## College of Agriculture (11-6-14)

## Non-expedited Course Changes (599 and below)

Agricultural Communications and Journalism

FROM: AGCOM 550. Internship in Agricultural Communications. Ind (1-3). (Fall, Spring, Summer) The intern works in a professional capacity in areas such as print journalism, electronic media, advertising, photography, and public relations. Student is supervised by a professional and a faculty member. One hour of credit for each four weeks of supervised work. Internship report and presentation required.

TO: AGCOM 550. Internship in Agricultural Communications. Ind (1-3). (Fall, Spring, Summer) The intern works in a professional capacity in areas such as print journalism, electronic media, advertising, photography, and public relations. Student is supervised by a professional and a faculty member. One hour of credit for each four weeks of supervised work. Internship report and presentation required. K-State 8: Ethical Reasoning and Responsibility

K-State 8 RATIONALE: Courses and experiences in ethical reasoning and responsibility should assist students in learning how to think through ethical dilemmas and make sound decisions when facing real-life situations. Student internships are completed at an agricultural or environmental communications employer with the guidance and mentoring of a communications professional. These work experiences place students in situations that require applying ethical standards on a daily basis. The work environment and office group dynamics introduce students to a variety of ethical perspectives and teach them multiple ways for resolving ethical dilemmas.

IMPACT: None.

EFFECTIVE DATE: Summer 2015

## Horticulture, Forestry and Recreational Resources

## Park Management and Conservation

ADD: PMC 116. Certified Interpretive Guide (CIG) Certification. (1). Spring. Students will
participate in the professional certification course offered by the National Association for Interpretation (NAI). Successful completion of this course will certify them as NAI Certified Interpretive Guides. This certification combines both the theoretical foundations of the profession with practical skills in delivering quality interpretive programming to visitors.

RATIONALE: The new course will contribute to meeting new program accreditation guidelines.

IMPACT: No impact on other departments.

EFFECTIVE DATE: Fall 2015

| ADD: | PMC 441. Topics in Park Management and Conservation (0-18) Fall, Spring, <br> Summer. Discussion of topics and activities of importance in park management <br> and conservation. Instructor permission required. |
| :--- | :--- |
| RATIONALE: $\quad$The prefix change is to align with the curriculum name and course number to <br> reflect that the course is taken late in student academic careers. One use of the <br> topics course is for students taking the National Park Service Certification, Law <br> Enforcement Ranger Academy, and the Law Enforcement Police Officer <br> Training academies. Total student enrollment in these academies is typically <br> small at any one time so the use of the problems course for these academies <br> alleviates the burden on the department for the continuous justification of low <br> enrollment in a course. The change of credit hours from 1-3 to 0-18 is needed to <br> provide flexibility for other topics and to recognize the increased length of the <br> academies by three more weeks. Some academic institutions are offering 24 <br> hours of credit for the same academy programs. Also, 9 hrs credit for students <br> not taking the optional 3hr (POST) Police Officers Standard Training, has been |  |
| problematic relative to financial aid and full time student status. |  |

EFFECTIVE DATE: Spring 2015

RATIONALE: We propose to rename this option "Communications and Marketing" and modify the curriculum choices and requirements to more appropriately reflect the career path options and preparedness for those careers. The addition of the term "marketing" to the title as well as additional Marketing courses added to the curriculum choices reflects the knowledge, skills, and insight gained through coursework in this option as related to oral and written communication about product description, promotion, advertisement, and distribution, for example. The modified option will be more flexible for students in preparing them for career paths with animal health or animal nutrition companies and (or) animal agriculture organizations who desire students with a technical background and understanding of animal agriculture industries and animal management with ability to positively influence customer sales and service and product recognition in the marketplace.
The changes in the Ag Requirements block better aligns this block with other options in the major and reduces problems that have been experienced finding hours to fill that block.

The Communications block had some concerns for our department. There was one course that was no longer being taught, there were no courses that directly taught students Adobe Creative Suite (important software programs for students seeking jobs in this area), and the block focused on journalism, with little room to take a number of courses in other avenues within Journalism and Mass Communications. On advice from the Department of Journalism and Mass Communications, we tried to find a way to make the option more flexible to students, allowing them to choose their own avenue of study (i.e. advertising, public relations, journalism, etc.). We've maintained the incorporation of the minor within the major, added flexibility within the MC courses and added a block to encourage students to take an additional communications course in either AGCOM, COMM or ENGL.

IMPACT: The Animal Sciences \& Industry Department has contacted the following departments: Marketing, Communications and Agricultural Education, and Journalism and Mass Communications.

EFFECTIVE DATE: FALL 2015

UNRESTRICTED ELECTIVES (7-12 credit hours)
Total hours required for graduation (126 credit
hours)
```

RATIONALE: The removal of SOCWK 612 from the curriculum is proposed because the course is no longer taught.

The removal of the MC 110-180 courses in the $2^{\text {nd }}$ communications block is proposed to require students in this curriculum to take a more writing intensive or oral communication intensive course.

The removal of MATH 100 from the quantitative studies block is proposed because MATH 100, College Algebra, is a prerequisite for MATH 205, General Calculus and Linear Algebra. In general students either transfer in College Algebra or often test to take MATH 205. If a student takes MATH 205, we do not require them to go back and take MATH 100 to meet the degree requirements. Removal of this course will clear up confusion and reduce variances.

The addition of GRSC 645, Pet Food Processing and GRSC 646, Pet Food Processing Laboratory to the processing elective block are proposed as these are new courses that meet the objective of a food science processing elective.

The change in the professional elective block from individually listing all of the courses within the departments to a range of course numbers is proposed so that the list includes new and future courses that meet the professional elective objective. This will also reduce the number of variances that are submitted.

The change in the business, management \& economics elective block from individually listing all of the courses within the departments to a range of course numbers is proposed so that the list includes new and future courses that meet the business, management, \& economics elective objective. This will also reduce the number of variances that are submitted.

IMPACT: We do not anticipate an impact on the Department of Journalism and Mass Communications as the number of food science students that take these courses would be minimal.

We do not anticipate an impact on the Department of Mathematics as the students that need to take MATH 100 before taking MATH 205 will still do so and those that test directly into MATH 205 already were not going back and taking MATH 100.

We have contacted the Department of Grain Science and Industry for approval of the addition of GRSC 645 \& 646.

We do not anticipate an impact to any departments with courses listed in the professional electives block or the business, management \& economics block as the Food Science \& Industry students are already taking these courses and variances are being used in they take any other courses not listed within those respective departments.
B.S. in Food Science and Industry:

PHYS 114 - General Physics II (4)
SOCWK 612 - Fund Comm for Ag & Food Sci (3)
UNRESTRICTED ELECTIVES (7-10 credit hours)
Total hours required for graduation (126 credit
hours)
```

RATIONALE: The removal of SOCWK 612 from the curriculum is proposed because the course is no longer taught.

The removal of the MC 110-180 courses in the $2^{\text {nd }}$ communications block is proposed to require students in this curriculum to take a more writing intensive or oral communication intensive course.

The removal of MATH 100 from the quantitative studies block is proposed because MATH 100, College Algebra, is a prerequisite for MATH 205, General Calculus and Linear Algebra. In general students either transfer in College Algebra or often test to take MATH 205. If a student takes MATH 205, we do not require them to go back and take MATH 100 to meet the degree requirements. Removal of this course will clear up confusion and reduce variances.

The addition of GRSC 645, Pet Food Processing and GRSC 646, Pet Food Processing Laboratory to the processing elective block are proposed as these are new courses that meet the objective of a food science processing elective.

The change in the professional elective block from individually listing all of the courses within the departments to a range of course numbers is proposed so that the list includes new and future courses that meet the professional elective objective. This will also reduce the number of variances that are submitted.

IMPACT: We do not anticipate an impact on the Department of Journalism and Mass Communications as the number of food science students that take these courses would be minimal.

We do not anticipate an impact on the Department of Mathematics as the students that need to take MATH 100 before taking MATH 205 will still do so and those that test directly into MATH 205 already were not going back and taking MATH 100.

We have contacted the Department of Grain Science and Industry for approval of the addition of GRSC 645 \& 646.

We do not anticipate an impact to any departments with courses listed in the professional electives block or the business, management \& economics block as the Food Science \& Industry students are already taking these courses and variances are being used in they take any other courses not listed within those respective departments.

RATIONALE: The Golf Course Management Option and the Sports Turf Option are being revised and combined into a single option that is renamed the Golf Course and Sports Turf Operations Option. This curriculum revision responds to industry, condenses and modernizes our programs in golf course and sports turf operations, provides more latitude within the specialization and updates course titles and numbers. Another goal is to simplify advising in the major.

IMPACT: Impacts outside the department include programs whose course enrollments may be affected by deletion from requirements or shifting from "Required" to "Elective." Departments offering FDSCI, and AGEC 513 have been contacted.

EFFECTIVE DATE: Fall 2015
B.S. in Agriculture: Horticulture Major: Landscape Horticulture Option

FDSCI 307 - Applied Meat/Poultry Microbiology (3)
FDSCI 601 - Food Microbiology Lab (2)
Select One
ASI 318 - Fundamentals of Nutrition (3)
HN 132 - Basic Nutrition (3)
Select 10 credit hours
FDSCI 695 - Quality Assurance of Food Products (3)
FDSCI 725 - Food Analysis (3)
or
FDSCI 727 - Chemical Methods of Food Analysis (2)
FDSCI 728 - Physical Methods of Food Analysis (2)
FDSCI 740 - Research and Development of Food Products (4)
GRSC 540 - Engineering Applications to Grain/Food Products (3)
GRSC 541 - Engineering Applications to Grain/Food Products Laboratory (1)
PROCESSING ELECTIVES (8 hours)
Must have processing electives_from at least 2 commodity areas - Dairy, Grain, Meat, or Fruit/Vegetables.
ASI 310 - Poultry and Poultry Product Evaluation (2)
ASI 350 - Meat Science (3)
ASI 361 - Meat Animal Processing (2)
ASI 370 - Principles of Meat Evaluation (2)
ASI 405 - Fundamentals of Milk Processing (3)
ASI 495 - Advanced Meat Evaluation (2)
ASI 608 - Dairy Foods Processing \& Technology (3)
ASI 610 - Processed Meat Operations (2)
ASI 640 - Poultry Products Technology (3)
ASI 671 - Meat Selection and Utilization (2)
ASI 776 - Meat Industry Technology (3)
ASI 777 - Meat Technology (3)
FDSCI 660 - International Study Experience in Food Science (0-6)
GRSC 101 - Introduction to Grain Science and Industry (3)
GRSC 150 - Principles of Milling (2)
GRSC 151 - Principles of Milling Lab (1)
GRSC 405 - Grain Analysis Techniques (2)
GRSC 602 - Cereal Science (3)

```
    GRSC 625 - Flour and Dough Testing (3)
    GRSC 635 - Baking Science I (2)
    GRSC 636 - Baking Science I Laboratory (2)
    GRSC 637 - Baking Science II (3)
    GRSC 638 - Baking Science II Laboratory (1)
    GRSC 645 - Pet Food Processing (3)
    GRSC 646 - Pet Food Processing Laboratory (1)
    HORT 325 - Introduction to Organic Farming (3)
PROFESSIONAL ELECTIVES (18 credit hours)
    ACCTG 231 - Accounting for Business Operations (3)
    ACCTG 241 - Accounting for Investing and Financing (3)
    AGCOM 400 - Agricultural Business Communications (3)
    AGCOM 590 - New Media Technology (3)
    AGCOM 610 - Crisis Communication (3)
    AGEC 120 - Ag Econ & Agribusiness (3)
    or
    ECON 120- Prin Micro Economics (3)
    AGEC-Any course between AGEC }202\mathrm{ and AGEC }68
    AGRON 335 - Environmental Quality (3)
    ASI-Any course between ASI }290\mathrm{ and ASI 777
    ATM 160 - Engineered Systems and Technology in Agriculture (3)
    ATM 450 - Sensors and Controls for Agricultural and Biological Systems (3)
    BIOL-Any course }300\mathrm{ level or above
    CIS-Any course between CIS 101 and CIS 105
    CHM-Any course between CHM 371 and CHM 752
    ECON 510 - Intermediate Macro Economics (3)
    ECON 520-Intermediate Microeconomics (3)
    ENGL 302 - Technical Writing-Salina (3)
    ENGL 417 - Written Comm for the Workplace (3)
    ENGL 510 - Intro to Professional Writing (3)
    ENGL 516 - Written Communication for the Sciences (3)
    FINAN 450 - Principles of Finance (3)
    FDSCI-Any course between FDSCI 430 and FDSCI 791
    GENAG 210 - Human and Cultural Diversity in Food and Agricultural Sciences (2)
    GENAG 505 - Comparative Agriculture (1-4)
    GENAG 711 - Occupational & Ag Health (3)
    GENAG }721\mathrm{ Occupational & Ag Safety & Health (3)
    GNHE 310 - Human Needs (3)
    GRSC-Any course between GRSC 101 and GRSC 745
    HMD 220 - Environmental Issues in Hospitality (3)
    HMD 341 - Principles of Food Production Management (3)
    HMD 442 - Introduction to Wines (1)
    HMD 643 - Food Writing (3)
    HN-Any course between HN }301\mathrm{ and HN 735
    HORT 325 - Introduction to Organic Farming (2)
    HORT 780 - Health Promoting Phytochemicals:Fruits and Vegetables (2)
    KIN 360 - Anatomy and Physiology (8)
    LEAD 212 - Introduction to Leadership Concepts (2)
    MANGT-Any course 300 level or above
    MKTG-Any course }400\mathrm{ level or above
    PHYS 114 - General Physics II (4)
    Modern Language - Any course in foreign language: ARAB, CHINE, FREN, GRM, ITAL, JAPAN, LATIN,
    PORT, RUSSN, SPAN, URDU
```

## Unrestricted Electives (7-11 credit hours)

```
Total hours required for graduation (126 credit hours)
**Courses in italics are offered online.
```

RATIONALE: Create a more Science-based option that can be taken by distance. The FDSCI Science option is an IFT (Institute of Food Technologists) approved program. IFT has not approved inclusion of the distance program. As a result, only the Business option is technically allowed for distance students. The objective is to create a more science-based curriculum that could serve distance students. It would also reduce the number of variances as several of these courses in our current option are not offered through distance.

IMPACT: Moving students to this option from the current options that are offered should not have an additional impact on other colleges or departments.

EFFECTIVE DATE: FALL 2015

## College of Engineering (11-6-14)

## Non-Expedited COURSE PROPOSALS -Courses Numbered 000-599

## Architectural Engineering and Construction Science and Management

## ADD:

New Course: ARE 295. Introduction to Building Systems (3). An introduction to building systems including: structural, electrical, mechanical, and plumbing. An emphasis will be made on the importance of these systems to the success of building function and operation. The course will not only expose the students to each system but the criticalness of integration between the systems as well as the architecture and construction of the facility.

Note: 3 hours recitation per week

## Requisites:

Prerequisite: CNS 220

## When Offered: Fall, Spring

Rationale: This is a new required course, early in the program, intended to introduce basic concepts related to building systems design within the context of architectural design and construction.
Retention is a key component.

## Impact: Internal to ARE/CNS

Effective Date: Fall 2016

## ADD:

New Course: ARE 421. Plan Reading \& Systems Communications (3). The integration of architectural, structural, mechanical, electrical and plumbing building systems, the impact of codes/standards on design, plan reading, and drawing creation.

Note: 9 hours lab per week

## Requisites:

Prerequisite: CNS 321

## When Offered: Fall, Spring

Rationale: This class provides an in depth study on the understanding of building construction documents and how they are to be read and understood, with a particular emphasis on the interconnectedness of the building systems supporting the architectural intent. The course lays the ground work for future design courses.

## Impact: Internal to ARE/CNS

Effective Date: Spring 2018

ADD:
New Course: ARE 460. ARE Professional Practice (3). General business, management and contractual procedures in professional practice. Personal development of skills needed to enter and be accepted in industry today.

Note: 3 hours recitation per week

## Requisites:

Prerequisite: Must be taken concurrent with ARE 551, ARE 552, ARE 553, and CE 537.

## When Offered: Fall, Spring

Rationale: This is a new course designed for students entering the portion of the curriculum that contains the primary building systems courses. The course will focus on professional practice, professional contractual relationships and responsibilities, engineering ethics, economic analyses, and student preparation for internship opportunities and career paths.

## Impact: Internal to ARE/CNS

Effective Date: Fall 2017

## ADD:

New Course: ARE 521. Computer Aided Architectural Engineering (2). An introduction to the use of computer software for the design and integration of building systems. The course is intended to complement and enhance the content of the concurrent system courses (Mechanical II, Electrical II, and Structures II). The computer software used will represent the standard practices of the building construction industry.

Note: 4 hours lab per week
Requisites: None

## When Offered: Fall, Spring

Rationale: This course will consolidate key aspects of computer aided design into one offering. Topics will include calculations, design, creation of drawings and the understanding of building informational modeling.

## Impact: Internal to ARE/CNS

Effective Date: Spring 2018

## ADD:

New Course: ARE 551. Electrical System 1 (3). An introduction and study of the basic human needs in lighting and lighting sources, and the basic concepts and components of building electrical distribution systems, including circuit design.

Note: 3 hours recitation per week

## Requisites:

Prerequisite: PHYS 214. Must be taken concurrent with ARE 552, ARE 553, ARE 460, and CE 537.
When Offered: Fall, Spring
Rationale: The fundamental electrical design courses are being organizationally modified in order to present all of the building courses simultaneously. This represents the first required building electrical systems course in this new arrangement.

## Impact: Internal to ARE/CNS

Effective Date: Fall 2017

## ADD:

New Course: ARE 552. Mechanical Systems 1 (3). An introduction to building HVAC and plumbing system terminology, principles, and practices of design and layout specifically for applications of human comfort and safety.

Note: 3 hours recitation per week

## Requisites:

Prerequisite: ME 513. Must be taken concurrent with ARE 551, ARE 553, ARE 460, and CE 537.
When Offered: Fall, Spring
Rationale: The fundamental mechanical and plumbing design courses are being organizationally modified in order to present all of the building courses simultaneously. This represents the first required building mechanical and plumbing systems course in this new arrangement.

## Impact: Internal to ARE/CNS

Effective Date: Fall 2017

## ADD:

New Course: ARE 553. Structures 1 (3). An introduction to building structural system terminology, principles, and practices of design and layout specifically for applications of buildings.

Note: 3 hours recitation per week

## Requisites:

Prerequisite: CE 533. Must be taken concurrent with ARE 551, ARE 552, ARE 460, and CE 537.
When Offered: Fall, Spring

Rationale: The fundamental structural design courses are being organizationally modified in order to present all of the building systems course simultaneously. This represents the first required building structural systems course in this new arrangement.

## Impact: Internal to ARE/CNS

Effective Date: Fall 2017

## ADD:

New Course: ARE 561. Electrical Systems 2 (3). The study and application of luminaires, lighting systems design and control, circuit and utilization component design, and design of building electrical systems distribution and service equipment.

Note: 3 hours recitation per week

## Requisites:

Prerequisite: ARE 551

## When Offered: Fall, Spring

Rationale: The fundamental electrical design courses are being organizationally modified in order to present all of the building courses simultaneously. This represents the second required building electrical systems course in this new arrangement.

## Impact: Internal to ARE/CNS

Effective Date: Spring 2018

## ADD:

New Course: ARE 562. Mechanical Systems 2 (3). The study of building HVAC and plumbing system selection and application including load calculations, space coordination, system design and layout, and scheduling of equipment and materials.

Note: 3 hours recitation per week

## Requisites:

Prerequisite: ARE 552

When Offered: Fall, Spring

Rationale: The fundamental mechanical and plumbing design courses are being organizationally modified in order to present all of the building courses simultaneously. This represents the second required building mechanical and plumbing systems course in this new arrangement.

## Impact: Internal to ARE/CNS

Effective Date: Spring 2018

## ADD:

New Course: ARE 563. Structures 2 (3). The study of timber, reinforced concrete, and steel building structural systems including analysis and design.

Note: 3 hours recitation per week

## Requisites:

Prerequisite: ARE 553

When Offered: Fall, Spring
Rationale: The fundamental structural design courses are being organizationally modified in order to present all of the building systems course simultaneously. This represents the second required building structural systems course in this new arrangement.

## Impact: Internal to ARE/CNS

Effective Date: Spring 2018

## ADD:

New Course: ARE 571. Systems Integration \& Design (3). An analysis of structural, mechanical, electrical and plumbing systems design processes, budgeting and constructability that supports the Conceptual Design and Schematic Design phases of building projects.

Note: 2 hours recitation \& 4 hours lab per week

## Requisites:

Prequisites: ARE 421, ARE 521, ARE 561, ARE 562, ARE 563
When Offered: Fall, Spring
Rationale: This is a new course that will build upon the previous graphics and plan reading courses to ready students for the capstone course within an immersive, integrated design experience.

Impact: Internal to ARE/CNS
Effective Date: Fall 2018

# Non-Expedited <br> CURRICULUM CHANGES 

## Electrical and Computer Engineering

Computer Engineering
Effective: Fall $\underline{2015}$

## Rationale:

The different specializations within Computer Engineering (CMPEN) have become difficult to maintain, since many of the classes called for were not having sufficient enrollment. This situation resulted in a large number of substitutions being made in students’ program in order for them to graduate in a reasonable amount of time.

## Summary of changes:

1) Drop the areas of specialization and have a single curriculum similar to the current Embedded Systems specialization.
2) Drop six hours of technical electives.
3) Add two required classes, ECE 542 - Local Area Networking and ECE 631 Microcomputer System Design

## Detailed Rationale:

- Courses that were part of the three specializations were not being filled and were becoming difficult to cover.
- The selection of the required courses was based on an assessment of what employers have been identifying as critical skills.

Impact: No significant impacts outside the department are anticipated for any of these changes.

Email: tim@ksu.edu

| ADD: | CMST 305. Robotics Programming. (3) Spring. Concepts and practices related to programming robotic systems emphasizing the unique input/output (I/O) and concurrency requirements of robotics. Students learn about sensors, actuators, kinematics, control systems, teleoperated operation and autonomous algorithms. Students write programs that run on a robot as well as a drive station computer with network communication to a robot. Pr.: CMST 247 or CMST 302. Coreq.: MATH 150 or MATH 151. <br> K-State 8: • Empirical and Quantitative Reasoning • Natural and Physical Sciences |
| :---: | :---: |
| K-STATE 8 RATIONALE: | Students will write programs attempting to control the movement of a robot per a requirement specification. The robot will use sensors, such as sonar and optical encoders, to monitor its environment and movement. They will observe if the robot performs according to the algorithm that they attempted to express. |
| RATIONALE: | Programming of robotic systems requires special considerations and software tools that are not taught in other CMST courses. |
| IMPACT: | No impact on any other department. |
| EFFECTIVE D | TE: Spring 2015 |

Primary Contact Person: Saeed Khan, Associate Professor
Phone: 785-826-2677
Email: saeed@ksu.edu

| ADD: | ECET 414. Electromagnetic Applications. (4) Spring. Emphasizes the physical <br> understanding and visualization of Maxwell's Equations leading to the design of linear <br> bilateral circuit components, waveguides and passive sensors for use in the radio- <br> frequency (RF) regime. Three hours lec and two hours lab. Pr.: ECET 320 and MATH <br> 220. |
| :--- | :--- |
|  | K-State 8: $\quad$ •Empirical and Quantitative Reasoning • Natural and Physical Sciences |
| K-STATE 8 |  |
| RATIONALE: |  | | Students will study the physics behind electronic components from low frequencies up to |
| :--- |
| radio frequency (RF) using analytical, numerical, and experimental techniques. |

RATIONALE: This course is designed to provide students with a better understanding of the electromagnetic aspects of practical electronic devices and their design.

IMPACT: No impact on any other department.
EFFECTIVE DATE: Spring 2015

## Graduate course and curriculum changes (11-4-14)

## Non-Expedited New Courses

DED 820. Foundations of Social Justice Education: Research, Theory, and Practice. (3) I, S. This course focuses on the principles of social justice education that promote equitable, sustainable, and transformative change in various formal and non-formal educational settings across the lifespan. The course integrates theoretical and practical aspects of social justice in local, national and international settings such as K -12 formal education, higher education, adult education, community development, and family education, and agricultural education.

IMPACT: None.
RATIONALE: This is the introductory course of a proposed graduate certificate in Social Justice Education, a college-wide program of the College of Education. The course will introduce the topic to those participating in the graduate certificate program.

EFFECTIVE DATE: Summer 2015

DED 880. Reflective Practice in Social Justice Education. (3) II. This course focuses on the application of principles of social justice education in informal and formal educational settings. Student-conceptualized and -implemented theory-to-practice social justice education projects serve as the capstone or culmination of the graduate certificate, with projects presenting powerful opportunities for students to foster social change and positively impact the communities in which they work. Pre-Requisite: DED 820.

IMPACT: None.
RATIONALE: This is the capstone course of a proposed graduate certificate in Social Justice Education, a college-wide program of the College of Education. The course includes planning, implementing and evaluating a theory-to-practice social justice education project in the school, community and organizational settings.

EFFECTIVE DATE: Fall 2015

AMETH 700. Advanced Topics in American Ethnic Studies. (3) I, II, S. Provides students the opportunity to investigate topics in American Ethnic Studies that enable greater depth and complexity of understanding of field's methodological approaches and specializations. K-State 8: Human Diversity within the US; Ethical Reasoning and Responsibility.

K-State 8 RATIONALE: Advanced Topics in American Ethnic Studies will further students’ skills in advancing the mission of our department: "to serve American society through our focus on underserved communities of color and communities historically under-represented at the nation's university." Advanced Topics courses will thus assist students in developing a
heightened awareness of how diverse ethnicities and racial formations shape their sense of self in relation to diverse others using scholarly study, research and personal interaction. Advanced Topics courses in American Ethnic Studies will further students’ skills in advancing the mission of our department: "to promote social justice ideals and practices of inclusivity [and] foster engaged research and praxis responsive to the needs and realities of underserved constituencies". Advanced Topics courses will thus assist students in learning how to think through ethical dilemmas and make sound decisions about how to participate in society to promote the wellbeing of all, especially the racially disenfranchised.

RATIONALE: This course is being added to increase American Ethnic Studies curricular offerings that provide greater in-depth theoretical and empirical analysis of topics central to the field's development. Since our courses currently also draw much interest from graduate students, the 700- level Advanced Topics course will allow these students to enroll in relevant advanced AMETH topics courses for graduate credit.

IMPACT: None
EFFECTIVE DATE: Spring 2015

GEOG 708. Topics in Programming for Geographic Analysis. (3) I, II. Introduces programming languages, scripting methods, and/or free and open-source software (FOSS) and their use with geospatial technologies and spatial data. Explanations of programming concepts, demonstrations of techniques, and practical exercises that will enable students to develop their own programs and workflows for geoprocessing, spatial analysis, and map production. Pr.: GEOG 608 is recommended.

RATIONALE: The automation of geoprocessing and geocomputation tasks is becoming common practice among geographers who use geospatial technologies and techniques for basic and applied research. Increasingly, employers are also asking undergraduates to be competent users of programming/scripting languages such as Python and Javascript, as well as free and open source applications for mathematics, statistics, and graphing like R and openModeller. This class will focus on the application of such languages/programs to perform geographic analysis, create custom geoprocessing functions, and for implementing higher-order automation procedures for data processing and analysis. As a topics course, we anticipate instructors will focus on one language/application during each offering, allowing students to repeat the course and learn different content. This proposed course fills a large void in our current geographic information science (GIScience) curriculum at the senior undergraduate and graduate levels by building on beginning and intermediate-level courses such as GEOG 508 GIS I, GEOG 605 Remote Sensing of the Environment, GEOG 608 GIS II, and GEOG 711 Topics in Remote Sensing to extend the range of geoprocessing, analysis, and data automation functions available to spatial scientists.

IMPACT: None
EFFECTIVE DATE: Spring 2015

MUSIC 791. Advanced Vocal Pedagogy. (2) I, S. Advanced study of vocal production, exploring the scientific principles of breathing, resonance, timbre, and other vocal features. Discussion of vocal health and teaching styles.

RATIONALE: We have offered this course as a MUSIC 799 course in the past but since it will be reoccurring, we want to offer it as a separate course.

IMPACT: Graduate School. To facilitate enrollment and graduate school program of study planning. Laura Murphy, Graduate School was contacted September 30, 2014, and Dean Shanklin responded 10-8-2014 asking to change the course number to a 700-level course. We are changing from MUSIC 691 to MUSIC 791 per the Graduate School request.

EFFECTIVE DATE: Fall 2015

THTRE 800. Introduction to Graduate Studies in Theatre: Library, Research, and Information Skills. (1-3) I. Skills for accessing research tools and resources needed in the age of the internet, along with instruction on citations, literature reviews, and other formatting necessary for graduate research papers.

RATIONALE: Graduate students need to learn the basics of research in order to utilize the resources that our library provides and to learn how to appropriate cite papers, etc. We have been offering what has been equivalent to a one credit class informally for the last I years and feel that since some students opt not to take it, we need to make it formal and ensure that everyone takes it. We would like to make it variable credit so that the option is available for further instruction in research methods beyond the basics. We will only require 1 credit hour in the curriculum.

IMPACT: None

## Non-Expedited New Curriculum

## New Certificate: Social Justice Education

FROM:
TO:
Graduate Certificate Program in Social Justice Education
The purpose of this 15-credit hour program is to prepare individuals to integrate theoretical and pedagogical aspects of social justice education in formal and informal educational settings at local, national, and international levels.

Admission criteria:
Students applying to the K-State Graduate Certificate Program in Social Justice Education (SJE) must be admitted to the K-State
Graduate School. A student with a bachelor's degree or in the final year of completing the degree is expected to have a cumulative grade point average of at least 3.0 from an accredited institution to be admitted to the certificate program.

Curriculum Description:
The 15 -credit SJE certificate program focuses on the integration of foundational, theoretical, and practical aspects of social justice in educational settings, with social justice education theory-to-practice as central to the program. The certificate is based on the concept that social justice education is an ongoing, contextual process that impacts inequitable social, economic, and political systems through critical examination and intentional advocacy.

1. Required Courses (6 credits):

DED 820: Foundations of social justice education: Research, theory and practice (3 credit hours)
DED 880: Reflective practice in social justice education (3 credit hours)

|  | 2. College of Education elective courses (6-9 <br> credits) from these and possibly other courses: <br>  <br> EDACE 750 Women, Education, and Work <br> EDACE 818 Social Foundations of Adult <br> Education <br> EDACE 822 International Adult Education and <br> Literacy <br> EDCEP 830 Diversity in Higher Education <br> EDCEP 851 Multicultural Aspects of <br> Academic Advising <br> EDCI 721 ESL/Dual Language Methods <br> EDCI 740 Culture and Language in Classroom <br> Practice <br> EDCI 755 Multicultural Issues in Teaching <br> EDCI 786 Differentiated Instruction for <br> Diverse Leamers <br> EDCI 910 Multicultural Curriculum <br> Programming <br> EDLEA 801 Ethical Dimensions of Leadership <br> EDLEA 834 Strategies for Educational Change <br> EDLEA 845 Leadership for Diverse <br> Populations <br> EDSP 710 Education of Exceptional <br> Individuals <br>  <br> 3. Electives from other colleges (0 - 3 credits): <br> Courses approved for program on a case-by- <br> case basis. Examples are: WOMST 551, <br> cistory and Politics of Family Violence; <br> Hise <br> WOMST 605 Women’s Studies Practice and <br> Applied Social Change; PSYCH 556 <br> Multicultural Psychology; PSYCH 563 Gender <br> Issues in the Workplace; ANTH 633 Gender, <br> Power, and International Development; ANTH <br> 685 Race and Culture; SOCWK 580 Women’s <br> Perspectives on Peace and War; SOCIO 541 <br> Wealth, Power and Privilege; SOCIO 735 <br> Sociology of Human Trafficking; SOCIO 851 <br> Social Change; GERON 777 Public Policy: <br> Economic and Social Impacts on Older Adults; <br> FSHS 752 Culture and Conflict; FSHS 761 <br> International Conflict and Trauma. |
| :--- | :--- |

IMPACT: Three credit hours of this certificate program MAY be taken from other non College of Education departments. Examples are: WOMST 551 History and Politics of Family Violence, WOMST 605 Women's Studies Practice and Applied Social Change, PSYCH 556 Multicultural Psychology, PSYCH 563 Gender Issues in the Workplace, ANTH 685 Race and Culture, SOCWK 580 Women's Perspectives on Peace and War, SOCIO 541 Wealth, Power and Privilege, SOCIO 633 Gender, Power, and Development, SOCIO 735 Sociology of Human Trafficking, SOCIO 851 Social Change, SOCIO 933 Gender and Society, GERON 777 Public Policy: Economic and Social Impacts on Older Adults, FSHS 752 Culture and Conflict, FSHS 761 International Conflict and Trauma.

We have discussed this certificate program with faculty and department chairs in the departments listed above. The Appendix contains letters from the department chairs of Women's Studies; Psychology; Sociology, Anthropology and Social Work; and the director of the School of Family Studies and Human Services.

RATIONALE: The principles of social justice education promote equitable, sustainable, and transformative change in various educational settings that include traditional educational contexts (e.g. K-12 organizations, higher education) and those outside the traditional settings (e.g. military, agriculture, counseling, non-profits, corporations, health care, community development organization) as well as both national and international settings. There are few opportunities for individuals preparing for or working in formal or non-formal educational settings to learn specific pedagogical/andragogical concepts appropriate for promoting social justice and fostering change to positively impact individuals and communities. This graduate certificate will provide an interdisciplinary experience that is appropriate for students in a range of academic programs, such as social work, family studies, agricultural education, counseling, advising, curriculum and instruction, educational leadership, women's studies, and sociology. The certificate is also relevant for professionals and volunteers in K-20 and informal settings such as shelters, community agencies, Head Start, Peace Corps, NGOs, and government. This will be the only online social justice education program in the country that does not just include $\mathrm{K}-12$ formal education.

EFFECTIVE DATE: Summer 2015

# Graduate Certificate Proposal Certificate Program in Social Justice Education College of Education Kansas State University 

## Introduction

This 15 credit hour Social Justice Education Graduate Certificate proposed by the College of Education (COE) focuses on the principles of social justice education that promote equitable, sustainable, and transformative change in various formal and non-formal educational settings. The certificate is based on the concept that social justice is an ongoing, contextual process that impacts inequitable social, economic, and political systems through critical examination and intentional advocacy. The certificate program integrates theoretical and practical aspects of social justice in educational settings, with social justice education theory-to-practice as central to the program. It represents a focused collection of courses that related to social justice education in school, community, and organizational settings. Student-conceptualized and -implemented theory-to-practice social justice education projects serve as the capstone or culmination of the graduate certificate, with projects presenting powerful opportunities for students to foster social change and positively impact the communities in which they work. Thus, the graduate certificate will provide an interdisciplinary experience that is appropriate for students from a range of academic programs, such as social work, family studies, agricultural education, counseling, advising, curriculum and instruction, educational leadership, women's studies and sociology. The proposed graduate certificate program will be interdepartmental within the College of Education and will be managed by a steering committee made up of at least one member from each of the three departments in the college.

The proposed program strongly supports the College of Education's mission: to prepare knowledgeable, ethical, and caring decision makers for a diverse and changing world. It will fulfill the educational missions of Kansas State University and the College of Education by:

- Preparing knowledgeable, ethical, and caring decision makers for a diverse and change world.
- Fostering excellent teaching, research, and service that develop a highly skilled and educated citizenry necessary to advancing the wellbeing of Kansas, the nation, and the international community.
- Improving the quality of life and standard of living of those we serve.
- Engaging in partnerships with various stakeholders to translate knowledge into applications that address public needs.
- Increasing the number of students who complete graduate certificates and master's degrees.
In addition, the certificate aligns with the professional interests of at least $60 \%$ of the faculty of the college, according to a survey conducted by the Associate Dean in 2011. The Midwest Educational Equity Center and the Center for Intercultural and Multilingual Advocacy (CIMA), both part of the College of Education, are excellent resources for this certificate program.

## I. Statement of the Educational Objectives of the Certificate Program

The primary goal of social justice is assuring that all groups have the opportunity to receive resources equally. In educational settings, educators ensure the development of a sense of positive social and cultural identity, a sense of agency, and recognition of sociological differences among individuals (e.g. gender, race, class, disability, sexual orientation, etc.) The principles of social justice education promote equitable, sustainable, and transformative change in various educational settings that include traditional educational contexts (e.g. K-12 organizations, higher education) and those outside the traditional settings (e.g. military, agriculture, counseling, non-profits, corporations, health care, community development organization) as well as both national and international settings. Social justice education is an ongoing, contextual process that impacts inequitable social, economic, and political systems through critical examination and intentional education and advocacy for social justice. A social justice education program, then, would prepare educators and others to recognize, name and combat inequities in schools, communities, and society.

Social justice education can be viewed through different lenses such as race, ethnicity, economic status, gender, national origin, sexuality, disability, socio-economic status, language, and others as well as the intersectionality of these. The axes of social difference - disability/ableism, gender/sexism, age/ageism, sexuality/heterosexism, race/racism, and the intersectionalities of oppression, power, and privilege are central to lived experiences (Bell, 1997). Social justice education facilitates an unpacking of these lived experiences and fosters pedagogical practices to address inequality (Mayhew \& De Luca Fernandez, 2007; Spalding, Klecka, Lin, Odell \& Wang, 2010; Kelly, 2012).

The proposed program is customized to student interests and provides an educational foundation for theory-to-practice experience for students in providing and promoting social justice in formal and non-formal educational settings. The curricula facilitate critical reflection upon prior socialization with respect to students' worldview and social justice. Students are presented with opportunities to learn and then demonstrate knowledge of theory, research, and practical applications related to social justice education. Therefore, the focus will be theory-driven approaches in social justice education as well as knowledge and application of the principles of social justice education through project based learning in their communities and places of work.

Through coursework and theory-to-practice capstone projects, students will contextualize social justice education to facilitate the improvement of the current and future quality of life and standard of living of those whom students serve. Students will develop skills, theory, and ethical judgments to engage in partnerships with various stakeholders to translate knowledge into applications that address public needs in formal and non-formal education settings.

## II. Certificate Program Courses

Courses in the graduate certificate of Social Justice Education are largely drawn from the existing set of courses relating to social justice and tailored to the student's particular interests and needs. The program requires one 3 -credit introductory course and one 3 -credit practicum course (to be developed), listed as a Dean of Education course (DED 820 and DED 880) and administered and taught by College of Education faculty. The two required courses will be taught on-line and may also be taught face-to-face at any of the three K-State campuses. Other
approved courses are drawn from existing COE courses relating to social justice education. Three credits may come from course offered by departments outside the College of Education; the SJE Steering Committee will approve these courses. Approved courses are a mix of online and face-to-face formats. In the capstone course, DED 880 , students will present their projects as evidence of the integration of social justice education with their own professional interests and contexts. This symposium will be formatted so that students may present virtually or face-toface. Twelve of the 15 credit hours in the program must be at the 600 level or above.

## Course listings:

REQUIRED COLLEGE OF EDUCATION COURSES (6 hours)
DED 820: Foundations of Social Justice Education: Research, Theory and Practice ( 3 credit hours) NEW COURSE
DED 880: Reflective Practice in Social Justice Education (3 credit hours) NEW COURSE

COLLEGE OF EDUCATION ELECTIVES (6-9 credit hours)
Note: The courses listed here are subject to change. Some are listed in the catalog as "offered on sufficient demand" or there is no regularized offering for some. We speculate that as the SJE certificate program grows, these courses will be offered on a regular basis. We also expect that as the program grows, COE faculty will develop specific courses that meet the needs of students and the goals of the program. In addition, there may be other courses that students may take, with permission of their certificate advisor, that are offered in the College of Education. We have chosen to include on this list the more generic courses that would be appropriate for students across the K-20 and adult education spectrum as well as across both formal and informal educational settings. These are a mix of face-to-face and online courses.

EDACE 750 Women, Education, and Work (face-to-face, not regular)
EDACE 818 Social Foundations of Adult Education (online annually)
EDACE 822 International Adult Education and Literacy (online, even years)
EDCEP 830 Diversity in Higher Education (online, summer)
EDCEP 851 Multicultural Aspects of Academic Advising (online, fall and spring)
EDCI 720 ESL/Dual Language Methods (face-to-face and online)
EDCI 740 Culture and Language in Classroom Practice (face-to-face and online)
EDCI 755 Multicultural Issues in Teaching (online)
EDCI 786 Meeting the Needs of All Students (online)
EDCI 910 Multicultural Curriculum Programming (face-to-face)
EDLEA 801 Ethical Dimensions of Leadership (online fall of even years)
EDLEA 834 Strategies for Educational Change (online annually)
EDLEA 845 Leadership for Diverse Populations (online, summer) EDSP 710 Education of Exceptional Individuals (face-to-face, every semester)
ELECTIVES FROM OTHER COLLEGES (0-3 credit hours)
Courses from other colleges that are related to the context of social justice may be part of the certificate program. Examples are:

WOMST 551, History and Politics of Family Violence
WOMST 605 Women's Studies Practice / Applied Social Change

```
WOMST 605 Women's Studies Practice / Applied Nonviolence
PSYCH 556 Multicultural Psychology
PSYCH 563 Gender Issues in the Workplace
ANTH 685 Race and Culture
SOCWK 580 Women's Perspectives on Peace and War;
SOCIO 541 Wealth, Power and Privilege
SOCIO 633 Gender, Power, and Development
SOCIO 735 Sociology of Human Trafficking
SOCIO 851 Social Change
SOCIO 933 Gender and Society
GERON 777 Public Policy: Economic and Social Impacts on Older Adults
FSHS 752 Culture and Conflict
FSHS 761 International Conflict and Trauma.
```

## III. Statement of How the Courses Are Associated with the Certificate

The two foundational courses (introduction and capstone courses) will provide students with a foundational understanding of the principles of the multiple dimensions of social justice education and applying them in an informal or formal educational setting. The elective courses represent a significant interdepartmental and college-wide collaboration that will make it possible for students to integrate this certificate with their specific areas of interest including women's studies, sociology, family studies, adult basic education, military education, teacher preparation, special education, educational leadership, sustainable agriculture, health education outreach and so on. The certificate program will culminate with an integrative final capstone practicum and theory-to-practice social justice education initiative implemented within the student's context (e.g. K-12 education, human resource development, continuing professional education, community development, outreach education, counseling, military education, etc.) Students will demonstrate the integration of social justice education with a specific area of interest and present project development and outcomes in an end of the semester symposium at which students may present virtually or face-to-face.

When a student applies to the SJE certificate program, a SJE steering committee will made a decision about admission and will appoint an in-college certificate advisor who will be the student's point of contact during the program. The certificate advisor will develop, with the student, personal and professional goals as well as a coursework plan. Courses not on the list above will be brought to the steering committee for approval. A certificate will be completed when the advisor indicates to the Coordinator that the student's plan is completed. We believe that advising and planning will be done by groups or cohorts as the program grows.

## IV. Statement of Need

Many professionals in various institutions, organizations, and other contexts work on social justice issues that are inherent in their settings. Public school teachers, social workers, community health professionals, community development professionals, volunteers in may settings and others may be interested in theory to practice strategies to help them facilitate system changes in a more targeted and comprehensive manner. The K-State SJE graduate certificate has the potential to fulfill the educational needs of these individuals who bring a diverse range of prior academic and other lived experiences, yet who share a common goal to
implement effective social justice education initiatives in their settings. In addition, the certificate ties well with a planned graduate certificate in "dialogue, deliberation and public engagement" in the Department of Communication studies and an interdisciplinary doctorate in "communication and social change".
Discussions with COE faculty who provide relevant courses have met with strong support and affirmation of the need for the program. For example, the professor who teaches EDCI, Multicultural Issues in Teaching, states that students become interested in the topic and ask, "what can we take now?" Likewise, the staff of the Midwest Equity Assistance Center (MEAC) who outreach across seven states in the region and are often asked about coursework as a followup to workshops and conferences. MEAC staff suggest they could recruit 30 students a year into the program. Finally, some doctoral programs in the COE have cognate areas or areas of specialization within their programs. The SJE graduate certificate would be appropriate for such an area of specialization. The letters from the COE Chairs in the Appendix provide further details.
Although several universities house programs, academic concentrations or graduate certificates focusing on social justice, very few offer a focus on social justice education. One other online certificate in SJE was found, however, it focuses only on K-12 formal education and is designed for teachers. This certificate is designed for educators who want to "teach for social justice outcomes" as well as individuals working in non-K-12 environments for whom social justice pedagogical competencies are required for maximum social justice outcomes (e.g. Head Start, 4H and extension, community development, social work, the Peace Corps and AmeriCorps). An interdisciplinary, college-wide approach to providing a graduate certificate is unique nationally and internationally. The delivery method of the certificate addresses a global audience with face-to-face and on-line student participation options.
We have discussed this certificate with individuals across campus who have related programs or interests and have met with strong affirmation and support. These include: Betsy Cauble, Chair, Department of Sociology, Anthropology and Social Work; Mary Tolar, Director, School of Leadership Studies; David Procter, Director, Center for Engagement and Community Development and the Institute for Civic Discourse and Democracy; Terrie McCants, Coordinator of the Graduate Certificate in Conflict Resolution; Susan Allen (retired director of the Women's Center and Torri Dickenson (professor of women's studies), co-coordinators of the Graduate Certificate in Non-violence Studies; Tim Steffensmeier, Chair of the Department of Communication Studies; Yolanda Broyles-Gonzalez, American Ethnic Studies; Eric Hartman, Assistant professor in Leadership Studies; Carol Shanklin, Dean of the Graduate School; he Women's Studies faculty.

## V. Description of the Certificate Program Administration

The graduate certificate program in Social Justice Education will be administered under the auspices of the College of Education. A SJE Steering Committee made up of three faculty members, one from each department in the College of Education, and one at-large member will manage the program. For the initial offering of this certificate, the program contact and chair of the Steering Committee will be Susan Yelich-Biniecki (EDLEA). The member at large will be Amanda Morales, the college diversity coordinator. The Dean and the Administrative Council will select other committee members. For the first several iterations of the certificate offering the Steering Committee will be responsible for the development and implementation of the program, including such aspects as recruiting students, managing student programs, overseeing the
delivery of the required courses, and program evaluation. This group will be supported by the Associate Dean of the College of Education, Linda P. Thurston, as well as by the chairs of the COE departments. The Chair of the Department of Educational Leadership, David Thompson, will provide support for the program contact, Dr. Yelich Biniecki.

This certificate program will have an Advisory Council that will provide feedback, assistance and advice as requested related to the ongoing development, implementation and marketing of this program. After the program has been approved and in operation for about a year, we expect to expand the Advisory Council to include well known advocates for social justice education at the national and international level. And example is Dr. Gloria Ladson-Billings, who was the Distinguished Education Researcher for the College in 2013. These individuals have agreed to serve on the Advisory Council at this time: David Procter, Director, Center for Engagement and Community Development and the Institute for Civic Discourse and Democracy; Terrie McCants, Clinical Assistant Professor in Family Studies \& Human Services and Coordinator of the certificate programs in conflict resolution; Susan Allen, Emerita director of the Women's Center and co-coordinator of the Graduate Certificate in Non-violence Studies; Tim Steffensmeier, Chair of the Department of Communication Studies; Yolanda Broyles-Gonzalez, University Distinguished Professor and Director of American Ethnic Studies; Eric Hartman, Assistant professor in Leadership Studies; April Grice, program director for the Midwest Equity Assistance Center.

## VI. Estimated Budget

The program will be sustained by faculty who are teaching the courses selected by students as part of their graduate certificate programs. The two new courses in the certificate program will become a part of the normal function of the face-to-face and online course offerings. The new courses will be taught by existing faculty on a rotating basis, with the potential to add qualified faculty and instructors if the demand warrants it. The program will be supported by revenue generated from courses and by College of Education resources. The cost to develop the two new courses is being covered by a grant from the Global Campus to Linda Thurston and Susan Yelich-Biniecki, and by existing COE resources. These required courses will be offered on-line through DCE, but may also, in the future, be offered face-to-face.

## VII. Names of Faculty Associated With or Contributing to the Certificate

The faculty who will teach College of Education courses in the certificate program and/or who will serve as Steering Committee members or program advisors are: Susan Yelich Biniecki, Doris Carroll, Kakali Bhattacharya, David Thompson, Linda Thurston, Donna Augustine-Shaw, Socorro Herrera, Be Stoney, Jeong-Hee Kim, Jim Teagarden, Jeff Zacharackis, Amanda Morales, Tonnie Martinez, April Grice, and Debbie Mercer.

## VIII. Program Coordinator

The certificate program will be coordinated by a Steering Committee, however the primary contact and committee chair will be Susan Yelich Biniecki, in the Department of Educational Leadership. The Office of the Associate Dean and the Department of Educational Leadership will support her.

## IX. Student learning outcomes and assessment plan

The Program Logic Model for the K-State Graduate Certificate in Social Justice Education in the College of Education (Figure 1) demonstrates the resources (inputs), the activities of the students within the program, the student outputs/products and the expected outcomes (student learning objectives - SLOs). The Logic Model demonstrates the program's theory of change, that is, how the program activities and requirements are expected to impact program participants. In addition, the Logic Model guides the assessment of student learning, for which measures and metrics are listed.

## Student learning outcomes

The program's unique combination of theory and practice addresses these specific student learning outcomes (SLOs). Upon completion of the SJE graduate certificate, participants will: - Demonstrate knowledge about theoretical perspectives that ground social justice and social justice education

- Understand and apply theory and research that informs the practice of social justice education
- Plan and implement relevant educational practices to promote social justice in formal and non-formal educational settings
- Demonstrate ethical decision-making in the practice of social justice education
- Utilize reflective practice in social justice education

Within formal and non-formal educational settings, the certificate program contributes to fostering social justice through excellent teaching, research, and service that develop a highly skilled and educated citizenry necessary to advancing the well-being of Kansas, the nation, and the international community, which is central to the mission of Kansas State University, a landgrant institution.

## Assessment Plan

As demonstrated by the Logic Model in Figure 1, assessment of each learning objective is tied to a specific measure or assessment activity. Consequently, an instrument is defined for each measure or assessment activity. The Assessment of Student Learning Plan (Kansas State University, 2004) is attached, Attachment A.

## X. Endorsements of academic units whose students, courses or programs could be impacted by the graduate certificate in Social Justice Education

Although there are no academic units who are directly impacted by this certificate program, there are many units on campus who may be interested in our coursework or who may have students who would be interested in this certificate. We have described and discussed this graduate certificate program with several individuals on campus that are involved in academic programming that is somewhat related to the topic of social justice. Those with whom the potential certificate program was discussed are listed in Appendix D. Attached to Appendix D are letters from COE department chairs and from
chairs of non-COE departments that have courses on the possible electives list (Attachment B).

C. Degree Program

Graduate Certificate Program in Social Justice Education
D. Assessment of Student Learning Three-Year Plan

1. Student Learning Outcome(s)
a. List (or attach a list) all the student learning outcomes for the program.

Upon completion of the SJE graduate certificate, participants will:

- Demonstrate knowledge about theoretical perspectives that ground social justice and social justice education
- Understand and apply theory and research that informs the practice of social justice education
- Plan and implement relevant educational practices to promote social justice in formal and non-formal educational settings
- Demonstrate ethical decision-making in the practice of social justice education
- Utilize reflective practice in social justice education
b. Identify outcomes that will be assessed in the first three years of the plan.
- Demonstrate knowledge about theoretical perspectives that ground social justice and social justice education
- Understand and apply theory and research that informs the practice of social justice education

Special rationale for selecting these learning outcomes:
The first two learning outcomes were selected because this is a new graduate certificate program and they are the initial expected outcomes of the 15 -credit hour sequence of courses.

Relationship to K-State Student Learning Outcomes (insert the program SLOs and check all that apply):

|  | University-wide SLOs (Graduate Programs) |  |  | Program SLO <br> is conceptually <br> different from <br> university <br> SLOs |

College of Education: Graduate Certificate in Social Justice Education

Alignment Matrix - For each stated student learning outcome, where does the student have the opportunity to learn the outcome (e.g., specific courses, or other program requirements) and where is the student achievement of the outcome assessed (e.g., assignments in courses, evaluation of final thesis, report, dissertation)?

| $\begin{array}{c}\text { Degree Program SLO/Required } \\ \text { Courses/Experiences }\end{array}$ | $\begin{array}{c}\text { Capstone field } \\ \text { experience/practice } \\ \text { and report }\end{array}$ | $\begin{array}{c}\text { A }\end{array}$ | $\begin{array}{c}\text { Student End } \\ \text { of Program } \\ \text { Assessment }\end{array}$ |
| :--- | :---: | :---: | :---: | \(\left.\begin{array}{c}A <br>

Learn (X) Courses <br>
Listed by Number\end{array}\right\}\)

- Place an "X" for courses or experiences in which students have the opportunity to learn the outcome (coursework, other program requirements). • Place an "A" for courses or experiences in which student performance is used for program level assessment of the outcome (assignments in course, evaluation of final thesis, report, dissertation).

## 2. How will the learning outcomes be assessed? What groups will be included in the assessment?

The following evidence will be collected during the first three years of the certificate program for all students in the program. We do not assume that there will be numerous completers during the first three years. Therefore, the data on student learning will focus primarily on the first required course, DED 820 , as well as the logistics of the program, in order to improve the coursework as well as improve the delivery of the courses and the design and logistics of the certificate program.
(1) Demonstrate knowledge about theoretical perspectives that ground social justice and social justice education (SJE)

1a. Total of cumulative individual scores for discussions using the Rubric for Participation in Online Discussions for DED 820 (direct)
1b. Individual student scores on Positionality Essay using Grading Rubric for Positionality Essay in DED 820 (direct)
1c. Individual student percent correct on knowledge test about theory and theoretical perspectives related to social justice and social justice education in DED 820 (direct)
1d. Student Self-Assessment of SLO, to promote reflective practice (SLO 5) in DED 820 and DED 880 (indirect)
1e. Data from surveys about student knowledge about theoretical perspectives that ground social justice and social justice education completed by faculty who teach the elective courses taken by students in the certificate program (at completion of certificate program - may to be used in first 3 years of the program) (indirect)
1f. Total percent score on ratings on the "knowledge base" section of Capstone SJE Experience Rating Scale by at least two members of the Steering Committee (at completion of certificate program - may to be used in first 3 years of the program) (direct)
(2) Understand and apply theory and research that informs the practice of SJE

2a. Individual student scores on Social Justice Education: Current State and Future Possibilities essay, using the Grading Rubric for SJE: Current State and Future Possibilities in DED 820 (direct)
2b. Individual student scores on Collaborative Film Analysis project using Grading Rubric for Film Analysis in DED 820 (direct)
2c. Student Self-Assessment of SLO, to promote reflective practice (SLO 5) (at completion of certificate program - may to be used in first 3 years of the program) (indirect)
2d. Individual student scores on checklist for SJE Initiative Proposal, using SJE Initiative Checklist, proposal section, DED 880 (at completion of certificate program - may to be used in first 3 years of the program) (direct)
2e. Data from surveys about perceptions of student knowledge about research related to SJE and application of research to completed by faculty who
teach the elective courses taken by students in the certificate program (at completion of certificate program - may to be used in first 3 years of the program) (indirect)

As students complete the certificate, exit interviews will be used to assess their knowledge about social justice education theory and practice, their capacity for selfreflection and improvement, and their self-describe learning from the program. In addition, a survey of completers will be used to assess the quality of faculty and student experiences in the program, suggestions for improvement, and intentions for future graduate student and professional practice related to social justice education.

All students accepted to and enrolled in courses related to the SJE Graduate Certificate will be included in these assessments for the first three years of the program. As the program grows, a random sample of students in the program will be selected. We also plan in the future to collect data only from program completers.

## 3. When will these outcomes be assessed? When and in what format will the results of the assessment be discussed?

Data will be collected on a semester basis, with DED 820 faculty, Certificate Coordinator, and advisors providing data as described above for the SJE program evaluation database designed for the project and set up on Canvas. For example, at the conclusion of DED 820, the required introduction course, the course instructor will enter the data related to that course ( $1 \mathrm{a}, 1 \mathrm{~b}, 1 \mathrm{c}, 2 \mathrm{a}, 2 \mathrm{~b}$ ) for individual students on the passwordprotected site. Students will meet with their advisors and review their SJE Learning Plan, scores on course activities, and self-assessments (1d, 2c). These will be entered on Canvas by the advisor. Advisors will lead students in learning to reflect on course and professional practice related to social justice education principles. Advisors will also note feedback from students about the helpfulness of the course in facilitating student learning of the SLOs.

Every semester, the Coordinator and the COE Associate Dean for Research will summarize and provide representations of the assessment data. These data will be provided as individual student data (not identified) and group data once a semester (3 X annually) to the Steering Committee. This will allow close scrutiny of student learning by providing individual student tracking of learning across time and group data across semesters to note trends and to provide input for program improvement.

Year 1:
Summer semester: Collect and analyze individual and group data for 1a-d and 2ac; summarize and analyze data for Steering Committee; meeting of Coordinator and Steering committee.
Fall semester: Collect and analyze individual and group data for 1a-d, 2a-c, and 1 e and 2 e , if applicable; summarize and analyze data for Steering Committee; meeting of Coordinator and Steering committee.
Spring semester: Collect and analyze individual and group data for $1 \mathrm{a}-\mathrm{d}, 2 \mathrm{a}-\mathrm{c}$ and 1 e and 2 e , if applicable; summarize and analyze data for Steering Committee;
meeting of Coordinator and Steering committee to plan actions for program improvement.
Year 2:
Summer semester: Collect and analyze individual and group data for 1a-d and 2ac; summarize and analyze data for Steering Committee; meeting of Coordinator and Steering committee.
Fall semester: Collect and analyze individual and group data for 1a-d, 2a-c, and 1 e and 2 e , if applicable; summarize and analyze data for Steering Committee; meeting of Coordinator and Steering committee.
Spring semester: Collect and analyze individual and group data for 1a-d, $2 \mathrm{a}-\mathrm{c}$, and 1 e and 2 e , if applicable; summarize and analyze data for Steering Committee; meeting of Coordinator and Steering committee to look at actions planned and design changes in plan if indicated by data.
Year 3:
Summer semester: Collect and analyze individual and group data for 1a-d and 2ac; summarize and analyze data for Steering Committee; meeting of Coordinator and Steering committee. Committee will plan continuing assessment plan for after the first three years of the program.
Fall semester: Collect and analyze individual and group data for 1a-d, 2a-c, and 1 e and 2 e , if applicable; summarize and analyze data for Steering Committee; meeting of Coordinator and Steering committee.
Spring semester: Collect and analyze individual and group data for 1a-d, $2 \mathrm{a}-\mathrm{c}$, and 1 e and 2 e , if applicable; summarize and analyze data for Steering Committee; meeting of Coordinator and Steering committee and examine results of program improvement plan and revise plan as indicated by data.

During the first three years of the certificate program, the Coordinator and the Steering Committee will meet three times a year to review the data on Canvas and to examine other formative evaluation data that will be collected for the purpose of program improvement.

The Coordinator will develop a brief summary of the findings from the data with recommendations for course instructors, advisors, and general program improvements.

## 4. What is the unit's process for using assessment results to improve student learning?

The Certificate Coordinator and the Steering Committee will meet at least annually to review the data collected as described above and discuss the Coordinator's summary and recommendations. This group will consult with COE faculty who teach the array of optional courses that make up choices of elective courses. Recommendations for program improvement to improve student learning will be discussed and plans will be made for implementing the changes, which will be reviewed at the next annual meeting. The Steering Committee meets three times a year; this review of assessment data will take place on the final meeting of each academic year.

## Non-Expedited Curriculum Changes

## Master of Music

FROM:
Piano pedagogy

Major field

6 hours individual instruction and the following courses:

- MUSIC 821 - Piano Pedagogy

I Credits: (3)

- MUSIC 822 - Piano Pedagogy

II Credits: (3)

- MUSIC 823 - Supervised Teaching in Piano Credits: (2)
- MUSIC 824 - Half Recital in

Piano Credits: (1)

- MUSIC 825 - Lecture Recital in

Piano Credits: (1)
Master's report (recital)

In place of a master's recital and report, all students will present a lecture-recital that will be musically-illustrated presentation on some aspect of piano pedagogy.

TO:

## Piano pedagogy

Major field

6 hours individual instruction and the following courses:

- MUSIC 821 - Piano Pedagogy

I Credits: (3)

- MUSIC 822 - Piano Pedagogy

II Credits: (3)

## Master's report (recital)

In place of a master's recital and report, all students will present a lecture-recital that will be musically-illustrated presentation on some aspect of piano pedagogy. MUSIC 824 and MUSIC 825 will replace the two credits of MUSIC 898 Graduate Report.

RATIONALE: This change reflects the revisions made in response to the NASM accreditation visit.

IMPACT: Graduate School, Dr. Carol Shanklin has approved this change in an email dated April 23, 2014.

EFFECTIVE DATE: Spring 2015
