# Faculty Senate meeting, 2-12-19 Consent Agenda - Course Proposals

### **Committee Faculty Senate**

### Notes

These course proposals were approved at the college level and Graduate Council (where needed) and were approved by the Faculty Senate Academic Affairs committee.

The FS Executive Committee approved placement of these proposals on the FS agenda. Once approved they will be moved on to the final implementation stage. These are course proposals and therefore do not need KBOR approval.

To view a course proposal, with markup, you must choose "view proposal" (not just the summary) and then in the right hand column under "User Tracking" you must select "show current with markup" from the drop down options.

# **AGCOM - 100 - Agricultural Communications Orientation**

2018-2019 Appendix A: Course Form - New

General Catalog Inf	ormation (NEW)	
Contact person for this proposal*	Katherine Burke	
Department*	Communications and Agricultural Education	
Subject*	AGCOM	Catalog Number* 100
Long Course Title*	Agricultural Communications Orientation	
Short Title*	AGCOM Orientation	
Credit Hours/ Units*	1	
Course Description*	Orientation to the agricultural communications and judicellege-level skill building.	ournalism industry, on-campus resources, and

Need help? See Course Description Guidelines

## Rationale and Impact (NEW)

### Rationale\*

Because we are proposing that AGCOM 110, Introduction to Agricultural Communications, change from a majors-only course to include non-majors, AGCOM 110 would then no longer be an appropriate course for orientation content such as on-campus resources, note-taking skills, and basic university information. New freshmen and transfer students in agricultural communications and journalism will take AGCOM 100 (1 hour) and AGCOM 110 (2 hours) during their first semester at K-State.

Impact Statement (i.e. if this impacts another

This new proposed course will have no adverse impact on other programs.

unit)*

### Need help? See Course Description Guidelines

# Rationale and Impact (CHANGE)

### Rationale\*

We are proposing that AGCOM 110, Introduction to Agricultural Communications, change from a majorsonly course to include non-majors. New freshmen and transfer students in agricultural communications and journalism will take an orientation course, AGCOM 100 (1 hour), and AGCOM 110 (2 hours) during their first semester at K-State. AGCOM 110 will continue to include content covered in MC 131 and MC 132.

This change reflects our previous discussion with JMC on what will be covered in these two hours.

### **IMPORTANT**: Run impact report

Click the Impact icon above Copy and paste the results in the field below

Department*	Architectural Engineering and Construction Science		
Subject*	ARE	Catalog Number* 722	
Long Course Title*	Building Loads and Computer Aided	Structural Analysis and Design	
Short Title (provide if title changed above)	Building Loads & Design		
Credit Hours/ Units*	3		
Course Description*	•	uilding structural systems and design with the emphasis on building national Building Code's structural loading requirements,	

applications, and determination of design loads by ASCE 7 - Minimum Design Loads and Associated Criteria for Buildings and Other Structures. Introduction of building design and analysis software basics. Students will learn how to generate building structural models, and conduct analysis, design, and simulation using software applications.

Old description:

Structural design computations for beams, girders, columns and beam-columns. Design of connections (bolted & welded). Structural working drawings (plan, elevation and connection details). Overview of failure mechanisms and design procedures for plate girders. AISC requirements for prevention of various failure mechanisms.

Need help? See Course Description Guidelines

## Rationale and Impact (CHANGE)

Rationale\*

The course was newly developed from a discontinued course (ARE 522 Loads and Load Paths in Buildings) and has been offered twice in F17 and F18 as a topics course under ARE 720. The proposal serves to cover the appropriate materials for structural engineering student in the ARE program as a complementary elective course, and as a graduate course for BS/MS and MS students. It aligns with the current ARE curriculum.

#### **IMPORTANT:**

Do NOT change imported course information until proposal is launched.

Go to "Rationale and Impact" section next

Department*	Landscape Architecture and Regional & Community Planning		
Subject*	CDPLN	Catalog Number* 7	00
Long Course Title*	* Foundations of Community Development		
Short Title (provide if title changed above)			
Credit Hours/ Units*	3		
Course Description*		line Master of Science degree in Community the online learning environment and succeed	•

Students will be expected to develop concrete plans for succeeding in the program and to demonstrate graduate level writing and communication skills in assignments related to community development. The bulk of the course will provide foundations to community development as: (1) an academic discipline; (2) a science-based profession; and (3) a skills and knowledge-based practice.

Need help? See Course Description Guidelines

#### Rationale and Impact (CHANGE)

Rationale\*

Orientation was a course originally designed to introduce students to online education and the graduate program in community development via the Great Plains IDEA. The revised Foundations course will still introduce students to these concepts, but also provide foundation theory and knowledge about the practice and academic disciplines of Community Development. The increase of the new content will require an increase in student demand and therefore justify an increase in credit hour value.

#### **IMPORTANT**: Run impact report

# CIS - 400 - Object-Oriented Design, Implementation, and Testing

#### 2018-2019 Appendix A: Course Form - New

<b>General Catalog Inf</b>	ormation (NEW)
Contact person for this proposal*	Rod Howell
Department*	Computer Science
Subject*	CIS Catalog Number* 400
Long Course Title*	Object-Oriented Design, Implementation, and Testing
Short Title*	OO Dsgn, Impl, Testing
Credit Hours/ Units*	3
Course Description*	A study of concepts and techniques used to produce quality software programs. Object-oriented concepts, models, execution environments, design and testing techniques. Extensive application of these concepts and techniques to the development of non-trivial software programs.

Need help? See Course Description Guidelines

Need help? See deadlines http://www.k-state.edu/curriculog/deadlines/index.html

Note	3 hours recitation a week.
Repeat for Credit	
Requisites (Prerequisite, Corequisite, Recommended Prerequisite)	

	Prerequisite: CIS 300.	
	Students may enroll in CIS courses on to those courses.	nly if they have earned a grade of C or better for each prerequisite

#### CIS - 596 - Entrepreneurial Computer Science Project

#### 2018-2019 Appendix A: Course Form - New

<b>General Catalog Inf</b>	ormation (NEW)	
Contact person for this proposal*	Rod Howell	
Department*	Computer Science	
Subject*	CIS	Catalog Number* 596
Long Course Title*	Entrepreneurial Computer Science Project	
Short Title*	Entrp Comp Sci Proj	
Credit Hours/ Units*	3	
Course Description*		ort on some topic not covered in prior courses; may n component; may be done in collaboration with other re review and project evaluation.

Need help? See Course Description Guidelines

#### Rationale and Impact (NEW)

Rationale\*

This course is meant to serve as the capstone project course for students in the proposed Entrepreneurship Option. The requirements are essentially the same as for CIS 598 Computer Science Project; however, it will be used as the first semester of a two-semester entrepreneurial project. The entrepreneurial portion of the project will be handled by ENTRP 350 Technology and Innovation Management, which must be taken the following semester. In order to facilitate tracking students who are involved in these two-semester projects, it makes sense to have them enroll in a course different from CIS 598.

Impact Statement (i.e. if this impacts another unit)\*

We developed the Entrepreneurship Option with input from Prof. Chad Jackson, Director of the Center for the Advancement of Entrepreneurship, and Prof. William Turnley, Head of the Department of Management. They have both approved of the Option, including this course.

Projected Term\*

2195 Fall 2019

Need help? See deadlines http://www.k-state.edu/curriculog/deadlines/index.html

# Note Repeat for Credit May be repeated for credit.

# CIS - 599 - Cybersecurity Project

#### 2018-2019 Appendix A: Course Form - New

<b>General Catalog Inf</b>	ormation (NEW)		
Contact person for this proposal*	Rod Howell		
Department*	Computer Science		
Subject*	CIS	Catalog Number* 599	
Long Course Title*	Cybersecurity Project		
Short Title*	Cybersecurity Proj		
Credit Hours/ Units*	3		
Course Description*	may include an implementation and/	ation and report on some topic not covered in prior security courses; for experimentation component; may be done in collaboration with report with literature review and project evaluation.	

Need help? See Course Description Guidelines

# Rationale \* This course is intended to be the capstone project course for the proposed Cybersecurity Option. It will be similar to CIS 598 Computer Science Project, but will involve projects in the field of cybersecurity. Impact Statement (i.e. if this impacts another unit)\* No impact outside the College of Engineering. Projected Term\* 2195 Fall 2019

Need help? See deadlines http://www.k-state.edu/curriculog/deadlines/index.html

# **CIS - 655 - Security and Reliability of Computing Systems**

#### 2018-2019 Appendix A: Course Form - New

General Catalog Information (NEW)				
Contact person for this proposal*	Mitchell Neilsen			
Department*	Computer Science			
Subject*	CIS	Catalog Number* 655		
Long Course Title*	Security and Reliability of Computing Systems			
Short Title*	Sec/Rel of Comp Sys			
Credit Hours/ Units*	3			
Course Description*	Fundamentals of security and reliability of computing systems from both hardware and software perspectives. Topics include symmetric and asymmetric cryptography, artificial intelligence (AI) safety and security, selected topics from hardware-based security, introduction to reliability and fault tolerance, hardware fault tolerance, and software fault tolerance.			
Rationale and Impa	ct (NEW)			
Rationale*	This new course covers concepts not course complements concepts covers	overed in other security-related courses in the department, and red in related courses.		
Impact Statement (i.e. if this impacts another unit)*	No impact on other units.			
Projected Term*	2195 Fall 2019			

Need help? See deadlines http://www.k-state.edu/curriculog/deadlines/index.html

Rationale for K-State 8 tag	The course requires both empirical and quantitative reasoning in conducting experiments and evaluating the security and reliability of computing systems.
Typically Offered*	Fall
Grading Basis*	Graded  Graded-IH (Exempt)  Credit/No Credit  Student Option (Graded and APassF)  Student Option-IH (Graded and APassF; Exempt)

### COT - 689 - Conduct and Ethics for Cybersecurity and UAS Professionals

#### 2018-2019 Appendix A: Course Form - New

General Catalog In	formation (NEW)	
Contact person for this proposal*	Randy Nichols	
Department*	School of Integrated Studies	
Subject*	СОТ	Catalog Number* 689
Long Course Title*	Conduct and Ethics for Cybersecurity	and UAS Professionals
Short Title*	Ethics UAS Professional	
Credit Hours/ Units*	3	
Course Description*	Explores the constitutional, legal, personal and public policy fundamentals associated with the field of cyber data collection, fusion, integration, and UAV surveillance.	

Need help? See Course Description Guidelines

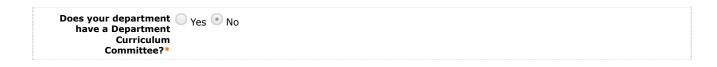

# Rationale and Impact (NEW) The Professional Master of Technology (PMT) faculty desire to increase the number of electives in the focus area of Unmanned Aerial Systems - Information Assurance. Impact Statement (i.e. if this impacts another unit)\* The Philosophy Department prefers that the course be renamed to omit the term 'ethics' from the title, or to refer not to ethics but to "Professional Ethics and Professional Conduct", with mention of a specific profession, e.g. "for Cybernetics Professionals." College of Technology and Aviation faculty discussed this objection at their October 18 meeting. The discussion included the fact that thirteen existing K-State, non-philosophy courses already include the term "ethics" in the title. It also noted that the title of this proposed course specifically refers to "cyber" ethics, confining it to this particular discipline. Consequently, the course was approved by faculty vote without a change in the title of the course. Projected Term\* 2195 Fall 2019

Need help? See deadlines http://www.k-state.edu/curriculog/deadlines/index.html

# **ECE - 872 - Therapeutic Medical Devices and Systems**

#### 2018-2019 Appendix A: Course Form - New

Contact person for this proposal*		
Department*	Electrical and Computer Engineering	
Subject*	ECE	Catalog Number* 872
Long Course Title*	Therapeutic Medical Devices and Systems	
Short Title*	Therapeutic Med Devices	
Credit Hours/ Units*	3	
Course Description*	This course will cover: (1) the fundamental principles of electromagnetic energy interactions with biological tissue, and (2) the design and analysis of electromagnetic energy-based therapeutic medical devices and systems. Topics covered include: tissue-energy interactions; neuromuscular electrical stimulation; rationale and applications of thermal therapy; devices for radiofrequency and microwave hyperthermia; thermal ablation; integration with medical imaging systems.	

Need help? See Course Description Guidelines

# Rationale and Impact (NEW) This course is being proposed as part of the curriculum for electrical engineering graduate students specializing in field of biomedical engineering. The course would also be suitable for other engineering/physical science graduate students interested in biomedical engineering. Impact Statement (i.e. if this impacts another unit)\* The proposed course does not have any anticipated impact on other units. Pre-requisites are from home department (ECE) only. Projected Term\* 2195 Fall 2019

English 430 end evaluating topics including source	plinary, but topics and methods for analysis most closely align with the courages students to observe systematic patterns in language in use, ses for foreign language accents, language variation, language ugh structured observation and hypothesis testing.

ENGL 430 therefore aligns with the L-State 8 outcomes for the social sciences:

- "Courses and experiences in social sciences emphasize how individuals, families, groups, institutions, governments and societies behave and influence one another and the natural environment. Students are exposed to appropriate methods used to analyze and understand interactions of various social factors that influence behavior at these multiple levels."
- "Educated individuals can identify the difference between rigorous, systematic thinking and uncritical thinking about social phenomena."

Typically Offered Fall, Spring

Human Diversity within the U.S.

# Rationale for K-State 8

English 476 students observe how political and social structures influence language distribution in the US, including a close examination of educational policies, de facto and de jure segregation, and other policies that affect demographic patterns in the US. They also examine the construction of identity through language by closely observing linguistic behavior in media (for example, critically evaluating the portrayal of gender and ethnicity through language in Disney movies) and through participant observation.

ENGL 476 therefore aligns with the K-State 8 outcomes for the social sciences:

- "Courses and experiences in social sciences emphasize how individuals, families, groups, institutions, governments and societies behave and influence one another and the natural environment. Students are exposed to appropriate methods used to analyze and understand interactions of various social factors that influence behavior at these multiple levels."
- "Educated individuals can identify the difference between rigorous, systematic thinking and uncritical thinking about social phenomena."

### FNDH - 355 - Rehabilitation and Exercise Modification Techniques I

2018-2019 Appendix A: Course Form - New

General Catalog Inf	ormation (NEW)	
Contact person for this proposal*	Mark Haub	
Department*	Food, Nutrition, Dietetics, and Health	
Subject*	FNDH	Catalog Number* 355
Long Course Title*	Rehabilitation and Exercise Modification Tech	nniques I
Short Title*	Rehab Techniques I	
Credit Hours/ Units*	3	
Course Description*	This course will cover the fundamental aspect techniques that occur during physical activity.	s of tactical strength and conditioning, and injury prevention

Need help? See Course Description Guidelines

### Rationale and Impact (NEW)

Rationale\*

This course will focus on the fundamentals of developing a tactical strength and conditioning program. It will, also, include issues dealing with the prevention of injuries that occur during physical activity. This course wil provide an understanding of periodization and conditioning theories that can be applied for sport and tactical athletes. Material discussed in this course will benefit those interested in strength training, physical fitness, coaching, and health and exericse sciences. The content is needed to prepare soldiers and other tactical athletes for improved performance.

Impact Statement (i.e. if this impacts another unit)\*

There is no other course like this at Kansas State University. However, we have reached out to the Department of Kinesiology for their support.

Hi Mark.

I am supportive of these new classes. I had our undergraduate council review them as well. Good luck with these classes.

Craig

Craig A. Harms, PhD FACSM Professor and Department Head Department of Kinesiology Kansas State University Manhattan, KS 66506

From: Mark Haub

Sent: Monday, October 1, 2018 5:18:29 PM

To: Craig Harms

### Subject: Two new rehab courses

Craig -- Phil and the Athletic Training faculty are proposing the following courses. While there is no impact due to the focus on injury (prevention and therapy), I wanted to garner your support for these rehabilitation courses and promotion of the 'return to play' concept. These will be part of a certificate program that we thought you might want to partner with. The basics are 3 Rehabilitation/Injury courses courses, Basic Nutrition, and maybe KIN 220?

Here are two rehab courses we are proposing, which were approved last week. Thanks and we can discuss at your convenience.

-- Mark

### FNDH - 455 - Rehabilitation and Exercise Modification Techniques II

### 2018-2019 Appendix A: Course Form - New

General Catalog Inf	ormation (NEW)	
Contact person for this proposal*	Mark Haub	
Department*	Food, Nutrition, Dietetics, and Health	
Subject*	FNDH	Catalog Number* 455
Long Course Title*	Rehabilitation and Exercise Modification Tech	niques II
Short Title*	Rehab Techniques II	
Credit Hours/ Units*	3	
Course Description*		c platform to apply and enhance knowledge and skills in on applying progressive resistive exercise programs for drehabilitation programs.

Need help? See Course Description Guidelines

Rationale*	There is a need for enhancing rehabilitation opportunities for athletes, soldiers and tactical athletes, and those recovering from typical orthopedic injuries. This course will build upon the material covered in Rehabilitation and Exercise Modification Techniques I to better prepare students to implement the knowledge and skills as professionals.
Impact Statement (i.e. if this impacts another unit)*	There is no direct impact as no other orthopedic rehabilitation courses are taught. However, Dr. Craig Harms was contacted to garner support from the Department of Kinesiology, due to the potential of their students interested in the content of this course.
	Hi Mark, I am supportive of these new classes. I had our undergraduate council review them as well. Good luck with these classes.
	Craig
	Craig A. Harms, PhD FACSM Professor and Department Head Department of Kinesiology Kansas State University Manhattan, KS 66506
	From: Mark Haub Sent: Monday, October 1, 2018 5:18:29 PM

### Subject: Two new rehab courses

Craig -- Phil and the Athletic Training faculty are proposing the following courses. While there is no impact due to the focus on injury (prevention and therapy), I wanted to garner your support for these rehabilitation courses and promotion of the 'return to play' concept. These will be part of a certificate program that we thought you might want to partner with. The basics are 3 Rehabilitation/Injury courses courses, Basic Nutrition, and maybe KIN 220?

Here are two rehab courses we are proposing, which were approved last week. Thanks and we can discuss at your convenience.

-- Mark

### **GEOL - 360 - Quantitative Methods in Geoscience**

### 2018-2019 Appendix A: Course Form - New

General Catalog Information (NEW)		
Contact person for this proposal*	Behzad Ghanbarian; ghanbarian@ksu.edu; 532-2244	
Department*	Geology	
Subject*	GEOL	Catalog Number* 360
Long Course Title*	Quantitative Methods in Geoscience	
Short Title*	Quantitative Geoscience	
Credit Hours/ Units*	3	
Course Description*	Design geological data sampling, investigate whether or not two geological datasets are significantly different, develop regression-based equations among various quantities, analyze data in Excel and MATLAB, and handle large geological datasets.	

**Need help?** See Course Description Guidelines

## Rationale and Impact (NEW) This course is designed to provide students with a practical approach to the quantitative methods they need for collecting, analyzing, modeling and interpreting geological datasets relevant to geochemistry, environmental geology, geophysics, petrology, geochronology, structural geology, etc. The students will receive hands-on experience with real geological datasets and will develop their computational skills through the use of EXCEL and MatLab. The course and its topics will be targeted toward mid-level undergraduate students seeking to develop more advanced quantitative skills. Impact Statement (i.e. if this impacts another unit)\* This course is designed to increase and improve the quantitative skills of students in our department. There are no negative repercussions envisage for any other department across campus. The Head of the Department for Geology is fully supportive of this new course development. The Heads of Department for Mathematics and Statistics have been also consulted and they have no objections. Projected Term\* 2195 Fall 2019

Need help? See deadlines http://www.k-state.edu/curriculog/deadlines/index.html

### GEOL - 625 - Introduction to Engineering Geology and Petrophysics

2018-2019 Appendix A: Course Form - New

General Catalog Inf	formation (NEW)	
Contact person for this proposal*	Behzad Ghanbarian; ghanbarian@ksu.edu; 532-2244	
Department*	Geology	
Subject*	GEOL Catalog Number* 625	
Long Course Title*	Introduction to Engineering Geology and Petrophysics	
Short Title*	Basic Eng. Geology	
Credit Hours/ Units*	3	
Course Description*	Students learn basic fundamentals to solve real-world problems in the area of geology and petrophys A field trip to an onshore oil rig in Kansas helps consolidating course materials with demands.	sics.

Need help? See Course Description Guidelines

### Rationale and Impact (NEW)

Rationale\*

Intro to Engineering Geology and Petrophysics was offered for the first time on a trial basis as GEOL 790 (Studies in Geology) course in spring 2018. It is the area of specialty for new, tenure-track faculty member Dr. Behzad Ghanbarian. The course focuses on quantitative and applied concepts from geological engineering, which provides our students with important skills valued by employers in both the energy and environmental sectors. As such, the course proved to be of considerable interest to our own students, both undergraduate geology majors and graduate students, even on its first offering. It also attracted students from Civil Engineering and Statistics. Students in the course learn basic and applied concepts by working on real-world problems, analyzing real experimental data, and using state-of-the-art software in the areas of geology and petrophysics. They develop in-depth knowledge of geological and petrophysical processes and acquire marketable skills that will promote future career opportunities in academia, industry, and government. In addition, inquiry-based learning exercises are used throughout the course to enrich the students' learning in geological, environmental, and petroleum engineering.

Impact Statement (i.e. if this impacts another unit)\*

The syllabus and course add form were circulated to Civil Engineering for consideration, and they are supportive of this new course. At their recommendation, we are cross-listing GEOL 625 with a more advanced version of the course (GEOL 825).

Projected Term\*

2194 Summer 2019

Need help? See deadlines http://www.k-state.edu/curriculog/deadlines/index.html

Requisites (Prerequisite, Corequisite, Recommended Prerequisite)	Prerequisite: MATH 220		
Cross-listed	GEOG 825		
K-State 8 Tag 1	Natural and Physical Sciences	K-State 8 Tag 2	Empirical and Quantitative Reasoning
Rationale for K-State 8 tag	This course places significant emphasis on empirical and quantitative reasoning, teaching students to evaluate data and added alternative interpretations, i.e. meeting the definition of "Q". The problems addressed will challenge the students to apply scientific data and ideas to real-world problems in a geologic context, and so meets the definition of Natural and Physical Sciences, as well, i.e. "N".

Department*	Grain Science and Industry	
Subject*	GRSC	Catalog Number* 580
Long Course Title*	Milling of Specialty Grains	
Short Title (provide if title changed above)	Specialty Milling	
Credit Hours/ Units*	2	
Course Description*		se which aims to increase students' knowledge of flour milling and ester students develop critical thinking and problem-solving skills

needed to troubleshoot real-life issues related to processing, quality assurance, HSE (Health, Safety, and Environment), and finished product quality. Students are expected to analyze their problems and develop the skills needed to effectively communicate their findings during group presentations.

Need help? See Course Description Guidelines

#### Rationale and Impact (CHANGE)

Rationale\*

Original focus of this course was design of flow diagrams for wheat flour milling processes. Over the years, the actually content has shifted towards studying process flow diagrams of specialty grains and practice their milling performances at the Hall Ross Mill.

The proposed new title and course description will provide a more accurate information.

Contact person for this proposal*	Hulya Dogan, dogan@ksu.edu, 2-262	8.
Department*	Grain Science and Industry	
Subject*	GRSC	Catalog Number* 655
Long Course Title*	Feed Mill Plant Design	
Short Title*	Feed Mill Design	
Credit Hours/ Units*	2	
Course Description*	• •	odern design, feasibility, and equipment selection for new feed mills.  ogistics, ingredient availability, operating efficiency, and finished

Need help? See Course Description Guidelines

## Rationale and Impact (NEW) GRSC 555 Cereal Plant Design has been taken both by FSM and MSM seniors as a capstone course. However, the objectives and steps of designing a flour mill and a feed mill are significantly different. Serving these two student bodies, and thus the corresponding indutrsy needs have been a challange. Now, we offer GRSC 555 (Process Flow and Mill Design) for MSM, and GRSC 655 (Feed Mill Plant Design) for FSM. Impact Statement (i.e. if this impacts another unit)\* None. 2194 Summer 2019

#### **IMSE - 867 - Stochastic Programming**

#### 2018-2019 Appendix A: Course Form - New

eneral Catalog Inf	ormation (NEW)	
Contact person for this proposal*	Shing Chang	
Department*	Industrial and Manufacturing Systems Engineering	
Subject*	IMSE	Catalog Number* 867
Long Course Title*	Stochastic Programming	
Short Title*	Stochastic Programming	
Credit Hours/ Units*	3	
Course Description*	The course covers two-stage stock multi-stage SP, stochastic integer p simulation-based (Monte Carlo sin	s to determine optimal solutions in the presence of data uncertainty. hastic linear programming, recourse, chance constraint optimization, programming, Benders decomposition, L-shaped method, heuristics, nulation) methods, and bounds on optimal solutions. Numerous nay be taken from agriculture planning, manufacturing, supply chain, ids or other systems.

#### Need help? See Course Description Guidelines

## Rationale\* Stochastic programming is evolving rapidly and is being applied in a wide variety of subjects ranging from manufacturing and supply chain to power grids and cybersecurity. This is a traditional topic of operations research and IMSE has needed such a class for years. Impact Statement (i.e. if this impacts another unit)\* Students from math and statistics may be interested in this course. We have reached out to both departments. The department of statistics is in support of this course. Projected Term\* 2195 Fall 2019

Short Title*	Drone Photo & Video	
Credit Hours/ Units*	3	
Course Description*	•	Inmanned Ariel System (Drone) to acquire and produce d for storytelling, advertising, short film, public relation and

Need help? See Course Description Guidelines

#### Rationale and Impact (NEW)

#### Rationale\*

Drone Photography and Video is a one of a kind class offered by the A.Q. Miller School of Journalism. To be offered as a standalone class and working with Kansas State Polytechnic to soon offer the class as part of the sUAS minor offered by Polytechnic. MC 469 Drone Photography and Video is a course open to all students and colleges at Kansas State University.

In this class, core skills students will learn are sUAS operation and flight training designed to develop good quality photographic and video skills. Along with quality data accusation students will learn editing techniques essential for professional storytelling practices. This class will also help students develop and understand sUAS privileges and limitations and ethical sUAS practices.

Within this class, students will have the opportunity to apply their newly learned skill to advertising, short film, public relations, other entrepreneurial fields. Successful students will not only leave the class with the skill set to safely and responsibly pilot a sues and collect and produce aerial media content. They will also be exposed to real-world application and industry standards for the sUAS industry.

#### Impact Statement (i.e. if this impacts another unit)\*

We have included a letter of support for this program from Dr. Terri Gaeddert, Director of the School of Integrated Studies at the Polytechnic Campus in Salina. This syllabus was shared with Jason Ellis, the interim department head of Ag Communications and Journalism, who approves of this course. Students in all constituent departments on campus will be able to take this course, so we do not see any conflicts.

Projected Term\* 2195 Fall 2019

### **MKTG - 561 - Sales Negotiation**

### 2018-2019 Appendix A: Course Form - New

eneral Catalog Inf	ormation (NEW)				
Contact person for this proposal*	Dawn Deeter, ddeeter@k-state.edu,	532-6880			
Department*	Marketing				
Subject*	мктб	Catalog Number* 561			
Long Course Title*	Sales Negotiation				
Short Title*	Sales Negotiation				
Credit Hours/ Units*	03				
Course Description*	Covers the fundamentals of negotiation, and how those fundamentals can be used during the sales process, with the goal of improving student understanding of negotiation theory and practical application. Learning components include reading assignments, in-class lectures and discussions, and role plays. Emphasis is placed on building students' skill sets.				

Need help? See Course Description Guidelines

### Rationale and Impact (NEW)

Rationale\*

A 2016 data analytics company report (PayScale report, "Workforce-Skills Preparedness Report") discussed a "skills gap" representing the perceived difference between the skills hiring managers desire in their new hires and the actual skills many college graduates possess. Hiring managers found "soft skills" such as written and oral communication, leadership, and teamwork particularly lacking in today's entry-level workforce. This course is designed to partially address this "skills gap" by emphasizing the fundamental negotiation skills needed for success in business and professional selling. Special emphasis is placed on the essential nature of face-to-face, human-to-human communication. Students will be challenged to learn and understand the negotiation process including strategies and best practices designed to deliver a mutually-beneficial agreement. The ability to negotiate is a key component of any company's success, and is therefore needed by our students.

Impact Statement (i.e. if this impacts another unit)\*

No units outside of the College of Business are impacted.

Projected Term\*

2195 Fall 2019

Department*	Marketing	
Subject*	MKTG	Catalog Number* 563
Long Course Title*	Cooperation Selling	
Short Title*	Cooperation Selling	
Credit Hours/ Units*	03	
Course Description*	buying process so they can create co	ofully synchronize their selling process with the decision maker's completely satisfied customers and thus generate more sales. Course nents, workbook assignments, quizzes, and role plays.

Need help? See Course Description Guidelines

### Rationale\* Coming directly from the real world of sales training conducted by the Learning Outsource Group for Fortune 500 companies using their new intellectual content Cooperation Selling, this course is 'real world' consultative sales instruction for university students. This course provides advanced sales knowledge, and is particularly designed for students earning the Certificate in Professional Strategic Selling or the Major in Professional Strategic Selling, although other students are welcome to enroll. The focus of the course is on understanding the buyer's decision process as a means to be more effective in the sales process. This sales model has been shown to be extremely effective and, as such, gives our students a competitive edge. Impact Statement (i.e.

if this impacts another unit)\*

Rationale and Impact (NEW)

No units outside the College of Business are impacted.

### PHILO - 386 - Philosophy of Computer Science and Software Engineering

### 2018-2019 Appendix A: Course Form - New

<b>General Catalog Inf</b>	ormation (NEW)		
Contact person for this proposal*	Bruce Glymour; glymour@ksu.edu; 532-0360		
Department*	Philosophy		
Subject*	PHILO	Catalog Number* 386	
Long Course Title*	Philosophy of Computer Science and Software Engineering		
Short Title*	Phil ComSci & Soft Eng		
Credit Hours/ Units*	3		
Course Description*	Explores conceptual, ethical, and practical questions about computers and software including the nature of computer science, digital rights, special and general AI, and the ethical responsibilities of software engineers.		

Need help? See Course Description Guidelines

### Rationale and Impact (NEW)

Rationale\*

The course is aimed to be of use to computer science and related engineering majors, but should be accessible to students from A&S as well, including those A&S majors, among them a number of philosophy majors, who intend to pursue the new computer science minor. The course considers the nature of computer science as an enterprise, e.g. whether it best considered as a science, as an applied science or branch of engineering, or as a branch of manufacturing, and the kind of ethical responsibilities that fall on computer scientists, and those using their products, depending on their roles. This is a renumbering and renaming of our current 'Computers and Society" course, PHILO 490. The 300-level numbering more accurately reflects the degree of difficulty of the course, and the renaming more accurately reflects the range of content and focus of the course, i.e. on computer science and its technological products, software, rather than on any particular platform (e.g. computers) running that software.

Impact Statement (i.e. if this impacts another unit)\*

No impacts are anticipated. Scott DeLoach, Head of Computer Science, was consulted, and responded on 9/14/2018 with "Bruce, We do not have any objections to your course. It sounds interesting and should be of interest to some of our students. Scott".

Projected Term\* 2195 Fall 2019

### PLPTH - 765 - Integrated Plant Disease Management

### 2018-2019 Appendix A: Course Form - New

General Catalog Inf	eral Catalog Information (NEW)		
Contact person for this proposal*	Judith O'Mara (jomara@ksu.edu)		
Department*	Plant Pathology		
Subject*	PLPTH Catalog Number* 765		
Long Course Title*	Integrated Plant Disease Management		
Short Title*	Intgrtd Plnt Dis Mmgt		
Credit Hours/ Units*	Credit Hours/ Units* 2		
Course Description*	* Advanced topics in integrated plant disease management will be examined, including: epidemiological concepts, disease loss assessment, fungicides, resistance traits, on farm research trials and utilization of precision agriculture technologies to measure disease impacts.		

**Need help?** See Course Description Guidelines

# Rationale and Impact (NEW) The course will be offered as part of the plant pathology minor and is designed to provide students in the plant sciences with an in-depth exposure to integrated disease management strategies. It will help prepare students for careers as growers, crop advisors and crop scientists. The PLPTH 785 course number will allow both undergraduates and graduates to take the course, with the expectation that graduate students will take on additional projects. Impact Statement (i.e. if this impacts another unit)\* The majority of the students will come from the Agronomy crop consulting and plant science and biotechnology options. The department of Agronomy has been notified and approval is pending. Projected Term\* 2195 Fall 2019

Need help? See deadlines http://www.k-state.edu/curriculog/deadlines/index.html

### POLSC - 250 - Environmental Political Thought: The Future of Food, Air, Water, and Soil

### 2018-2019 Appendix A: Course Form - New

General Catalog Information (NEW)			
Contact person for this proposal*	Jim Franke, Laurie Johnson; jfranke@ksu.edu; lauriej@ksu.edu; 532-6842		
Department*	Political Science		
Subject*	POLSC	Catalog Number* 250	
Long Course Title*	Environmental Political Thought: The	Future of Food, Air, Water, and Soil	
Short Title*	Env Political Thought		
Credit Hours/ Units*	3		
Course Description*	Environmental theories, with a concentration on the world's food production. Discusses important viewpoints past and present, including anarchist and socialist, New Right, liberal, conservative and democratic agrarian ideas concerning agriculture, food production and consumption, and how we should treat the environment in which we live.		
Rationale and Impa	act (NEW)		
Rationale*	K-State features so many programs having to do with agriculture, food and sustainability that it makes sense for Political Science to supply a course that educates students about the various ideas, theories and proposals related to environmental change and food production.		
Impact Statement (i.e. if this impacts another unit)*	Contacted Mary Kay Seifers, Director, Global Food Systems Leadership, 11/3/2017. Email discussion attached. Contacted Matthew Sanderson and Gerad Middendorf, Department of Sociology, Anthropology and Social Work, 11/2/2017. Email discussion attached.  As requested by FS Academic Affairs, other units were contacted for input. File attached with email discussion, 10/26/18.		
Projected Term*	2194 Summer 2019

### THTRE - 235 - Introduction to the Art of Film

### 2018-2019 Appendix A: Course Form - New

General Catalog Information (NEW)		
Contact person for this proposal*	Shannon Blake Shelton; sbskelton@ksu.edu; 532-5740	
Department*	Music, Theatre, and Dance	
Subject*	THTRE	Catalog Number* 235
Long Course Title*	Introduction to the Art of Film	
Short Title*	Intro to Film	
Credit Hours/ Units*	3	
Course Description*	Survey of Cinema, including history, analysis and the process of production. Will include film screenings outside of regular class meetings.	
-		

Need help? See Course Description Guidelines

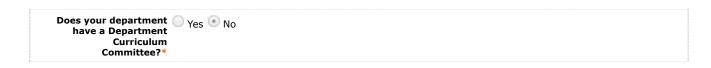

### Rationale and Impact (NEW) Rationale\* Currently, I am a member of a committee developing a Certificate in Film and Media Studies. This course would serve as a major component in the certificate's curriculum. Currently, a variety of film courses are offered throughout the university, but a general, survey course of film is needed. Over the past few years, I have offered film courses, but these have been upper-level courses. As a result, many students have requested that I propose a lower, survey course. This course will not alter the Theatre core curriculum as it will serve as a lower-level elective. Also, as many Theatre, Music, and Mass Communications students will eventually pursue professions related to film, such a course can better prepare them for their career. Finally, this course was previously offered by Theatre for many years, but has not been taught recently. Impact Statement (i.e. THTRE 235 will count as a 'Fine Arts' course for A&S. As a result, this film course will not impact if this impacts another English's offerings in film. English's film courses count as 'Literary' courses for A&S, unit)\* Projected Term\* 2194 Summer 2019

Requisite Processing		
Implementation Notes	THTRE 235 was previously "Intro Art Film" and was still active in the KSIS Catalog. The course was not found in the Acalog catalog. Per the rationale "this course was previously offered by Theatre for many years, but has not been taught recently." Therefore when input to KSIS is performed add a new effective dated row to the existing Course Id 108956. per Charlotte Pfaff 9-7-2018	

### THTRE - 810 - Survey of Research in Drama Therapy

### 2018-2019 Appendix A: Course Form - New

<b>General Catalog Inf</b>	ormation (NEW)		
Contact person for this proposal*	Sally Bailey, sdbailey@ksu.edu, 532-6	5780	
Department*	Music, Theatre, and Dance		
Subject*	THTRE	Catalog Number* 810	
Long Course Title*	Survey of Research in Drama Therapy	/	
Short Title*	Research Drama Therapy		
Credit Hours/ Units*	3		
Course Description*	Basic terminology, concepts, and princ	ciples underlying research in drama therapy and the helping fie	elds.

Need help? See Course Description Guidelines

# Rationale\* Drama Therapy Students usually come to graduate school with no background in empirical research. Experience has demonstrated that if they take a Research Methods class in Educational Psychology, FSHS, Psychology, or another graduate department, they have difficulty transferring the knowledge to the drama therapy field. They also tend to be very intimidated by the research area. We hope by having an in-house research class that we can better prepare and encourage drama therapy students to become researchers instead of "only" artists and clinicians. Impact Statement (i.e. if this impacts another unit)\* N/A The beginning research methods in classes in EDCEP and FSHS already have plenty of students in them. And they don't have time to bring drama therapy students up to the level of the other students in their classes. Projected Term\* 2195 Fall 2019

### **UAS - 272 - UAS Safety Fundamentals**

### 2018-2019 Appendix A: Course Form - New

<b>General Catalog Inf</b>	ormation (NEW)	
Contact person for this proposal*	David Burchfield	
Department*	School of Integrated Studies	
Subject*	UAS	Catalog Number* 272
Long Course Title*	UAS Safety Fundamentals	
Short Title*	UAS Safety Fundamentals	
Credit Hours/ Units*	3	
Course Description*	•	mphasis on best practices for safe operation of unmanned aircraft ssments, human factors, crew resource management, agement, and safety assurance.

Need help? See Course Description Guidelines

# Rationale\* This course is being introduced as a result of discussions among UAS faculty and administrators regarding the need for a dedicated UAS safety course. This course will augment our efforts to facilitate a culture of safety among UAS students. UAS 272 will initially be taught as part of the UAS minor, with the intent to also add it to the UAS-Flight and Operations curriculum during the next round of curriculum revisions. Impact Statement (i.e. if this impacts another unit)\* Does not impact any other academic units. Projected Term\* 2195 Fall 2019
