**ADD:** **BUS 410. Managerial and Project Economics.** (3) Fall. Economic analysis of problems as applied to managerial decision making. Students consider the economic viability of solutions in engineering and a variety of other kinds of projects common in technology-oriented businesses. Pr.: MATH 100. Same as MET 410.  
K-State 8: Social Sciences

**RATIONALE:** This course was part of the Construction Engineering Technology program that was discontinued. However, it is also a recommended elective for Technology Management and Engineering Technology degrees. Course enrollment has not been meeting minimum standards.

Modification of the course description and cross-listing it with the Engineering Technology Department MET 410 course should assist in increasing enrollment.  
NOTE: The EXPEDITED proposal to change CET 410 to MET 410 is being processed separately.

**IMPACT:** Cross-listing has been agreed upon between the Department of Engineering Technology and the Department of Arts, Sciences, and Business.

**EFFECTIVE DATE:** Fall 2014

**Posthumous Degree Request – College of Human Ecology**

**December 2014**

Adrienne Orel, Bachelor of Science

Background: Ms. Orel was not enrolled at the time of her death. However, she had been enrolled until her illness progressed to the point where it was no longer possible for her to continue (and enrolled for two semesters after that but had to withdraw each time as she was physically unable to complete her classes).
