# About Kansas State University

---

Founded in 1863 as the nation's first operational land-grant university, Kansas State University's mission is to foster excellent teaching, research and service that develop a highly skilled and educated citizenry necessary to advancing the well-being of Kansas, the nation and the international community. K-State embraces diversity and inclusion, encourages engagement and is committed to the discovery of knowledge, the education of undergraduate and graduate students, and improvement in the quality of life and standard of living of those we serve.

K-State has campuses in Manhattan, Olathe and Salina — home of the Aerospace and Technology Campus — as well as K-State Online, which serves distance education students around the world. When it comes to academics, K-State's majors and degree programs offer pathways to hundreds of career options that can be tailored to individual goals and dream careers. Interest areas offered through K-State's nine colleges and Graduate School include agriculture, food and natural resources; architecture, art and design; aviation; business; communications, media and marketing; computer science and information technology; education and leadership; engineering and construction; government, law and social sciences; health professions; hospitality and tourism; human and social services; humanities, culture and society; science and mathematics; veterinary medicine; and visual and performing arts.

Forbes magazine, U.S. News and World Report and The Princeton Review all recognize K-State as one of the best universities in the nation, which is backed by the strong support K-State receives from its alumni and friends. With more than 200,000

alumni, the K-State Alumni Association ranks No. 1 in the Big 12 Conference for the percentage of graduates who are association members. In 2020, the Kansas State University Foundation wrapped up the highly successful Innovation and Inspiration Campaign, raising \$1.6 billion for K-State.

Called the "Silicon Valley for biodefense" because of its leadership in food safety and security and agrodefense, K-State is home to four Feed the Future Innovation Labs, an initiative by the U.S. Agency for International Development to increase food production in nations with limited resources. The university also is home to the Biosecurity Research Institute, a biosafety level-3 facility devoted to comprehensive infectious disease research and training. Adjacent to the Manhattan campus, USDA's National Bio and Agro-Defense Facility, a world-class science facility for large animal agricultural research, training and diagnostics, completed construction in May 2022.

Total research efforts at Kansas State University have led to more than 335 patents to date. The university has more than 90 research centers, including the 8,600-acre Konza Prairie Biological Station and the Johnson Cancer Research Center. Our distinguished faculty members are tackling such issues as feeding a hungry world expected to reach 50 billion in population by 2050, climate change, cybersecurity, sustainable energy, urban revitalization and more — and they often involve undergraduate students in their work. K-State Research and Extension also serves the citizens of Kansas in a variety of ways, with personnel, offices, research centers, programs and more throughout the state.

# About Our Ceremonies

---

## University mace

The Kansas State University mace made its debut in September 2009 at the inauguration of Kirk H. Schulz as the university's 13th president. A mace is a decorative symbol of office and typically carried at the front of academic processions. Designed by Tom Boley, a 1970 K-State alumnus, the mace is made from a purple wood called purpleheart and a light-colored maple.

## Academic dress

The history of academic dress dates to medieval European universities of the 12th century. Universities in the U.S. have standardized academic dress so its features are common and uniform throughout the country.

The gown — At K-State, gowns are black and typically made of synthetic material or worsted wool. The pattern varies with the degree held: open sleeves

for the bachelor's degree; long, closed sleeves with slits for the hands for the master's degree; and round, bell sleeves for the doctoral degree.

The hood — Students receiving graduate degrees wear hoods. The master's hood is shorter than the doctoral hood and lacks the panels of the doctoral hood. Hoods are lined with the colors of the university; K-State's lining is purple with two inverted chevrons. The binding or edging of the hood is the color pertaining to the subject of the degree.

The caps — All bachelor's and master's degree candidates wear a black mortarboard. Doctoral students may wear a mortarboard or a soft velvet tam with either six or eight sides. The tams can be dark blue or black for Doctor of Philosophy candidates and light blue for Doctor of Education candidates. Doctor of Veterinary Medicine candidates wear a black mortarboard. Tassel color for all degree candidates depends on the degree and/or degree field.

David Delker

and a master's degree in electrical engineering at Oklahoma State University.

Delker joined the Kansas Technical Institute as an assistant professor in 1979 and served on the faculty until 1983 when he accepted a position at the Kansas State University College of Engineering in Manhattan. He taught on the Manhattan campus until 1993 when he returned to the Salina campus after it merged with K-State. Delker led the electronic engineering technology program from 1993 until 1998 when he became department head of engineering technology. He served in that position until 2004 when he became associate dean of academics for the campus. He retired as associate dean and professor emeritus in 2014.

The Kansas Technical Institute recognized Delker for his teaching by naming him the first recipient of the Marchbanks Award for Teaching Excellence in 1983. He served his profession as a program evaluator for the Accreditation Board for Engineering and Technology and evaluated 18

electronic and computer engineering technology programs across the country. Throughout his career, he established a strong applied research and service record. He worked as a consultant in electronic instrumentation and digital systems development with several companies, particularly in fluid power and agricultural system design.

Delker's service to the university is extensive and includes serving on the K-State Faculty Senate, Academic Affairs Committee, the Committee on Academic Policies and Procedures, and the General Education Task Force. For several years he chaired the 40-person committee of academic and administrative stakeholders that designed and implemented the K-State student information system, KSIS. He chaired the team that developed the curriculum management system for the university and led student advising, faculty development and assessment programs for the K-State Salina campus.

For his distinguished career, the K-Salina Aerospace and Technology Campus selected Delker as its 2022 Alumni Fellow.

Delker and his wife, Shawn, are active volunteers in the 4-H program in Saline County and statewide. They both continue to teach and mentor students, although now the academic subjects include — in addition to electronics — woodworking, photography and visual art. The Delkers are parents of three K-State graduates: Ryan in 2001, Collin in 2003 and Kelsey in 2009.

Wint Winter

Wint Winter was appointed to the Kansas Board of Regents in June 2021 by Gov. Laura Kelly. A fifth-generation resident of Lawrence, he graduated in 1975 from the University of Kansas where he was a varsity football letterman. He then attended KU Law School, graduating fourth in his class in 1978.

Winter has been a partner in the Lawrence law firm of Stevens & Brand since 1978, serving as managing partner from 1995-1999. His law practice has been varied and has included business and personal injury litigation, real estate development law, bankruptcy, divorce law and estate planning.

He began a career in public service when he became Douglas County counselor from 1998-2000. From 1982 to 1992, Winter served in the Kansas Senate where he was vice chairman of the

Ways & Means Committee and chairman of the Judiciary Committee. He also was chairman of the Economic Development Committee for the National Conference of State Legislators. In 1986, he was named by KS Magazine as one of the Top 10 legislators in Kansas.

While in the Kansas Senate, Winter led the effort to enact a criminal sentencing guidelines system, successfully led the fight against enactment of the death penalty, introduced the sexual predator bill and gained a reputation as an advocate for neglected and abused children. In 1990 he received the annual Leadership Award for Outstanding Contributions to Children from the University of Kansas School of Social Welfare. In 1994 he unsuccessfully ran for the Republican nomination for Kansas attorney general.

In 2000, Winter became executive vice president and general counsel of Peoples Inc., the Winter family bank holding company with 25 branches in Kansas, Colorado and New Mexico. In 2002 he became president and CEO of Peoples Bank in

Kansas and led the merger of two banks in Kansas and one in New Mexico. When Peoples Inc. was sold on Jan. 1, 2018, it had nearly 40 branches in 11 states with nearly \$1 billion in assets and nearly 1,000 employees.

After selling the family business, Winter returned to part-time law practice in Lawrence. He serves with many charitable organizations and on several nonprofit boards. He was a member of the St. John Parish Counsel and has served in roles as diverse as chairman of the Sexual Abuse Review Board of the Capuchin Franciscan Province of Mid-America and a member of the board of directors of the Kansas Banking Commission. He also served as chairman of Save Kansas Coalition Inc., a nonprofit political education group that advanced centrist policies and helped reverse radical tax policies in Kansas.

He and his wife, Mary, a former math and religion teacher at St. John School, have three daughters and eight grandchildren.

Mark Becker

Mark Becker is president of the Association of Public and Land-grant Universities, or APLU, a membership organization that fosters a community of university leaders collectively working to advance the mission of public research universities in the U.S., Canada and Mexico.

Prior to leading APLU, Becker spent more than three decades at many of the different types of universities that comprise APLU's membership, having served as a postdoctoral fellow, professor, dean, provost and president at flagships, land-grants and urban-serving institutions.

Most recently, Becker served as president of Georgia State University from January 2009 to August 2021. During his tenure, Georgia State was one of the fastest growing research universities in the nation as sponsored awards more than doubled, and the university became a widely recognized national leader in the introduction of innovative programs and initiatives to foster student success. Under Becker's leadership, the university became one of the most diverse universities in the U.S., led the country in eliminating disparities in graduation rates based on race, ethnicity or income, and was first in the nation among nonprofit institutions in graduating Black students.

Becker has been a principal investigator on research funded by the National Institutes of Health and by the National Science Foundation, and he was a co-investigator on projects supported by the Agency for Healthcare Research and Quality, Centers for Disease Control and Prevention, Aetna Inc. and Quality Care Research Fund.

Becker has received numerous awards and recognitions, including being named one of America's 10 most innovative university presidents by Washington Monthly in 2015, the Academic Leadership Award from the Carnegie Corporation of New York in 2017, and the Hesburgh Award for Leadership Excellence in Higher Education from TIAA Institute in 2019. He is a fellow of the American Statistical Association and the American Association for the Advancement of Science.

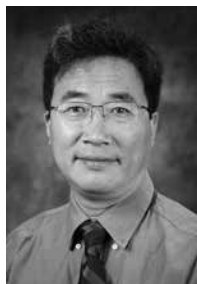

Becker attended Harford Community College in Maryland and earned his bachelor's degree in mathematics from Towson State University. He earned a doctorate in statistics from Pennsylvania State University.

## Commerce Bank and W.T. Kemper Foundation Distinguished Graduate Faculty Award

**Yoonseong Park**

As one of the most renowned international research leaders in insect molecular physiology, Yoonseong Park's research focuses not solely on insect pest species but also on other arthropod pest species. His group was the first to document the neuropeptidergic signaling system in multiple arthropod species. Park's group also identified several new insect neuropeptides and their corresponding receptors.

Park's research has been supported by 31 grants and contracts totaling more than \$7 million from various agencies. He has authored 121 journal publications and has given 247 research presentations and 89 invited talks.

Park has also made a significant contribution to graduate education at K-State, teaching several graduate courses, including Insects Physiology, Insect Anatomy and Histology, and Molecular Entomology Laboratory. He has mentored 10 postdoctoral fellows or visiting scientists and 25 undergraduate students. His devoted mentoring is evident — more than 70% of his students continue their careers in science as faculty members

or research scientists. Many of his students and postdoctoral researchers have now become national or international leaders in their respective careers.

Park earned his doctorate in insect science from the University of Arizona. He joined K-State's entomology department in 2002. His work has been recognized with awards from K-State, including the K-State College of Agriculture Excellence in Graduate Teaching Award in 2013. In 2020, Park was selected as Faculty of the Year by the Entomology Popenoe Club at K-State.

**Hans Coetzee**

As an internationally recognized scholar, Hans Coetzee has made high-impact contributions to improving the health and welfare of farm animals. His laboratory developed drug protocols that have positively impacted the welfare of more than 10 million calves that experience painful management procedures each year. Recently, Coetzee's research discovered methods to reduce pain at processing, which affects more than 100 million piglets each year, by delivering pain relief medications through milk from the sow to the piglets.

Coetzee has been successful in securing more than \$21.5 million in research funding. He has authored and co-authored 209 peer-reviewed manuscripts with more than 6,879 citations. For perspective, since the start of his academic career, he averages one publication per month and one million dollars in funding each year.

His contributions to graduate education at K-State include establishing the Anatomy and Physiology Graduate Assistantship Program. This program provides an opportunity for new graduate students to rotate through research laboratories using departmental funding for their first year of the program, resulting in a threefold increase in the number of doctoral students enrolled in the physiology program since 2018. Coetzee has mentored 28 graduate students — 10 as a major professor and 18 as a committee member.

Coetzee earned his doctorate in veterinary microbiology from Iowa State University in 2005. In 2022, he received the title of university distinguished professor, a lifetime title representing the highest honor at Kansas State University awarded to faculty. Coetzee is nationally and internationally recognized for his work, including being the youngest recipient of the American Veterinary Medical Association Animal Welfare Award in 2017.

Sally Linville

Sally Linville is the creative director of The City Girl Farm, a furniture design studio in Kansas City, Missouri. Her work seeks to treasure who we are as people — our memories, our senses and our relationships with one another and the world in which we live.

Each footstool tells a story, holding the unique imprint of the materials, processes and makers involved in their creation. More than 1,000 chickens and counting have been collected in private homes and public spaces worldwide.

Linville graduated from K-State's interior architecture and product design program in 2010. In her final furniture design studio, using fiber,

Marvin Wade

Marvin Wade, superintendent of Manhattan-Ogden USD 383, will serve as the College of Education's commencement speaker.

He began his duties as superintendent of Manhattan-Ogden USD 383 in 2016. Prior to his arrival in USD 383, Wade

was a superintendent in Marshalltown, Iowa, for eight years and in Weld County, Colorado, for eight years. Other administrative positions include assistant superintendent, director of instruction and special services, and principal. Wade earned his doctorate in educational leadership from Kansas State University in 1995 while serving as a principal in Clay Center, Kansas.

Wade has been named this year's recipient of the prestigious Dan and Cheryl Yunk Award for Excellence in Educational Administration. The Yunks were both exemplary teachers and administrators throughout their careers in the Manhattan-Ogden school system. Established in their honor, this award recognizes the importance of educational administrators in establishing environments that promote student learning.

Wade currently serves on the Council for Public School Improvement Steering Committee, the Kansas Association for Conservation and Environmental Education Board of Directors, the Institute for Personalized Learning Advisory Committee and the Youth Empowerment for Success Fund Advisory Board. He is also a member of the Marianna Kistler Beach Museum of Art Advisory Council, the Community Liaison Group for the National Bio and Agro-Defense Facility and the Manhattan Area Chamber of Commerce Board.

Since arriving in Manhattan, Wade has spoken at annual conferences of the Kansas Association of School Boards, Kansas Association for Career & Technical Education, Kansas Association of School Business Officials, United School Administrators of Kansas and the Kansas Multi-Tiered System of Supports Symposium.

Wade will be retiring this summer after a rewarding and successful career in educational administration.

Lou Von Thaeer

Lewis "Lou" Von Thaeer was appointed president and CEO of Battelle, the world's largest independent, not-for-profit research and development organization, in October 2017. Under Von Thaeer's leadership, Battelle has restored profitability and doubled revenue to more than \$11 billion while significantly expanding its research and development portfolio. Battelle's philanthropy has grown nearly fivefold and impacted 1.4 million students in science, technology, engineering and mathematics education in 2022.

Prior to his appointment at Battelle, Von Thaeer served as CEO of DynCorp International, a \$2 billion company with 12,000 employees, and was the national security sector president at Leidos.

Von Thaeer began his career with AT&T Bell Laboratories, serving in engineering and management roles for 14 years until the purchase of his division by General Dynamics. During his 16 years at General Dynamics, Von Thaeer rose to the position of president, advanced information systems and was named a corporate officer.

Von Thaeer holds a bachelor's degree in electrical engineering from Kansas State University and a master's in electrical engineering from Rutgers University. He is a member of K-State's Carl R. Ice College of Engineering Hall of Fame.

He serves as board chair of Oak Ridge and Pacific Northwest National Laboratories, AmplifyBio and National Veterans Memorial and Museum, and he is on the boards of Ambri and American Electric Power. He is a member of the board of trustees at The Ohio State University and serves on the advisory boards of InnovateOhio and HRL Laboratories. Von Thaeer previously served on the Defense Science Board, K-State's College of Engineering advisory council and the KSU Foundation board of directors.
