</p> <p>The Family Studies and Human Services department offers a Master of Science degree in Family Studies and Human Services with a specialization in personal financial planning. The inter-institutional master’s degree program in personal financial planning and the graduate certificate program in personal financial planning draw on the expertise of graduate faculty and graduate courses from seven universities, members of the Great Plains IDEA, a consortium of major Midwestern universities. The Internet-based personal financial planning curriculum lets you do course work at convenient times for you. Upon completion of the master’s degree curriculum, students are eligible to sit for the Certified Financial Planner certification examination.</p> <p>These courses in personal financial planning and counseling enable you to:</p> <ul style="list-style-type: none"> • Enhance your personal financial knowledge • Complete a master’s degree from any of the participating universities • Develop competencies that may lead to professional certification by CFP Board <p>This program consists of 42 semester credit hours. Students typically complete the program in three years while employed full time. Students who participate in full-time study can shorten the time to degree completion.</p> <p>K-State Degree Program</p> <p>All students applying to the master’s in personal financial planning program at K-State will complete the first six courses leading to completion of the K-State Personal Financial Planning Graduate Certificate. All courses are required for the master’s degree, and upon completion of the certificate portion of the program, students are eligible to sit for the CFP Certification</p>	<p>Personal Financial Planning – (M.S.)</p> <p>The School of Family Studies and Human Services offers a Master of Science degree in Family Studies and Human Services with a specialization in Personal Financial Planning. Students automatically flow into the Great</p>

Examination. Students automatically flow into the Great Plains IDEA upon successful completion of the graduate certificate in personal financial planning.

For additional information, please visit the Personal Financial Planning website at: <http://www.ipfp.k-state.edu/>.

FSHS 624 - Fundamentals of Financial Planning **Credits:** (3)

FSHS 766 - Insurance Planning **Credits:** (3)

FSHS 762 - Investment Planning **Credits:** (3)

FSHS 760 - Family, Employment Benefits and Retirement Planning **Credits:** (3)

FSHS 772 - Personal Income Taxation **Credits:** (3)

FSHS 764 - Estate Planning **Credits:** (3)

FSHS 836 - Case Studies **Credits:** (3)

~~FSHS 850 - Family System **Credits:** (3)~~

FSHS 675 - Field Study in Family Economics **Credits:** (3), **must be taken twice**

FSHS 756 - Financial Counseling **Credits:** (3)

FSHS 835 - Professional Practice in Financial Planning **Credits:** (3)

~~FSHS 709 - Family Economics **Credits:** (3)~~

~~FSHS 758 - Housing/ Real Estate in FFP **Credits:** (3)~~

Plains IDEA upon successful completion of the graduate certificate in personal financial planning.

After completing 27 credits (9 courses) of required course work (Fundamentals, Insurance, Investments, Personal Income Taxation, Retirement Planning, Estate Planning, Case Studies, Financial Counseling, and Financial Theory and Research I) the remaining 9 credits (3 courses) provide preparation for defending an M.S. case study report (Option A) or an M.S. research thesis (Option B).

For additional information, please visit the Personal Financial Planning website at: <http://www.ipfp.k-state.edu/>.

Required Coursework (27 credits):

FSHS 624 - Fundamentals of Financial Planning **Credits:** (3)

FSHS 766 - Insurance Planning **for Families Credits:** (3)

FSHS 762 - **Investing for the Family's Future Credits:** (3)

FSHS 760 - Families, Employment Benefits & Retirement Planning **Credits:** (3)

FSHS 772 - Personal Income Taxation **Credits:** (3)

FSHS 764 - Estate Planning **for Families Credits:** (3)

FSHS 836 - **Financial Planning Case Studies Credits:** (3)

FSHS 756 - Financial Counseling **Credits:** (3)

FSHS 702 - Financial Theory and Research I Credits: (3)

Electives Coursework (9 credits):

(Option A)

FSHS 675 - Field Study in Family Economics **Credits:** (3)

FSHS 835 - Professional Practices in **Family** Financial Planning **Credits:** (3)

FSHS 704 - Seminar in Family Studies and Human Services Credits: (3)

(Option B)

FSHS 899 - MS Research in Family Studies and Human Services (var.) (6 hrs. required)

Choose one from:

FSHS 802 - Financial Theory and Research II Credits: (3)

Or

FSHS 806 - Statistical Methods in Family Studies and Human Services I Credits: (3)

	<u>Or</u> STAT 703 – Introduction to Statistical Methods for the Sciences Credits: (3).
--	---

Rationale: The M.S. in FSHS with specialization in Personal Financial Planning of the Great Plains Interactive Distance Education Alliance consortium (GPIDEA) prepares students to take the exam for Certified Financial Planner certificant status. The GPIDEA consortium has decided that, to remain competitive in an expanding market of online CFP course preparation programs, will require reducing the number of credits from 42 to 36. Additionally, to take advantage of GPIDEA faculty strengths, the proposed revision adds a thesis option that focuses on financial theory and research.

Impact: None

Effective: Fall 2014

Non-Expedited New Curriculum - College of Education

Area of specialization in Mathematics Education for the Masters degree in Curriculum and Instruction

FROM

No area of specialization is currently offered.

TO:

G9-Mathematics Education

This area of specialization is designed for teachers who wish to further their understandings of mathematics curriculum, content, and pedagogy. Courses are designed to provide a contemporary perspective on teaching mathematics in K-12 schools.

Select 15 hours from the following courses:

- EDCI 729 Middle Level Mathematics for Teachers (3)
- EDCI 821 Advanced Methods in the Teaching of K-12 Mathematics (3)
- EDCI 823 History of Mathematics Education (3)
- EDCI 825 Research in Mathematics Teaching and Learning (3)
- EDCI 826 Contemporary Technologies in Mathematics Education (3)
- EDCI 827 Theoretical Models in Mathematics Teaching and Learning (3)
- EDCI 828 Assessment in Mathematics Education (3)
- EDCI 886 Seminar in Mathematics Education (3)

Or other courses approved by the advisor. These hours may include up to six hours from the KSU Math Department (e.g., MATH 591, MATH 791)

IMPACT: The Math Department was contacted and they support our efforts.

RATIONALE: The Department of Curriculum & Instruction currently provides students the opportunity to seek a Master’s degree with a specialization in eight areas. However, mathematics education is not currently included as a specialization. This is a proposal to add an area of specialization in mathematics education.

Given the increasing emphasis on mathematics as a core curriculum area, the mathematics education faculty in the COE are seeking support to develop a new area of emphasis in Mathematics Education for the Masters degree in Curriculum and Instruction. The area of emphasis will focus on six new core mathematics education courses which will provide a foundation for deepening student understanding of mathematics education.

While the current pool of certified mathematics teachers is sufficient to meet the demands placed upon the profession due to retirement, many early career teachers are leaving the field. This places greater demand on the teacher supply. In a recent study Ingersol (2012) suggested data showed that one of the reasons why teachers were leaving the field following their first year was

directly correlated to mathematics education preparation. Current licensure requirements vary from state to state but are generally tied to a passing score on a content test. Therefore, a teacher with a degree in mathematics can simply successfully pass a mathematics content test to receive licensure. While these teachers typically have strong mathematical backgrounds, they have little to no experience in the pedagogy of mathematics.

Reports have identified middle-level mathematics as the fourth largest area of need in the state of Kansas (KSDE, 2010). School districts, especially those in rural areas, identify their strongest elementary teachers and place those teachers in positions to teach at the middle-level under a waiver. These teachers, while typically extremely knowledgeable in areas of pedagogy, are often weaker in mathematical content knowledge.

This proposal creates an online sequence of courses addressing foundational concepts in mathematics education which not only constitute a specialization as a part of the Master's program in the College of Education, but also meet the needs of teachers and districts in the state of Kansas who seek to target deficiencies in the area of mathematics teaching and learning.
